INCH-POUND

MIL-C-49464
AMENDMENT 2
18 April 1991
SUPERSEDING
AMENDMENT 1
22 March 1989

MILITARY SPECIFICATION

CAPACITORS, CHIP, SINGLE LAYER, FIXED, PARALLEL PLATE, CERAMIC DIELECTRIC, ESTABLISHED RELIABILITY, GENERAL SPECIFICATION FOR

This amendment forms a part of MIL-C-49464, dated 12 May 1988, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 2

* 1.2.1.5, delete and substitute:

"1.2.1.5 Termination finish. The termination finish shall be identified by either the letter 'N' or 'P'. The letter 'N' shall identify a termination suitable for solder attachment (see 3.5.2). The letter 'P' shall identify a termination suitable for attachment by conductive epoxy or eutectic methods (see 3.5.2)."

PAGE 3

* 3.5.2, delete and substitute:

"3.5.2 Terminations. The terminations shall be a minimum of 50 microinches of gold over a suitable barrier base metal 'N' or a termination suitable for attachment by conductive epoxy or eutectic methods 'P'."

PAGE 9

* TABLE IV, group II, following "Solderability", add: "3/".

* TABLE IV, following footnote 2/, add:

"3/ Solderability test is only applicable to termination 'N' capacitors."

PAGE 10

* TABLE VI, subgroup 1, following "Solderability", add: "1/". At end of table VI, add:

"1/ Solderability test is only applicable to termination 'N' capacitors."

PAGE 12

* 4.7.1, item "b", delete and substitute:

"b. The capacitors to be tested shall be attached to one land area by the applicable methods (see 1.2.1.5)."

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

PAGE 13

4.7.3, delete and substitute:

"4.7.3 Capacitance (see 3.7). Unmounted capacitors shall be tested in accordance with method 305 of MIL-STD-202. The following detail and exception shall apply:

a. Test frequency:

Classes 1A, 1B, and 1C: 1 MHz ±50 kHz.

Classes 2 and 3 (≤ 100 pF): 1 MHz ±50 kHz.

Classes 2 and 3 (> 100 pF): 1 kHz ±50 Hz.

b. Test voltage:

Classes 1A, 1B, 1C, and 2: 1.0 V rms ±0.2 V.

Class 3: 0.3 V rms ±0.1 V.

NOTE (for classes 2 and 3 characteristics only): Following a dielectric withstanding voltage or insulation resistance test, capacitance may be measured after holding the capacitor for a period of time not to exceed 24 hours."

PAGES 17 AND 18

1/ Thirty-nine units of the smallest case and 40 units of the largest case shall be submitted if certification is given for fungus (see 3.19)."

The margins of this amendment are marked with an asterisk to indicate where changes (additions, modifications, corrections, deletions) from the previous amendment were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous amendment.
