MILITARY SPECIFICATION

CUTTER SET, COOKIE

This specification is mandatory for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

* 1.1 This specification covers one type of round cookie cutter set.

2. APPLICABLE DOCUMENTS

* 2.1 The following documents, of the issue in effect on date of invitation for bids or request for proposal, form a part of this specification to the extent specified herein:

SPECIFICATIONS

FEDERAL

L-P-378	-	Plastic Sheet and Strip (Polyolefin).
PPP-B-566	-	Boxes, Folding, Paperboard.
PPP-B-636	-	Box, Fiberboard.
PPP-B-676	-	Boxes, Setup.
PPP-F-320	-	Fiberboard; Corrugated and Solid Sheet Stock (Container Grade), and Cut Shapes.

STANDARDS

MILITARY

MIL-STD-105	-	Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129	-	Marking for Shipment and Storage.
MIL-STD-147	-	Palletized and Containerized Unit Loads, 40" x 48" Pallets, Skids, Runners, or Pallet-Type Base.

FSC 7330

(Copies of specifications and standards required by suppliers in connection with specific procurement functions should be obtained from the procuring agency or as directed by the contracting officer.)

* 2.2 Other publications.- The following documents form a part of this specification to the extent specified herein. Unless otherwise indicated, the issue in effect on date of invitation for bids or request for proposal shall apply.

NATIONAL SANITATION FOUNDATION (NSF)

Basic Criteria C-2-Evaluation of Special Equipment and/or Devices.

Listing of Food Service Equipment

(Application for copies should be addressed to the National Sanitation Foundation, P.O. Box 1468, Ann Arbor, Michigan 48106.)

AMERICAN SOCIETY FOR TESTING AND MATERIALS (ASTM)

Specification A 167-63-Corrosion-Resisting Chromium-Nickel Steel Plate, Sheet, and Strip

(Application for copies should be addressed to the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pennsylvania 19103.)

(Technical society and technical association specifications and standards are generally available for reference from libraries. They are also distributed among technical groups and using Federal agencies.)

3. REQUIREMENTS

3.1 First article.- When specified (see 6.2), before production is commenced, a sample cookie cutter set covered by this specification shall be submitted or made available to the contracting officer or his authorized representative for approval in accordance with 4.2. The approval of the preproduction sample authorizes the commencement of production, but does not relieve the supplier of the responsibility for compliance with all applicable provisions of this specification. The preproduction sample shall be manufactured in the same facilities to be used for the manufacture of the production items.

3.2 Standard product.- The cookie cutter set delivered under this specification shall be the manufacturer's commercial product except for any changes necessary to meet specification requirements.

Source: https://assist.dla.mil -- Downloaded: 2026-10-18T10:14Z
Check the source to verify that this is the current version before use.

3.3 NSF Certification.- The supplier shall submit satisfactory evidence to the contracting officer or his authorized representative that the cookie cutter set he proposes to furnish under this specification meets the applicable requirements of NSF Basic Criteria C-2 as follows:

(1) Listing in the current edition of the NSF Listing of Food Service Equipment or display of the NSF seal on the finished cookie cutter set shall be submitted prior to approval of the preproduction sample, if one is submitted, or prior to approval of the first shipment or,

(2) A certified test report from a recognized independent testing laboratory acceptable to the medical department of the service for which the cookie cutter sets are being procured indicating that the cookie cutter sets have been tested and conform to NSF Basic Criteria C-2 shall be submitted prior to the approval of the preproduction sample, if one is submitted, or prior to commencing production.

3.4 Materials.- Materials not definitely specified shall be of the quality normally used for the purpose by the manufacturer.

* 3.4.1 Corrosion-resisting steel sheet.- Corrosion-resisting steel sheets shall conform to the chemical composition of any type in the 300 series as specified in ASTM A 167-63.

3.5 Construction.-

3.5.1 Body.- The cookie cutters shall be fabricated of the corrosion-resisting steel specified in 3.4.1 and shall have a nominal height of 1-1/4 inches. The cutting edge shall be sharp and smooth and the top edge shall be rolled.

3.5.2 Shape and sizes.- The cutter set shall consist of three circular cutters with nominal diameters of 2, 2-1/2, and 3 inches.

