COMMERCIAL ITEM DESCRIPTION

BOTTLE, SCREW CAP

The General Services Administration has authorized the use of this commercial item description.

This commercial item description covers requirements for one type of wide mouth, plastic, screw-cap bottle, suitable for storing laboratory solutions and corrosive liquids and as a shipping container.

Salient characteristics:

Shall be a wide mouth polyethylene or polypropylene bottle of square shape. Shall be of natural color.

The bottles shall have a capacity of 32 ounces. The normal capacity point of the bottle shall not extend above the bottom level of the neck. The fill of the bottle shall be within +1/2, -0 ounce of the capacity specified. Shall have a wide mouth with continuous type conventionally used, thread finish. The mouth opening of the bottle shall be large enough to readily permit filling and dispensing of the contents. Shall be symetrical in shape and the walls shall be of uniform thickness. When placed on a plane smooth surface the bottles shall be stable.

The bottle shall be fitted with a one-piece molded polypropylene, screw cap. The screw cap shall be threaded with a continuous type thread. Shall have a molded-in seal ring which makes a close fit with the finish of the bottle forming an effective seal. With the screw cap applied, hand tight, there shall be no leakage. To provide for firm gripping for removing and tightening of the screw cap, the outside vertical surface of the screw cap shall have ribs. The bottle shall be furnished with the screw cap in place and shall be clean, dry and ready for use.

Workmanship. The bottles and caps shall be free from defects which detract from their appearance or impair their serviceability.

AMSC N/A FSC 6640

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Unit. Package (PG). One package containing twenty-four 32 oz. bottles, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Sampling for tests. Sampling for tests shall be in accordance with commercial practice. The unit of product for tests purposes shall be one unit.

Tests. Tests shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more tests.

Leakage test. Bottles shall be filled with water and closure shall be applied, hand tight. The filled bottle shall be suspended in an inverted position for four hours at room temperature. Any evidence of leakage shall be cause for rejection. As an alterate, the bottle can be tested for leakproof service at 2 psi for 2 minutes. If no water escapes, the container is leakproof.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Metric Products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard No. 376, and all other requirements of this document are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable. The contracting officer has the option of accepting or rejecting the product.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTES: The following National Stock Number is covered by this document:

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE. This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
