MILITARY SPECIFICATION

FUZE, MINE, COMBINATION, M605
LOADING, ASSEMBLING AND PACKING

This Amendment forms a part of Military Specification MIL-F-12774D (PA) dated 22 May 1975 and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 16

Add paragraph 4.4.3.3.3 as follows:

"4.4.3.3.3 The sampling plan for fuze assembly lots containing reused head assemblies shall contain 200 samples and the lot shall be rejected if four (4) or more assemblies fail to meet the specified requirements. This is a destructive test and components of samples selected from the reworked assembly lots that are subjected to this test shall not be returned to the lot.

Add the following to paragraph 4.4.3.4.

"The sampling plan for fuze assembly lots containing reused head assemblies shall contain 125 samples and the lot shall be rejected if eleven (11) or more assemblies fail to meet the specified requirements. If more than seven (7), but less than eleven (11) assemblies fail to meet the specified requirements a second sample of 125 fuzes shall be selected and the lot shall be rejected if nineteen (19) or more assemblies, from the total of 250 samples selected, fail to meet the specified requirements. Components of samples selected from the reworked assembly lots that are subjected to this test shall not be returned to the lot.

Add paragraph 6.9 as follows:

"New fuze head assemblies may be removed from fuze assemblies that have been subjected to the functioning test of 4.5.3 and these head assemblies may be reused provided that the fuze assemblies containing reused head assemblies from no more than one lot interfix number are placed in one separate lot, and assigned a separate interfix number."