3.5.3 Handle.- A handle, made of the material specified in 3.4.1, shall be welded to the body.

* 3.6 Finish.- All surfaces of the finished cookie cutter set shall conform to NSF Basic Criteria C-2.

3.7 Marking for identification.- Each cookie cutter shall be marked for identification in accordance with the manufacturer's standard practice. If the identification marking is stamped, the surface opposite the marking shall show no signs of penetration or uneveness.

* 3.8 Workmanship.- The cookie cutter sets shall not be fractured, split, punctured, dented, bowed, malformed, or show any signs of deterioration. Welds shall be sound, and free from pits and flashes. There shall be no slivers, burrs, or sharp edges.

Check the source to verify that this is the current version before use.

4. QUALITY ASSURANCE PROVISIONS

* 4.1 Responsibility for inspection.- Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.2 First article inspection.- When a preproduction sample is required, it shall be examined for visual defects listed in table I and dimensions specified herein.

4.3 Inspection.- Sampling for inspection shall be performed in accordance with MIL-STD-105, except where otherwise indicated hereinafter.

* 4.3.1 Component and material inspection.- In accordance with 4.1 above, components and materials shall be inspected and tested in accordance with all the requirements of referenced specifications, drawings, and standards unless otherwise excluded, amended, modified, or qualified in this specification or applicable purchase document.

4.3.2 End item inspection.- The inspection lot shall consist of all cookie cutter sets offered for inspection at one time. The sample unit shall be one completely fabricated cookie cutter set.

4.3.2.1 Visual examination.- Examination shall be made of representative samples of the cookie cutter set in accordance with classification of defects listed in table I. The inspection level shall be II with an acceptable quality level (AQL) of 2.5 for major defects and 6.5 for total defects, expressed in terms of defects per hundred units.

TABLE I.- Classification of visual defects

Examine	Defect	Classification Major	Minor
Construction and workmanship (general)	Fractured, split, punctured, dented, deteriorated, bowed, malformed.	X	
	Burrs, slivers, or rough or sharp edges.	X	
	Handle missing.	X	
	Welds broken; not complete; not secure.	X	

Source: https://assist.dla.mil -- Downloaded: 2026-10-18T10:14Z
Check the source to verify that this is the current version before use.

TABLE I.- Classification of visual defects (cont'd)

Examine	Defect	Classification Major	Minor
Construction and workmanship (general) (cont'd)	Evidence of pits or flashes in welds.		X
	Area of rust.	X	
	Part of set missing.	X	
	Scale, grease, or other foreign matter.		X
Cutter edge	Not sharp and smooth.	X	
Cutter body	Top edge not rolled.	X	
Marking for identification	Missing; illegible; incorrect.		X
	Not manufacturer's standard marking.		X
	Sign of penetration or unevenness on opposite side of marking.		X

4.3.2.2 Dimensional examination.- Examination shall be made of representative samples of the completed cookie cutter set to determine compliance with dimensional requirements. Any noncompliance with specified requirements shall be classified a defect. The inspection level shall be S-2 with an AQL of 4.0 defects, expressed in terms of defects per hundred units.

4.3.3 Examination of preparation for delivery.- An examination shall be made to determine that packaging, packing, and marking as required by section 5 of this specification are complied with. Defects shall be scored as specified in table II. The inspection level shall be S-2 with an AQL of 2.5 defects, expressed in terms of defects per hundred units. The sample unit shall be one shipping container fully prepared for delivery. The lot shall consist of all shipping containers offered for inspection at one time.

TABLE II.- Examination of preparation for delivery

Examine	Defect
Markings (exterior and interior)	Omitted; incorrect; illegible; of improper size, location, sequence, or method of application.
Materials	Component missing, damaged, or otherwise defective.
Workmanship	Seams and closure of polyethylene bag not closed. Excess air not expelled prior to heat sealing.
Content (exterior and interior)	Number per container is more or less than required

Source: https://assist.dla.mil -- Downloaded: 2026-10-18T10:14Z
Check the source to verify that this is the current version before use.

* 4.3.3.1 Examination of shipping containers.- When shipping containers are required to be in accordance with PPP-B-636, examination for defects in closure, waterproofing, and strapping shall be in accordance with PPP-B-636.

* 5. PREPARATION FOR DELIVERY

* 5.1 Packaging.- Packaging shall be level A or C as specified (see 6.2).

