MILITARY SPECIFICATION

PERISCOPES, TANK: M28 SERIES

This amendment forms a part of Military Specification MIL-P-45184D(MU), dated 20 December 1966.

Paragraph 3.5.1 Elevation: Delete and substitute:

"3.5.1 Elevation.- The line of sight through the reticle boresight mark shall form an angle of 67 degrees, 30 minutes plus or minus 1 mil (with the exception that the Periscope, M28E1 shall form an angle of 108° 30' ± 1 mil) with a line through the centers of the two bores of the elevation input arm assembly when the line of sight is parallel to the horizontal mounting surface of the instrument within 10 mils, and the elevation input arm adjustment is set at midpoint. The mid-point of the elevation boresight adjustment is defined as that setting which allows a minimum remaining adjustment of 1/16 inch in each direction."

Paragraph 3.9 Elevation tracking accuracy.- Delete " 67 degrees, 30 minutes nominal".
