FOREWORD

1. This standard is approved for use by all Departments and Agencies of the Department of Defense.

2. Comments, suggestions, or questions on this document should be addressed to Commander, DLA Land and Maritime, ATTN: VAI, P.O. Box 3990, Columbus, Ohio, 43218-3990 or emailed to CircularConnector@dla.mil. Since contact information can change, you may want to verify the currency of this address information using the ASSIST Online database at https://assist.dla.mil.

SUMMARY OF CHANGE 1 MODIFICATIONS

1. Change to table II, “Cross-reference of insert arrangements by shell size” on pages 9 through 12: Add reference to footnote “1/” next to each insert arrangement that requires either contact size 22 or 22M. Footnote “1/” states “inactive for new design”. Insert arrangements that specify contact sizes 22 and 22M, which are no longer used in new design, include series I arrangements 9-6, 9-44, 11-13, 13-22, 15-37, 17-55, 19-66, 19-67, 21-1, 23-1, 23-2, 25-1, 25-2, and series II arrangements 8-6, 8-44, 10-13, 12-22, 14-37, 16-42, 16-55, 18-53, 18-66, 18-67, 20-1, 20-2, 22-1, 22-2, 24-1, 24-2. Except for insert arrangements 8-44 and 16-42, all of the above-referenced arrangements include the phrase “(inactive for new design)” within the figures themselves. Add “(inactive for new design)” to arrangements 8-44 and 16-42 to harmonize with the other above-referenced figures.

2. Add tracer lines to insert arrangements 10-13, 10-35, 11-13 and 11-35, and require contact identification numbers for contact cavities 1, 5, 10 and 13. The tracer lines are intended as a visual aid for the user to more easily locate contact cavities for insertion and removal of crimp contacts in high density insert arrangements. In addition, update tracer line originally added to insert arrangement 11-35 during revision C. MIL-STD-1560C with change 1 replaces the tracer line with its mirror image, in order for the line to follow cavity designators in sequential order.

3 Add tracer line around contact cavity “A” in insert arrangement 21-41. The new tracer line is intended as a visual aid for the user to more easily locate contact locations in this high density insert arrangement.

4. Add requirement for tracer lines under all lower case contact cavity identification letters. The change is intended as a visual aid to better enable the user to differentiate between the upper case and lower case contact cavity identification letters in this high density insert arrangement.

1. SCOPE

1.1 Scope. This standard covers insert arrangements for use with MIL-DTL-38999 series I, II, III and IV; MIL-DTL-27599 series I and II; and SAE-AS29600 series A, circular, electrical connectors.

2. APPLICABLE DOCUMENTS

2.1 General. The documents listed in this section are specified in sections 3, 4, and 5 of this standard. This section does not include documents cited in other sections of this standard or recommended for additional information or as examples. While every effort has been made to ensure the completeness of this list, document users are cautioned that they must meet all specified requirements of documents cited in sections 3, 4, and 5 of this standard, whether or not they are listed.

2.2 Government documents.

2.2.1 Specifications, standards, and handbooks. The following specifications, standards, and handbooks form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents are those cited in the solicitation or contract.

DEPARTMENT OF DEFENSE SPECIFICATIONS

MIL-DTL-38999	-	Connectors, Electrical, Circular, Miniature, High Density, Quick Disconnect (Bayonet, Threaded, and Breech Coupling), Environment Resistant, Removable Crimp and Hermetic Solder Contacts, General Specification for.
MIL-DTL-27599	-	Connectors, Electrical, Circular, Miniature, Quick Disconnect, Environment Resistant, Solder Contacts, General Specification for.

(Copies of these documents are available online at http://quicksearch.dla.mil/.)

2.2.2 Other Government documents, drawings and publications. The following other Government documents, drawings and publications form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents are those cited in the solicitation or contract.

DRAWINGS

02003	-	Contact Electrical Connector Concentric Twinax, Socket, Shielded, Size 12 (For MIL-DTL-38999 Series I, III, and IV connectors)
02004	-	Contact Electrical Connector Concentric Twinax, Pin, Shielded, Size 12 (For MIL-DTL-38999 Series I, III, and IV connectors)

(Copies of DLA Land and Maritime drawings are available for download at internet web address http://www.landandmaritime.dla.mil/programs/milspec/DocSearch.aspx.)