* 5.1.1 Level A.-

* 5.1.1.1 Unit packaging.- Each cookie cutter set shall be packaged in a polyethylene bag. The minimum thickness of the polyethylene film shall be 0.002-inch conforming to type I, grade A, B, or C, finish 1 or 2 of L-P-378. All seams and closures shall be effected by heat sealing. Excess air shall be expelled prior to the final closure.

* 5.1.1.2 Intermediate packaging.- Twelve cookie cutter sets, unit packaged as specified in 5.1.1.1, shall be packaged in the most compact manner in a folding or setup paperboard box conforming to variety 1, style IV, type B, class a of PPP-B-566 or type I, variety 1, class A, style 3 or 4 of PPP-B-676, respectively. Box closure shall be in accordance with the appendix of the applicable box specification.

* 5.1.2 Level C.- Cookie cutter sets shall be packaged to afford adequate protection against damage during shipment from the supply source to the first receiving activity. The supplier may use his standard practice when it meets this requirement.

* 5.2 Packing.- Packing shall be level A, B, or C as specified (see 6.2).

* 5.2.1 Level A.- Seventy-two cookie cutter sets, packaged as specified in 5.1, shall be packed in a snug-fitting fiberboard shipping container conforming to style RSC, V2s of PPP-B-636. Each shipping container shall be closed, waterproofed by means of tape, and reinforced with flat strapping or tape banding in accordance with the appendix of PPP-B-636.

* 5.2.2 Level B.- Seventy-two cookie cutter sets, packaged as specified in 5.1, shall be packed in a snug-fitting fiberboard shipping container conforming to style RSC, type CF, variety SW, or type SF, class domestic of PPP-B-636. Closure shall be in accordance with method II of the appendix of PPP-B-636.

* 5.2.2.1 When specified (see 6.2), the shipping container shall be V3c or V3s, fabricated and closed in accordance with PPP-B-636. The shipping container material may also be grade V4s of PPP-F-320.

Source: https://assist.dla.mil -- Downloaded: 2026-10-18T10:14Z
Check the source to verify that this is the current version before use.

* 5.2.3 Level C.- Cookie cutter sets, packaged as specified in 5.1, shall be packed in a manner to insure carrier acceptance and safe delivery at destination at the lowest transportation rate for such supplies. Containers shall be in accordance with rules or regulations of carriers applicable to the mode of transportation.

* 5.3 Palletization.- Unless otherwise specified (see 6.2) cookie cutter sets, packed as specified, shall be palletized in accordance with load type I of MIL-STD-147. Each prepared load shall be bonded with primary and secondary straps in accordance with bonding means K and L. Pallet patterns shall be in accordance with the appendix of MIL-STD-147. Interlocking of loads shall be effected by reversing the pattern of each course. If the container is of a size which does not conform to any of the pallet patterns specified in MIL-STD-147, the pallet pattern used shall be approved by the contracting officer.

* 5.4 Marking.- In addition to any special marking required by the contract or order, interior packages and shipping containers shall be marked in accordance with MIL-STD-129.

6. NOTES

6.1 Intended use.- The cookie cutter set covered by this specification is intended for use in fixed messes, field kitchens, and galleys for the preparation of different sizes of cookies.

6.2 Ordering data.- Procurement documents should specify the following:

(a) Title, number, and date of this specification.
(b) First article.- Whether preproduction sample is required (see 3.1).
(c) Selection of applicable levels of packaging and packing (see 5.1 and 5.2)
(d) When weather-resistant grade fiberboard shipping containers are required for level B packing (see 5.2.2.1).
(e) When palletization is not required (see 5.3).

* 6.3 The margins of this specification are marked with an asterisk (*) to indicate where changes (additions, modifications, corrections, deletions)from the previous issue were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and suppliers are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous issue.

SPECIFICATION ANALYSIS SHEET

Form Approved
Budget Bureau No. 119-R004

INSTRUCTIONS

This sheet is to be filled out by personnel either Government or contractor, involved in the use of the specification in procurement of products for ultimate use by the Department of Defense. *This sheet is provided for obtaining information on the use of this specification which will insure that suitable products can be procured with a minimum amount of delay and at the least cost.* Comments and the return of this form will be appreciated. Fold on lines on reverse side, staple in corner, and send to preparing activity.
