COMMERCIAL ITEM DESCRIPTION

SIMULATED BLOOD POWDER

The General Services Administration has authorized the use of this Commercial Item Description.

This Commercial Item Description covers a simulated blood powder suitable for use with war wounds moulage sets.

Salient characteristics:

The simulated blood powder shall consist of a uniformly mixed dry powder containing the ingredients listed below to simulate the appearance and consistency of human blood when mixed with water. The dye used in the formulation of the powder shall be certified by the Food and Drug Administration for at least external cosmetic use. The formulation of the powder shall be as follows:

Dye and coloring powder	56.0 percent
Methyl cellulose	33.0 percent
Sodium Bensoate	11.0 percent

A tolerance of plus or minus 3 percent shall apply to the formulation. Excluding wool, dyes selected shall wash off all clothing, skin and moulages.

Thirty-seven (37) grams plus or minus 10 percent of the powder shall be contained in a heat sealed 8-gage vinyl film plastic bag. Each bag shall have the following information legibly printed on one side.

POWDER, SIMULATED BLOOD

For Preparation of Simulated Blood

1. To one quart of hot water, add the package contents very slowly, stirring/agitating constantly.
2. Stir/agitate until the powder appears to be wetted out and without lumps.

AMSC N/A FSC 6910

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

3. Add the remaining water at room temperature or colder to make one gallon.
4. Agitate thoroughly until solution is complete.

This formula will wash off skin, moulages and clothing except wool. NOT INTENDED FOR HUMAN CONSUMPTION. DO NOT PUT IN MOUTH.

Also provide:

Name and address of manufacturer.
Date of manufacture

Workmanship. The simulated blood powder shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Package (PG). One package containing five bags of powder, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Sampling for examination. Sampling for examination shall be conducted in accordance with MIL-STD-105, with an AQL of 1.5 (percent defective) and an inspection level of II. The unit of product for examination purposes shall be one package of simulated blood powder, as specified in this description.

Sampling for tests. Sampling for tests shall be conducted in accordance with MIL-STD-105, with an AQL of 1.5 (percent defective) and an inspection level of II. The unit of product for test purposes shall be one package of simulated blood powder.

Tests. Tests shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard 376, and all other requirements of this document are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

Ordering data. Intermediate/exterior package quantities, labeling, and marking must be specified in the contract and/or order.

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE: This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document*(s)* or to amend contractual requirements.