2.2.3 Non-Government publications. The following documents form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents are those cited in the solicitation or contract.

SAE INTERNATIONAL

SAE-AS29600	-	Connectors, Electrical, Circular, Miniature, Composite, High Density, Quick Coupling, Environment Resistant, Removable Crimp Contacts, Associated Hardware, General Specification for.
SAE-AS39029/59	-	Contacts, Electrical Connector, Socket, Crimp Removable, Shielded, Size 8 (for MIL-C-38999 Series I, III, and IV Connectors).

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T07:49Z
Check the source to verify that this is the current version before use.

SAE-AS39029/60	-	Contacts, Electrical Connector, Pin, Crimp Removable, Shielded, Size 8 (for MIL-C-38999 Series I, III, and IV Connectors).
SAE-AS39029/90	-	Contact, Electrical Connector, Concentric Twinax, Pin, Size 8.
SAE-AS39029/91	-	Contact, Electrical Connector, Concentric Twinax, Socket, Shielded, Size 8.
SAE-AS39029/113	-	Contact, Electrical Connector, Concentric Twinax, Pin, Size 8, MIL-DTL-38999 Series I, III and IV.
SAE-AS39029/114	-	Contact, Electrical Connector, Concentric Twinax, Socket, Size 8, MIL-DTL-38999 Series I, III and IV.
SAE-AS39029/121	-	Contacts, Electrical Connector, Socket, Crimp Removable, Expanded Performance, Sizes 10, 12, 16, 20, 22 and 23 (for MIL-DTL-38999 Series III Connectors).
SAE-AS39029/122	-	Contacts, Electrical Connector, Pin, Crimp Removable, Expanded Performance, Sizes 10, 12, 16, 20, 22 and 23 (for MIL-DTL-38999 Series III Connectors).

(Copies of these documents are available at http://www.sae.org or SAE International, 400 Commonwealth Drive, Warrendale, PA 15096-0001, and Tel: 877-606-7323 (inside USA and Canada) or 724-776-4970 (outside USA), or email: CustomerService@sae.org.)

2.3 Order of precedence. Unless otherwise noted herein or in the contract, in the event of a conflict between the text of this document and the references cited herein, the text of this document takes precedence. Nothing in this document, however, supersedes applicable laws and regulations unless a specific exemption has been obtained.

3. DEFINITIONS

3.1 Definitions. The terms used in this standard are generally accepted by the electrical and electronics industries and are commonly used in electrical connector engineering practice, except for the following terms:

a) Heat shrink sleeve. Shrink sleeves (also called “heat shrink boots”) supplied with shielded contacts are used for environmental sealing of the contact to the connector grommet cavity and to the cable. It is supplied with the contact, when specified. The sleeve is placed on the cable prior to terminating the contact. Once the cable is terminated, the shrink sleeve slides over the contact, and heat is applied to shrink the sleeve and melt the adhesive. Since the maximum temperature rating of a shrink sleeve is 175°C, a connector with a higher temperature rating will be derated to 175°C when twinax contacts with shrink sleeves are used.

b) Sealing boot. A sealing boot is a device that is used to environmentally seal a cable to a shielded electrical contact and the electrical contact to the grommet cavity within a connector insert. It is supplied with the contact, when specified. The boot is placed onto the cable prior to terminating the contact. Once the contact is installed into the connector, the boot slides forward into the grommet cavity to seal the contact to the connector. For this standard, a sealing boot may be required to be supplied with the connector for specified insert arrangements with size 8 shielded contacts. A heat shrink sleeve is not used with a size 8 shielded contact when a sealing boot is specified.

c) Inactive for new design. For this standard, insert arrangements that are specified as “inactive for new design” are not be used in new designs or equipment. An inactive arrangement may be used to support existing designs or equipment.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T07:49Z
Check the source to verify that this is the current version before use.

4. GENERAL REQUIREMENTS

4.1 Recycled, recovered, environmentally preferable, or biobased materials. Recycled, recovered, environmentally preferable, or biobased materials should be used to the maximum extent possible, provided that the material meets or exceeds the operational and maintenance requirements, and promotes economically advantageous life cycle costs.

