COMMERCIAL ITEM DESCRIPTION

PIN, BONE NAIL GUIDE (Kuntscher)

The General Services Administration has authorized the use of this commercial item description.

This commercial item description covers femoral guide pins suitable for use with straight Kuntscher cloverleaf nails during orthopedic surgical procedures.

Salient characteristics:

Style and design. Style and design shall be in accordance with ASTM Designation F339, for the following pin sizes:

SIZE	PIN DIAMETER		PIN LENGTH	
	Inches	(mm)	Inches	(mm)
1	7/64	(2.8)	20	(508)
2	9/64	(3.6)	22	(559)
3	3/16	(4.8)	24	(610)
4	7/32	(5.6)	26	(660)

Material. Guide pins shall be fabricated from material conforming to the composition specified in ASTM Designation F138, Grade 2. Grain size of the raw material shall be five or finer when tested in accordance with ASTM Designation E112.

Marking and surface preparation. Manufacturers name (or registered trademark) and manufacturers catalog number shall be marked on the fin of the pin. Description of surface characteristics, methods of surface preparation, and methods of marking shall be in accordance with ASTM Designation F86.

Finish. Guide pin shall have a mirror or satin finish.

Workmanship. Guide pins shall be free from burrs, cracks, scratches, slivers and other defects which detract from their appearance or impair its serviceability.

AMSC N/A FSC 6515

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

Resistance to corrosion. The guide pin shall show no evidence of corrosion when tested in accordance with ASTM Designation F1089.

Product Quality Level.

Visual and dimensional examination. Guide pins shall be examined to verify that design, construction and workmanship are in accordance with applicable requirements.

Materials. The supplier shall be responsible for performing tests to assure that materials are in accordance with requirements.

Unit. Each (EA). One guide pin, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means or physical and chemical properties) of the item.

Tests. Tests shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Check the source to verify that this is the current version before use.

Sampling for tests. Sampling for tests shall be conducted in accordance with MIL-STD-105. The acceptable quality level (AQL) shall be 1.0 for an Inspection level of S-2. The unit of product for test purposes shall be one pin.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard No. 376, and all other requirements of this document are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE: The following National Stock Numbers are covered by this document:

NSN	ITEM IDENTIFICATION

INSTRUCTIONS In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)* mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, too rigid, restrictive, loose, ambiguous or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
