DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

Public reporting burden for this collection of information is estimated to average 110 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0188), Washington, DC 20503.

1. TITLE	2. IDENTIFICATION NUMBER
Energy Monitoring and Control Systems (EMCS) Performance Verification and Endurance Test Plan	DI-ATTS-80363A

3 DESCRIPTION/PURPOSE

3.1 The Performance Verification and Endurance Test Plan defines all the tests required to ensure that the EMCS meets technical, operational, and performance requirements.

3.2 The Performance Verification and Endurance Test Plan will be used for an in-process review of the testing to ensure that the proper tests, procedures, and equipment are used for the test.

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC APPLICABLE	6b. GIDEP APPLICABLE
940210	YD1		

7. APPLICATION/INTERRELATIONSHIP

7.1 This DID contains the format and content preparation instructions for the Performance Verification and Endurance Test Plans required by paragraph 4.2 of MIL-STD-2203A.

7.2 This DID is related to DI-ATTS-80364A, Energy Monitoring Control Systems (EMCS) Performance Verification and Endurance Test Procedures; DI-ATTS-80365A, Energy Monitoring Control Systems (EMCS) Performance Verification and Endurance Test Reports; and DI-ATTS-80366A, Energy Monitoring Control Systems (EMCS) Endurance Test Failure Reports.

7.3 This DID supersedes DI-ATTS-80363.

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
		N6993

10. PREPARATION INSTRUCTIONS

10.1 Format. The Performance Test Plan shall be in the contractor's format.

10.2 Content. The test plan shall contain the following:

10.2.1 Installed system block diagram.

10.2.2 System hardware description.

10.2.3 System software description.

10.2.4 Operator's command.

10.2.5 I/O summary tables with failure modes for test points.

10.2.6 Required passwords for each operator access level.

10.2.7 Description of each type of digital I/O and analog I/O to be used in the test.

10.2.8 List of test equipment.

10.2.9 Surge and overvoltage protection circuits diagrams. (Continued on Page 2)

11. DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

10. PREPARATION INSTRUCTIONS (Cont'd)

10.2.10 For each application programs shown in the I/O summary table, the plan shall include:

10.2.10.1 Inputs required for each program (I/O point values and status) and corresponding expecting results for each set of input values.

10.2.10.2 Default values for the program inputs not implemented or provided for in the contract documents for the application programs to be tested.

10.2.10.3 Failure modes for each I/O function to be tested.

10.2.11 Milestones for test exercises.

10.2.12 Identification of simulation programs, equipment, personnel, and facilities required.

10.2.13 Identification of capabilities and functions to be tested, including values and situations that comprise the test.

10.2.14 Identification of all areas where physical and functional details of the system to be tested differ from the generic system, including explanations of the differences.
