COMMERCIAL ITEM DESCRIPTION
WAX, DENTAL (Impression)

The General Services Administration has authorized the use of this Commercial Item Description.

Salient characteristics:

This commercial item description covers a dental impression wax used for refining dental impressions.

The dental impression wax shall be suitable for use in refining dental impressions of full edentulous cases.

Material. The impression wax shall be of the formula suggested by the College of Dentistry, State University of Iowa. The impression wax shall be a non-pigmented wax composed of petroleum derivatives, mineral waxes and animal wax. The wax shall be of a color which sharply contrasts with the oral mucosa. The value of flow at 30 degrees Centigrade (^{O}C) shall be 76-85 percent when tested in accordance with the applicable paragraphs of the current American Dental Association Specification No. 4 for Dental Inlay Casting Wax. The wax, at oral temperature, shall be of such body as to accurately copy detail and register muscle and tissue attachments in 3-5 minutes. The wax shall be sufficiently hard and rigid at ordinary room temperature to resist warping and change of detail. The wax shall not have an unpleasant odor or flavor or irritate oral tissues, and shall be compatible with all types of impression material.

The wax shall be furnished in a unit package containing a minimum of 60 grams of wax in stick form. The sticks shall be nominally 1/4 inch (0.6cm) in diameter and 4 7/16 inches (11cm) in length.

Instructions. Adequate and accurate instructions for use shall accompany each unit.

Workmanship. The dental wax shall be furnished clean and free of particulate matter and free of any other defect which detracts from its appearance or serviceability.

Unit. Package (PG). One package containing nominally 60 grams of wax in stick form, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government, upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of 3 years after delivery of supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Sampling for inspection. Sampling for inspection shall be conducted in accordance with MIL-STD-105. Where feasible, the same sample shall be used for the determination of two or more inspection characteristics. The unit of product for inspection purposes shall be one package of 60 grams of wax. Unless otherwise specified, sampling for examination shall be conducted at inspection level II, AQL 2.5, and sampling for tests (when applicable) shall be conducted at inspection level S-1, AQL 1.0.

Examination. The wax shall be examined for defects including, but not limited to, those listed below.

Defects.

Wax not clean and free from particulate matter.
Wax has an unpleasant odor or flavor.
Wax not hard and rigid enough at room temperature.

Sticks of wax broken or chipped.
Dimensions of sticks of wax not as specified.
Instructions for use missing or incomplete.

Tests. Tests shall be conducted to determine compliance with specification requirements.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE. This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
