COMMERCIAL ITEM DESCRIPTION

PAPER, BIBULOUS AND LENS
4 X 6 Inches, 12s

The General Services Administration has authorized the use of this Commercial Item Description as a replacement for Military Specification MIL-P-36728B which is cancelled.

This Commercial Item Description covers one type of booklet which contains bibulous and lens paper.

Salient characteristics:

Shall be a booklet consisting of 50 sheets (minimum) of lens tissue paper and 50 sheets (minimum) of bibulous paper.

Lens paper shall be a lint-free paper which will not scratch microscope lens. Shall have a basis weight of 8.5 $\pm$ 0.6 pounds. Dry tensile strength (15 mm width) in the machine and cross direction shall be a minimum of 450 grams.

Bibulous paper shall have absorptive blotting properties, a smooth lintless surface and close texture. Shall be capable of absorbing 0.5 ml of distilled water at room temperature within 5 seconds and no water shall drip through the paper.

Fifty sheets of lens paper and fifty sheets of bibulous paper (filter paper) and two cover sheets shall be bound together to form a booklet. Sheets shall be rectangular with the following dimensions:

Length - 6 inches, +1/4, -1/8
Width - 4 inches, +1/4, -1/16

AMSC N/A FSC 6640

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

The booklet shall be bound to permit easy removal of individual sheets. One cover sheet shall be on the front and one cover shall be on the back of the booklet.

The sheets shall be so dimensioned and positioned as to form a symmetrical book.

Workmanship. The booklet shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Package (PG). One package containing twelve books, as specified, constitutes one unit.

QUALITY ASSURANCE PROVISIONS.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Sampling for examination. Sampling for examination shall be conducted in accordance with MIL-STD-105, with an AQL of 2.5 (percent defective) and an inspection level of S-II. The unit of product for examination purposes shall be one booklet.

Sampling for tests. Sampling for tests (dimensional), shall be conducted in accordance with MIL-STD-105, with an AQL of 1.0 (percent defective) and an inspection level of S-1. The unit of product for test purposes shall be one booklet.

Tests. Tests shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics. Tests shall include, but shall not be limited to the following:

Basis weight. Basis weight shall be run in accordance with TAPPI Standard T410.

Absorption. 0.5 ml of water shall be added all at one time, in accordance with procedures in TAPPI Standard T432.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard No. 376, and all other requirements of this document are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Contractor Certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this Commercial Item Description, and that the product conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug, and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction , the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug, and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered material. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

Ordering data. Intermediate/exterior package quantities, labeling and marking must be specified in the contract and/or order.
