COMMERCIAL ITEM DESCRIPTION

HOOK, GLAND (Veterinary)

The General Services Administration has authorized the use of this commercial item description.

This commercial item description covers a hook suitable for use in veterinary surgical procedures.

Salient characteristics:

Material. The hook shall be fabricated of Class 4 martensitic corrosion-resistant steel in accordance with ASTM F899.

Hardness. The hook shall have a Rockwell hardness of C-40 to C-48 when tested in accordance with ASTM Standards E18, or E92 and E140.

Style and design. Style and design of the hook shall be in accordance with Figure 1.

Passivation. The hook shall be properly passivated.

Finish. The hook shall have a satin or mirror finish.

Boil test. The hook shall meet the boil test requirements specified in Federal Specification GG-I-526.

Copper sulfate test. The hook shall meet the copper sulfate test requirements specified in GG-I-526.

Marking. The hook shall bear the manufacturer's name or registered trademark and the word "stainless". Hooks of foreign manufacture shall bear the name of country of manufacture.

Workmanship. The hook shall be free from defects which detract from its appearance or impair its serviceability.

AMSC N/A FSC 6515

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Product Quality Level.

Visual and dimensional examination. Shall be examined to verify that design, construction and workmanship are in accordance with Applicable Requirements.

Materials. The supplier shall be responsible for performing tests to assure that materials are in accordance with requirements specified.

Unit. Each (EA). One hook, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Sampling for tests. Sampling for tests shall be conducted in accordance with MIL-STD-105, with an inspection level of S-1 and an AQL of 1.0. The unit of product for tests purposes shall be one hook.

Tests. Test shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerance specified using conversion tables contained in the latest revision of Federal Standard No. 376, and all other requirements of this document are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerance specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable. The contracting officer has the option of accepting.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.
