MILITARY SPECIFICATION

NETWORK B: 10526468

This amendment forms a part of Military Specification MIL-N-60210(MU) dated 4 March 1965.

Paragraph 4.5.2.1.1.1: Delete and substitute:

"4.5.2.1.1.1 Forward voltage drop.- Connect pin 7B to the minus 6 volt supply voltage through a 680 ohm, 1/2 watt ± 5% resistor and ground pin 8B. The voltage measured from ground to pin 7B shall be less positive than plus 0.5 volt. No other voltage shall be connected during this test."
