COMMERCIAL ITEM DESCRIPTION

CORNED BEEF HASH, CANNED

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description.

This Commercial Item Description (CID) covers canned corned beef hash, packed in commercially acceptable containers, suitable for use by the Federal Government.

Salient characteristics.

Preparation requirements: The canned corned beef hash shall be prepared in accordance with good commercial practice and shall conform to provisions of 319.303, Meat and Poultry Regulations of the U.S. Department of Agriculture (USDA).

Composition: No meat byproducts or variety meats shall be used in preparing the canned corned beef hash.

Appearance and/or color: The canned corned beef hash shall have a normal appearance and/or color.

Odor and flavor: The odor and flavor shall be characteristic of canned corned beef hash.

Defects: The meat and potatoes shall appear as distinct particles with uniform distribution. The potatoes and onions shall be free from skins, eyes, stems, and dark sections. No more

Beneficial comments, recommendations, additions, deletions, clarifications, etc., and any data which may improve this document should be sent to: Head, Food Quality Assurance Staff, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Room 2506, South Building, P.O. Box 96456, Washington, DC 20090-6456.

than a slight amount of free liquid shall be present in the product. Bone measuring 0.3 inch (0.762 cm) or more in any dimension, and cartilage measuring 0.5 inch (1.27 cm) or more in any dimension is not permitted.

Fat content: The average fat content of the finished product shall not exceed 15.0 percent and the fat percentage of product in any individual container shall not exceed 17.0.

Moisture content: The average moisture content of the finished product shall not exceed 72.0 percent and the moisture percentage of product in any individual container shall not exceed 81.0.

Salt content: The average salt content shall not exceed 2.5 percent and the salt percentage of the product in any individual containers shall not exceed 2.8.

Foreign material: Determination of wholesomeness and acceptability with respect to the presence of foreign material (e.g.; glass, dirt, insect parts, hair, wood, or metal) shall be made by a Meat and Poultry Inspection Operations employee.

Net weight: Net weight of containers shall be not less than labeled on the container.

Age requirement: Unless specified in the solicitation, contract, or purchase order, the canned corned beef hash shall be manufactured not more than 90 days prior to delivery.

Analytical requirements.

Chemical analyses shall be made in accordance with the Official Methods of Analysis of the AOAC.

Test	Method
Fat	960.39, 976.21, or 985.15
Salt	935.47
Moisture	985.14, 950.46

Contractor's certification.

By submitting an offer, the contractor certifies that the product offered meets the specified salient characteristics and requirements of this CID; conforms to the producer's own specifications and standards, including product characteristics, manufacturing procedures, quality control procedures, and storage and handling practices; has a national or regional distribution from storage facilities located within the United States, its territories, or possessions; and is sold on the commercial market. The Government reserves the right to

determine proof of such conformance prior to the first delivery from point of origin and any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance with the provisions of the contract.

Regulatory requirements.

The meat component and the finished product shall originate and be produced, processed, and stored in plants approved under Meat and Poultry Inspection Regulations of the USDA. The delivered canned corned beef hash shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sales of the product within the commercial marketplace. Delivered canned corned beef hash shall comply with all applicable provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

Quality assurance.

When the solicitation, contract, or purchase order requires that product quality or acceptability or both be determined, the Processed Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service (AMS), USDA, shall be the certifying activity and shall make the determination in accordance with applicable PPB procedures. The canned corned beef hash shall be examined or analyzed or both in accordance with applicable provisions in the CID, and when applicable, the United States Standards for Condition of Food Containers.

End item inspection.

The end item lot size, expressed as number of cans, shall be declared to the AMS agent by the contractor. Canned corned beef hash from open cans used for product examination shall remain the property of the contractor.

Product examination.

The canned corned beef hash shall be examined for the defects listed in Table II. The sample unit shall be one filled and sealed can. Cans selected for examination must be free from damage. The sample size shall be as specified in Table I. Failure of the sample to meet the acceptance criteria as indicated in Table I shall be cause for rejection of the lot.

TABLE I. Sampling plan for product inspection

Lot size (cans)	Sample size (number of cans)	Defect category Major AC	Major RE
500 or less	8	1	2
501 to 3,200	13	2	3
3,201 to 35,000	20	3	4

TABLE II. Product defects 1/

Category	Defect
Major	
101	Net weight less than labeled on the container.
102	Product does not exhibit distinct beef and potato pieces with uniform distribution.
103	Product has more than a slight amount of free liquid.
104	Potatoes and onions have skins, eyes, stems, or dark sections.
105	Presence of bone measuring 0.3 inch (0.762 cm) or more in any dimension.
106	Presence of cartilage measuring 0.5 inch (1.27 cm) or more in any dimension.

1/ The canned corned beef hash shall be examined at a temperature of 70 to 80°F (21.1 to 26.6°C).

Preservation, packaging, packing, labeling, and marking.

The canned corned beef hash, shall be preserved, packaged, packed, labeled, and case marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the solicitation, contract, or purchase order, shall be acceptable. Shipping containers shall comply with the National Motor Freight Classification or Uniform Freight Classification, as applicable.

For Department of Defense procurements.

The following requirements are applicable when specified by the contracting officer.

Check the source to verify that this is the current version before use.

A. Commercial packaging. The canned corned beef hash shall be packaged in a No. 10 (603 x 700) can in accordance with commercial practice.

B. Commercial packing. Six cans shall be packed in a manner to ensure carrier acceptance and safe delivery at destination at the lowest transportation rate for such supplies. The shipping container shall be in accordance with the National Motor Freight Classification or the Uniform Freight Classification.

C. Export packaging. The canned corned beef hash shall be packaged into a size 603 x 700 open-top style, round metal can. The can shall have either a welded or lead-free soldered side seam and compound-lined, double-seamed ends. The can shall be made throughout from not less than 0.25 pound per base box electrolytic tinplate. The can shall be coated overall on the outside with a coating conforming to Type I, or when specified, Type III of TT-C-495. The filled and sealed can shall have a vacuum of not less than 5 inches (12.7 cm) of mercury.

D. Export packing. Six cans of canned corned beef hash shall be packed in a snug-fitting fiberboard box conforming to style RSC, grade V3c, V3s, or V4s of ASTM D 5118. The cans shall be arranged 3 in length and 2 in width within the box. Each shipping container shall be closed and reinforced with nonmetallic strapping or pressure-sensitive adhesive, filament-reinforced tape in accordance with ASTM D 1974.

E. Unit loads (commercial and export). Shipping containers shall be arranged in unit loads in accordance with MIL-L-35078.

F. Marking (commercial and export). Marking of unit packs, shipping containers, and unit loads shall be in accordance with MIL-STD-129.