5. DETAILED REQUIREMENTS

5.1 Dimensions. Dimensions shall be in accordance with the applicable section of this standard and the following dimensional data:

a. ↓ indicates ℄ (center line) of insert arrangement.

b. All dimensions are true position (TP). Dimensions are in inches**,** unless otherwise specified. Dimensions and markings: Front face of pin insert shown (socket insert opposite).

c. Contact dimensions- socket cavity diameter and pin engaging end diameter for each contact size:

Dimensions, socket cavity diameter and pin engaging end diameter			
Contact size	Connector specification	Contacts, number of places as applicable	
		insert, socket contact, contact cavity diameter	pin contact, engaging end diameter
23-22	MIL-DTL-38999	.032 min	.0275 / .0260
22	MIL-DTL-27599 or MIL-DTL-38999	.036 min	.0300 ± .0005
22D	MIL-DTL-38999 or SAE-AS29600 series A	.035 min	.0300 ± .0005
22M	MIL-DTL-27599 or MIL-DTL-38999	.036 min	.0300 ± .0005
20	MIL-DTL-27599	.045 min	.040 ± .001
20	MIL-DTL-38999 or SAE-AS29600 series A	.049 min	.040 ± .001
16	MIL-DTL-27599	.067 min	.0625 ± .0010
16	MIL-DTL-38999 or SAE-AS29600 series A	.071 min	.0625 ± .0010
12	MIL-DTL-27599	.099 min	.094 ± .001
12	MIL-DTL-38999 or SAE-AS29600 series A	.103 min	.094 ± .001
10	MIL-DTL-38999	.134 min	.125 ± .001
8 coax or twinax	MIL-DTL-38999 or SAE-AS29600 series A	.227 min	.218 ± .001

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T07:49Z
Check the source to verify that this is the current version before use.

d. Receptacle and plug gauge features:

For MIL-DTL-38999 series I, II, and III, SAE AS29600 series A, and MIL-DTL-27599 series I and II receptacle connectors**,** functional gauge features for determining socket contact cavity locations or tip of pin contact locations shall be .002 smaller than H at MMC, and .006 smaller than GG at MMC.

For MIL-DTL-38999 series I, II, and III; SAE AS29600 series A and MIL-DTL-27599 series I and II plug connectors, functional gauge features for determining socket contact cavity locations or the tip of pin contact locations shall be .002 larger than W at MMC and .006 larger than GG at MMC.

Crimp removable contact tolerances shall be .015 at MMC (socket contact cavities) and .024 at MMC (tip of pin contacts). Fixed contact tolerances, including hermetically sealed contacts and MIL-DTL-27599 fixed contacts, shall be .004 at MMC.

e. Contact locations, geometric dimensioning and tolerancing requirements:

Note: Some datums referenced in the below tables are found in the intermateability dimension figures in the associated connector specifications, including MIL-DTL-38999, MIL-DTL-27599 and SAE-AS29600. For example, datums B, H, W, G, GG, F, C and L are shown in MIL-DTL-38999. Primary datum B (series I through III) is established by the plane along the surface of the front face of the receptacle shell and the plane along the surface of the front face of the plug shell. Secondary datum H is established by the inside diameter of the receptacle shell and secondary datum W is established by the outside diameter of the plug shell. Datums G and GG, which are used to establish angular orientation around the datum axis, are the centerlines of the keys or keyways. For series IV only, datum B is the front face of the receptacle shell and datum E is the front face of the plug shell. Series IV, datums L and C are established by plug and receptacle diameters. Series IV, datums H and G are used to establish angular orientation.

The pattern of the socket cavity / pin locations may shift in one direction, but the MMC modifiers on the secondary and tertiary datums do not allow socket cavity / pin position deviations within the pattern.

5.2 Marking. Marking shall be in accordance with MIL-DTL-38999, SAE-AS29600 series A, MIL-DTL-27599, and as shown in the applicable section of this standard. Sawtooth lines may be used in place of straight lines.

