MILITARY SPECIFICATION

WINTERIZATION KIT, FACEPIECE, CHEMICAL-BIOLOGICAL MASK, TANK, M3

This specification is approved for *use* by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 This specification covers a chemical-biological mask winterization kit (see 6.1).

2. APPLICABLE DOCUMENTS

2.1 Government documents. The following documents of the issue in effect on the date of invitation for bids or request for proposal form a part of this specification to the extent specified herein:

SPECIFICATIONS

MILITARY

MIL-O-51142 - Outsert, Eyelens Antiglare, Protective Mask, M2.

STANDARDS

FEDERAL

FED-STD-123 - Marking for Domestic Shipment (Civil Agencies).

MILITARY

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.

PL5-77-934 - Winterization Kit, Facepiece, Chemical-Biological Mask, Tank, M3.

(Copies of specifications, standards, drawings, and publications required by suppliers in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer, :

3. REQUIREMENTS

3.1 Materials. All materials shall conform to the applicable specification listed on Drawing PL5-77-934,

3.2 Components. The kit shall consist of three major components; the insulating jacket, the winterization outsert, and the M2 antiglare outsert. The M2 antiglare outsert shall meet the requirements of MIL-O-51142. All components shall conform to the applicable specifications and drawings lsited on Drawing PL5-77-934.

3.3 Stitching. All rows of stitching shall be regular lines free from loose stitches or thread loops, All stitching shall be of continuous thread, All seams shall be backstitched at the ends with two or three stitches, The drawcord must remain free from stitching.

3.4 Fastening devices. The fasteners and drawcord shall function smoothly and efficiently.

3.5 Weathering of lens. The lens shall show no visual discoloration when tested as specified in 4.4.4.1.

3.6 Preproduction. Prior to the start of regular production, a preproduction sample of kits shall be produced in accordance with this specification for examination and tests (see 4.3).

3.7 Workmanship. The kit shall be free from cracked, split, or crazed outsert lens; cuts, holes, tears, or abrasions in the materials, or foreign matter such as dirt, grease or oil.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection.

4.1.1 Supplier's responsibility. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to specified requirements.

4.1.2 Objective evidence. The supplier shall provide objective evidence acceptable to the contracting officer that the requirements of 3.1, 3.2 and section 5 for which specific inspection has not been provided in this specification have been satisfied.

4.2 Classification of inspections. The inspection requirements specified herein are classified as follows:

(a) Preproduction inspection (see 4.3)
(b) Quality conformance inspection (see 4.4)

4.3 Preproduction inspection.

4.3.1 Sample. A preproduction sample of 15 kits shall be manufactured using the same methods, materials, equipment and processes as will be used during regular production."

4.3.2 Examination. The 15 sample kits shall be examined in accordance with the classification of defects.

4.3.3 Tests, Three outsert lenses shall be tested as specified in 4.4.4.1.

4.3.4 Acceptance/rejection criteria. The preproduction sample shall meet the examination and tests specified in 4.3.2 and 4.3.3 to be acceptable. The supplier shall obtain written approval from the contracting officer before proceeding with regular production.

4.4 Quality conformance inspection.

4.4.1 Lotting. A lot shall consist of the winterization kits produced by one manufacturer, at one plant, from the same materials, under essentially the same manufacturing conditions and submitted for acceptance at one time.

Check the source to verify that this is the current version before use.

4.4.2 Sampling. Sampling shall be conducted in accordance with MIL-STD-105 .

4.4.3 Inspection. Sample winterization kits shall be inspected in accordante with the classification of defects and MIL-STD-105.

4.4.3.1 Classification of defects,

(a) Kit, winterization M3 (Dwg D5-77-935 and E5-77-939).

Categories		Defects
Critical:		None defined
Major:	AQL 1,0 percent defective	
101		Component missing or incorrectly assembled
102		Stitches, seams or stitching incorrect
103		Distance between snap-tabs (7-7/8 + 1/64 in flat position) incorrect
104		Drawcord not free from stitches
105		Fastening device nonfunctioning
106		Workmanship (3.7)
107		Cemented body inner rim not adhering to lens

4.4.4 Tests,

4.4.4.l Weathering. Three sample outsert lenses shall be subjected to weathering for 72 + 2 hours, using an Atlas Weather-Ometer, Model XW, that operates with the right cam only,

5* PREPARATION FOR DELIVERY

5.1 Packaging packing and marking, interplant shipment (see 6.3). The winterization kits shall be packaged and packed to provide adequate protection from physical damage from the supply source to the first receiving activity for immediate use or further processing. Shipping containers shall be in compliance with the rules and regulations applicable to the mode of transportation, Marking shall be in conformance with FED-STD-123 and shall include the contractors name, address, and contract number.

5.2 Repair Parts, When this item is being procured for storage and issue as a repair part, preservation, packaging, packing, and marking shall be as specified on the packaging data sheet which is identified by its National Stock Number.

6. NOTES

6.1 Intended use. The M3 kit is intended for use with tank chemical.-biological masks.

6.2 Ordering data. Procurement documents should specify the following:

(a) Title, number, and date of this specification.
(b) Applicable drawings.
(c) Preproduction:

(1) Time allowed for supplier submission of samples for Government test and evaluation after award of contract.
(2) Name and address of test facility and shipping instructions when testing is performed by the Government.
(3) Time required for the Government to notify the supplier whether or not to proceed with production.

6.3 Interplant Shipments. Packaging for supplies and materials which will not enter the military supply system, Typical interplant shipments are shipments from a vendor to a subcontractor or a prime contractor, or from a subcontractor to a prime contractor or from a vendor or contractor to a military arsenal or plant.

6.4 International interest, Certain provisions of this specification are the subject of international standardization agreement QSTAG-216. When amendment, revision, or cancellation of this specification is proposed which will affect or violate the international agreement concerned, the preparing activity will take appropriate reconciliation action through international standardization channels including departmental standardization offices, if required.

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

OMB Approval
No. 22-R255

INSTRUCTIONS: The purpose of this form is to solicit beneficial comments which will help achieve procurement of suitable products at reasonable cost and minimum delay, or will otherwise enhance use of the document. DoD contractors, government activities, or manufacturers/vendors who are prospective suppliers of the product are invited to submit comments to the government. Fold on lines on reverse side, staple in corner, and send to preparing activity. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements. Attach any pertinent data which may be of use in improving this document. If there are additional papers, attach to form and place both in an envelope addressed to preparing activity.
