COMMERCIAL ITEM DESCRIPTION

LAMP, INCANDESCENT
(SEALED BEAM, TRADE No. 6052)

The General Services Administration has authorized the use of this commercial item description.

This description covers a rectangular sealed beam headlight for a two-headlamp system, type 2B1.

Salient characteristics:

Rectangular bulb - 142 mm x 200 mm

Design volts - 12.8 volts for each filament

Watts - 65 watts for high beam, and 55 for low beam

Three (3) contact lugs

Filament designation - C6/C6

Average rated lab life, at 14 volts, in hours - 150 for upper beam, and 320 for low beam

Lower beam filament is shielded

The rectangular headlamp shall be in accordance with the Society of Automotive Engineers (SAE) Standard J1132 - 142 mm x 200 mm Sealed Beam Head Lamp Unit.

The issue of SAE Standard J1132 in effect on the date of solicitation shall be used to determine compliance with these requirements.

Workmanship. The lamp shall not have bent contacts, slight or complete discoloration of the lens or reflective coating, small bubbles in the glass, cracked glass, peeled reflective coating, and open or shorted filaments.

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. The preservation, packaging, packing, labeling, or marking shall be as specified in the contract or order.

NOTE: When this commercial item description is used for procurement, the commercial item certification clause must appear in the solicitation.

SAE Standard J1132 is available from the Society of Automotive Engineers, 400 Commonwealth Drive, Warrendale, PA 15096.

DoD has determined that no military activity has an official interest in this commercial item description.
