INTERIM COMMERCIAL ITEM DESCRIPTION

SODIUM CHLORIDE INJECTION, USP, PARTIAL-FILL BAGS WITH VIAL ADDITIVE PORT

The General Services Administration has authorized the use of this Interim Commercial Item Description which was developed by the Defense Personnel Support Center, Directorate of Medical Materiel, DPSC-RST, 2800 South 20th Street, Philadelphia, PA 19101, based upon currently available technical information.

Salient characteristics:

Shall be Sodium Chloride Injection, USP, 0.9%.

All ingredients shall be of pharmaceutical grade.

The solution shall be supplied in an oversized single dose, sterile, transparent, flexible plastic bag having one permanently attached outlet port for administration and one permanently attached inlet port for interlocking a complementary glass small volume parenternal drug vial.

The outlet port shall be force-fitted with a sterility protector with a tab for ease of removal and shall accept and retain the piercing device of the stocklisted administration sets. The outlet port shall be of such design as to hold and make a leak-proof fit with the IV administration set. The inlet port shall have a hermetically sealed sterility protector with a ring for ease of use. The inlet port shall be of such design as to facilitate addition of active drugs to the diluent container, and shall accept and make a proper tamper-resistant leak-proof fit, with the complementary glass small volume parenternal drug vials. The combined unit shall be of such design as to prevent the mixing of the two components until just prior to administration.

AMSC/NA FSC 6505

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

The following Intravenous Injection Sets shall be compatible with the subject item:

6515-00-115-0032	6515-00-140-0888
6515-00-185-5158	6515-00-484-0484
6515-01-082-1021	6515-01-105-0614
6515-01-153-4703	6515-01-153-5669

Type I shall be supplied 50 ml in a bag with a capacity of not less than 150 ml.

Type II shall be supplied 100 ml in a bag with a capacity of not less than 150 ml.

Type III shall be supplied 250 ml in a bag with a capacity of not less than 300 ml.

Workmanship. The Injection shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Package (PG).

For Size 1, one package containing 24 bags, as specified, constitutes one unit.

For Size 2, four plastic bags shall be supplied in a tray which shall serve as a water vapor barrier. One package containing 12 overpouches (48) bags, as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and
