MILITARY SPECIFICATION

HOOK, STEEL: BOLTED TANK ERECTION

This specification is approved for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 This specification covers a T-handled hook, 6 inches long.

2. APPLICABLE DOCUMENTS

2.1 The following documents of the issue in effect on date of invitation for bids or request for proposal form a part of this specification to the extent specified herein:

SPECIFICATIONS

Federal

QQ-S-630	- Steel, Bar, Carbon, Hot Rolled (Merchant Quality).
WW-P-406	- Pipe, Steel (Seamless and Welded) (For Ordinary Use).
PPP-P-40	- Packaging and Packing of Hand Tools.

Military

MIL-T-704	- Treatment and Painting of Materiel.

STANDARDS

Military

MIL-STD-105	- Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-130	- Identification Marking of US Military Property.

(Copies of specifications and standards, required by suppliers in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

3. REQUIREMENTS

3.1 Description. The hook shall be as shown in Figure 1, and as specified herein.

3.2 Material. Material shall be as specified herein. Materials not specified shall be selected by the supplier and shall be subject to all provisions of this specification.

3.3 T-Handle. The handle shall be fabricated from pipe conforming to WW-P-406, Weight A, Class 1, unthreaded. Figure 1 indicates two locations where welds are required. The method and dimensions of the welds shall be in accordance with the supplier's current standard welding practice.

3.4 Hook. The hook shall be made of steel conforming to QQ-S-630, 1020, and shall be free of scale.

3.5 Identification marking. The hook shall be identified in accordance with MIL-STD-130.

3.6 Treatment and painting. The hook shall be cleaned, treated, and painted in accordance with MIL-T-704, Type C.

3.7 Workmanship.

3.7.1 Metal fabrication. Metal used in fabrication shall be free from kinks and sharp bends. The straightening of material shall be done by methods that will not injure the material. Corners shall be square. Flame cutting, using tips suitable for the thickness of the steel, may be employed instead of shearing and sawing. All bends shall be made with controlled means to insure uniformity of size and shape. Precaution shall be taken to avoid overheating. Heated steel shall be allowed to cool slowly. External surfaces shall be free of burrs, sharp edges and corners.

3.7.2 Welding. The surfaces of parts to be welded shall be free from rust, scale, paint, grease, and other foreign matter. Parent materials, weld filler metals, and fabrication techniques shall be as required to enable the hook to conform to the examination requirements specified in Section 4. Unless otherwise specified (see 6.2), the welding process used in fabrication of the hook shall be at the option of the supplier.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.1.1 Material inspection. The supplier is responsible for insuring that materials used are manufactured and examined in accordance with referenced specifications and standards.

4.2 Classification of inspections. Inspections shall be classified as follows:

(a) Quality conformance inspection (see 4.3).
(b) Inspection of preparation for delivery (see 4.5).

4.3 Quality conformance inspection.

4.3.1 Sampling. Sampling for examination shall be in accordance with MIL-STD-105.

4.3.2 Examination.

4.3.2.1 Samples. Samples selected in accordance with 4.3.1 shall be examined for the major and minor defects specified in 4.4.1. The AQL shall be 0.4 percent defective for major defects and 10.0 percent defective for minor defects.

4.4 Inspection procedure.

4.4.1 Examination. The hook shall be examined as specified herein for the following defects:

Major

101. Hook not as shown in Figure 1.
102. Material not as specified.
103. Workmanship not as specified.

Minor

201. Identification marking missing, incomplete, or illegible.
202. Finish not as specified.

4.5 Inspection of preparation for delivery. The preservation, packaging, packing, and marking shall be examined to determine compliance with the Quality Assurance Provisions of PPP-P-40.

5. PREPARATION FOR DELIVERY

5.1 Preservation, packaging, packing, and marking. Each hook shall be preserved, packaged, packed, and marked in accordance with PPP-P-40. The level of preservation and packaging shall be Level A, B, or C and the level of packing shall be Level A, B, or C as specified (see 6.2).

6. NOTES

6.1 Intended use. The hook is intended to be used for hand-carrying steel sheets in the erection of bolted steel storage tanks. NSN 5120-00-566-0618 which is used in Equipment Sets 5180-97-CL-E01 and 5180-97-CL-E03 applies thereto. This specification is intended to replace CE PD-311, dated 2 June 1953.

6.2 Ordering data. Procurement documents should specify the following:

(a) Title, number, and date of this specification.
(b) When welding process shall be other than at the option of the supplier (see 3.7.2).
(c) Level of preservation and packaging and level of packing required (see 5.1).

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

OMB Approval
No. 22-R255

INSTRUCTIONS: The purpose of this form is to solicit beneficial comments which will help achieve procurement of suitable products at reasonable cost and minimum delay, or will otherwise enhance use of the document. DoD contractors, government activities, or manufacturers/vendors who are prospective suppliers of the product are invited to submit comments to the government. Fold on lines on reverse side, staple in corner, and send to preparing activity. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements. Attach any pertinent data which may be of use in improving this document. If there are additional papers, attach to form and place both in an envelope addressed to preparing activity.
