MIL-E-22200/2C
AMENDMENT 2
6 June 1979
SUPERSEDING
INT. AMENDMENT 1(SH)
11 September 1978

MILITARY SPECIFICATION

ELECTRODES, WELDING, COVERED (AUSTENITIC

CHROMIUM-NICKEL STEEL)

* This amendment forms a part of Military Specification MIL-E-22200/2C, dated 15 June 1976, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 1

1.1 Delete and substitute:

"1.1 Scope. This specification sheet covers shielded metal arc welding covered electrodes, for manually depositing austenitic chromium-nickel steel weld metal. The use of this specification sheet is limited to the acquisition of electrodes for the following applications:

(a) Subsafe.
(b) HY-80 steel for submarines and surface ships.
(c) Other special applications when approved or specified by the command or agency concerned.

Applicable American Welding Society specifications are used for other applications of these types of electrodes."

PAGE 4

Table II, column 3, items six through nine: Delete "35" and substitute "30".

NOTE: The margins of this amendment are marked with an asterisk (*) to indicate where changes (additions, modifications, corrections, deletions) from the previous amendment were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous amendment.
