COMMERCIAL ITEM DESCRIPTION

SCOURING POWDER (WITH CHLORINE BLEACH)

The General Services Administration has authorized the use of this Commercial Item Description in lieu of Federal Specification P-S-311.

This Commercial Item Description covers scouring powder containing a chlorine bleaching agent.

Salient characteristics:

The scouring powder shall conform to ASTM D 2356 - Standard Specification for Scouring Powder Compounds, Type I - With Chlorine Bleaching Agent. The issue of ASTM D 2356 in effect on the date of the solicitation shall be used to determine compliance with this requirement.

When chlorinated trisodium phosphate is used as the bleaching agent, the scouring powder shall be packaged in commercial blow-molded plastic containers, or in fiber cans with two (an inner and an outer) vapor barriers.

NOTE: Purchasers should specify the size containers of scouring powder required.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, and that the product conforms to the producer's own drawings, specifications, standards and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to the first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Packaging, packing and marking. The scouring powder shall be packaged in accordance with normal commercial practice and packed in fiberboard boxes that will assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Shipping containers shall be marked as specified in the contract or order.