5.3 Drawing notes. The following information is applicable to all figures of this standard.

a. Dimensions are in inches, unless otherwise specified.
b. Metric equivalents are given for information only.
c. Firewall applications: Insert arrangements using shielded contacts (e.g. coax, twinax, etc.), including 17-2, 17-3, 17-11, 19-18, 19-19, 21-75, 21-76, 25-7, 25-8, 25-9, 25-10, 25-20, 25-21, 25-46, 25-47, 25-90 and 25-91 shall not be used in firewall connector applications.
d. SAE-AS39029 contacts: For application notes on SAE-AS39029 contacts, see MIL-DTL-38999, section 6.
e. Each insert arrangement is shown using a conventional two-dimensional Cartesian system, with two perpendicular axes. The x-axis is always the horizontal axis, and the y-axis is always the vertical axis. The origin, or “0,0” point, is always where the two axes meet. The axes in each insert arrangement follow the standard two-dimensional, “positive” orientation, with the positive x-axis pointed to the right and the positive y-axis pointed up.

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory.)

6.1 Intended use. This standard covers insert arrangements for use with MIL-DTL-38999 series I, II, III and IV; MIL-DTL-27599 series I and II; and SAE-AS29600 series A circular connectors. Information pertaining to shell size, arrangement number, number of contacts, size of contacts, service rating, contact location, and superseding information is contained in this document.

6.2 Cross-reference. See table I for a cross-reference of previous sections and current figures. See table II for a hyperlinked cross-reference to insert arrangement numbers by shell size. See table III for a cross-reference of superseded insert arrangements.

TABLE III. Cross-reference of superseded insert arrangements. 1/

Superseded insert arrangement number 2/	Superseded by insert arrangement number 3/
17-2	17-3
19-18	19-19
21-75	21-76
25-7	25-9
25-8	25-10
25-46	25-47
25-90	25-91

1/ Superseded arrangements are inactive for new design, but are still available for use in existing designs.

2/ Inactive for new design. Note: To meet environmental sealing requirements, size 8 shielded contacts used with these insert arrangements may require separate, non-standard sealing boots that are furnished with the connector. For these insert arrangements, some connector grommet designs use a heat shrink sleeve only with specified size 8 shielded contacts to meet environmental sealing requirements. Heat shrink sleeves have a maximum temperature rating of 175°C maximum. When heat shrink sleeves are used, connectors rated to 200°C max are derated to 175°C max. When heat shrink sleeves are used, sealing boots are not used, and when sealing boots are used, heat shrink sleeves are not used.

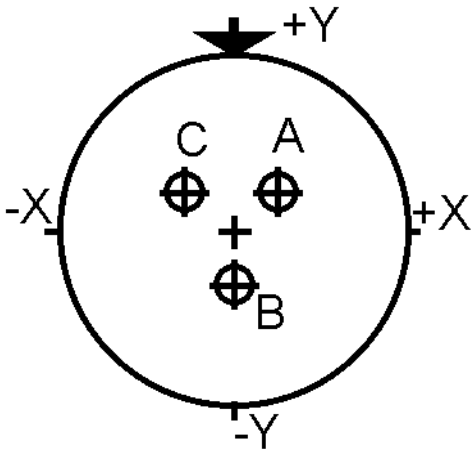

3/ To ensure environmental sealing, size 8 shielded contacts for these insert arrangements require sealing boots in accordance with MIL-DTL-38999/62. Required sealing boots are furnished with the connector. When sealing boots are used, heat shrink sleeves are not used.

Shell size	Arrangement no.	Number of contacts	Size contacts	Service rating	Contact position ID	Standard contact	
						Pin	Socket
17	-2	38	22D	M	All other	M39029/58-360	M39029/56-348
		1	8 (See note)	Twinax	39	M39029/90-529	M39029/91-530

NOTE: To meet environmental sealing requirements, size 8 shielded contacts used with this insert arrangement may require separate, non-standard sealing boots that are furnished with the connector. For this insert arrangement, some connector grommet designs use a heat shrink sleeve only with the size 8 shielded contacts to meet environmental sealing requirements. Heat shrink sleeves have a maximum temperature rating of 175°C maximum. When heat shrink sleeves are used, connectors rated to 200°C max are derated to 175°C max. When heat shrink sleeves are used, sealing boots are not used, and when sealing boots are used, heat shrink sleeves are not used.

		14	22D	M	All others	M39029/58	M39029/56

NOTE: To meet environmental sealing requirements, size 8 shielded contacts used with this insert arrangement may require separate, non-standard sealing boots that are furnished with the connector. For this insert arrangement, some connector grommet designs use a heat shrink sleeve only with the size 8 shielded contacts to meet environmental sealing requirements. Heat shrink sleeves have a maximum temperature rating of 175°C maximum. When heat shrink sleeves are used, connectors rated to 200°C max are derated to 175°C max. When heat shrink sleeves are used, sealing boots are not used, and when sealing boots are used, heat shrink sleeves are not used.

Shell size	Arrangement no.	Number of contacts	Size contacts	Service rating	Contact location	Standard contact	
						Pin	Socket
21	-75	4	8 (see note)	Twinax	All	M39029/90-529	M39029/91-530

NOTE: To meet environmental sealing requirements, size 8 shielded contacts used with this insert arrangement may require separate, non-standard sealing boots that are furnished with the connector. For this insert arrangement, some connector grommet designs use a heat shrink sleeve only with the size 8 shielded contacts to meet environmental sealing requirements. When heat shrink sleeves are used, sealing boots are not used, and when sealing boots are used, heat shrink sleeves are not used. Heat shrink sleeves have a maximum temperature rating of 175°C maximum. When heat shrink sleeves are used, connectors rated to 200°C max are derated to 175°C max.

NOTE: To meet environmental sealing requirements, size 8 shielded contacts used with this insert arrangement may require separate, non-standard sealing boots that are furnished with the connector. For this insert arrangement, some connector grommet designs use a heat shrink sleeve only with the size 8 shielded contacts to meet environmental sealing requirements. When heat shrink sleeves are used, sealing boots are not used, and when sealing boots are used, heat shrink sleeves are not used. Heat shrink sleeves have a maximum temperature rating of 175°C maximum. When heat shrink sleeves are used, connectors rated to 200°C max are derated to 175°C max.

NOTE: For this insert arrangement, size 8 twinax contacts are intended to be used with a heat shrink sleeve to effect environmental sealing to the connector and cable. Heat shrink sleeves used with size 8 twinax contacts are rated to 175° C maximum. Connectors rated to 200°C max are derated to 175°C max when heat shrink sleeves are used. For environmental sealing and prevention of splaying, some 25-20 insert arrangement grommet designs may use a separate, non-standard boot that is supplied with the connector for use with size 8 twinax contacts. If a heat shrink sleeve is used, then a sealing boot is not used. If a sealing boot is used, then a heat shrink sleeve is not used.

NOTES:

1. To meet environmental sealing requirements, size 8 shielded contacts used with this insert arrangement may require separate, non-standard sealing boots that are furnished with the connector. For this insert arrangement, some connector grommet designs use a heat shrink sleeve only with the size 8 shielded contacts to meet environmental sealing requirements. When heat shrink sleeves are used, sealing boots are not used, and when sealing boots are used, heat shrink sleeves are not used. Heat shrink sleeves have a maximum temperature rating of 175°C maximum. When heat shrink sleeves are used, connectors rated to 200°C max are derated to 175°C max.
2. If an identical insert arrangement / contact pattern is required which uses SAE-AS39029/90 and /91 size 8 twinax contacts, use insert arrangement 25-90. If an identical insert arrangement / contact pattern is required with uses SAE-AS39029/113 and /114 size 8 twinax contacts, use insert arrangement 25-91.

NOTE: For this insert arrangement, sealing boots in accordance with MIL-DTL-38999/62 shall be used to environmentally seal the size 8 coax contacts required by this arrangement. Heat shrink sleeves are not used when sealing boots in accordance with MIL-DTL-38999/62 are used. For an identical insert arrangement pattern for connectors supplied with size 8 twinax contacts, see insert arrangement 25-91. 25-91 uses size 8 twinax contacts in accordance with SAE-AS39029/113 or /114, and it uses sealing boots in accordance with MIL-DTL-38999/62.

		4	16	I	v , x , y , AA	M39029/58-364	M39029/56-352
		40	20		All others	M39029/58-363	M39029/56-351

NOTE: To meet environmental sealing requirements, size 8 shielded contacts used with this insert arrangement may require separate, non-standard sealing boots that are furnished with the connector. For this insert arrangement, some connector grommet designs use a heat shrink sleeve only with the size 8 shielded contacts to meet environmental sealing requirements. When heat shrink sleeves are used, sealing boots are not used, and when sealing boots are used, heat shrink sleeves are not used. Heat shrink sleeves have a maximum temperature rating of 175°C maximum. When heat shrink sleeves are used, connectors rated to 200°C max are derated to 175°C max.
