20 January 1988

MILITARY SPECIFICATION

TROUSERS, MEN'S: POLYESTER/WOOL

This specification is approved for use by all departments and agencies of the Department of Defense.

1. SCOPE

1.1 Scope. This specification covers the requirements for men's polyester/wool trousers.

1.2 Classification. The trousers shall be of one type, in the following classes and sizes as specified (see 6.2):

Class 1 - Polyester/Wool Gabardine, Shade 2212
Class 2 - Polyester/Wool Gabardine, Shade 2319

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Defense Personnel Support Center, Clothing and Textiles Directorate, Attn: DPSC-FSSD, 2800 South 20th Street, Philadelphia, PA 19101-8419, by using the Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

AMSC N/A FSC 8405

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Schedule of Sizes	
Waist Sizes	26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46
Lengths	X-Short, Short, Regular, Long, X-Long

2. APPLICABLE DOCUMENTS

2.1 Government documents

2.1.1 Specifications, standards, and handbooks. The following specifications, standards, and handbooks form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents shall be those listed in the issue of the Department of Defense Index of Specifications and Standards (DODISS) and supplement thereto, cited in the solicitation (see 6.2).

SPECIFICATIONS

FEDERAL

A-A-50186	- Cloth, Buckram, Woven and Nonwoven
A-A-50198	- Thread, Gimp, Cotton, Buttonhole
A-A-50199	- Thread, Polyester Core: Cotton- or Polyester-Covered
A-A-52094	- Thread, Cotton
A-A-52106	- Cloth, Twill or Plain Weave, Polyester or Polyester Blend
V-B-871	- Button, Sewing Hole, and Button, Staple (Plastic)
V-F-106	- Fasteners, Slide, Interlocking
V-T-295	- Thread, Nylon
NN-P-71	- Pallet, Material Handling, Wood, Stringer Construction, 2 Way and 4 Way (Partial)
UU-P-268	- Paper, Kraft, Wrapping
DDD-L-20	- Label, For Clothing, Equipage, and Tentage, (General Use)

MILITARY

MIL-C-10176	- Cloth, Gabardine: Wool, Polyester and Wool
MIL-P-15011	- Pallet, Material Handling, Wood, Post Construction, 4 Way Entry
MIL-B-17757	- Box, Shipping, Fiberboard (Modular Sizes)

(Non-Government standards and other publications are normally available from the organizations that prepare or distribute the documents. These documents also may be available in or through libraries or other informational services.)

2.3 Order of precedence. In the event of a conflict between the text of this document and the references cited herein, the text of this document takes precedence. Nothing in this document however, supersedes applicable laws and regulations unless a specific exemption has been obtained.

3. REQUIREMENTS

3.1 Guide sample. Samples, when furnished, are solely for guidance and information to the contractor (see 6.2). Variations from this specification may appear in the sample, in which case this specification shall govern.

3.2 First article. When specified, (see 6.2), a sample shall be subjected to first article inspection, in accordance with 4.4 and 6.4.

3.3 Materials

3 3.1 Basic material. The basic material for each class of trousers shall be as follows:

a. Class 1. Cloth, 10.6 ounce, polyester/wool gabardine, green, shade 2212 conforming to type II, class 12, of MIL-C-10176.

b. Class 2. Cloth, 10.6 ounce, polyester/wool gabardine, sky blue, shade 2319 conforming to type II, class 12 of MIL-C-10176.

3.3.1.1 Recycled materials. It is encouraged that recycled materials be used when practical as long as the materials meet the requirements of this specification.

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T23:13Z
Check the source to verify that this is the current version before use.

3.3.2 Lining, interlining and pocketing

3.3.2.1 Lining and interlining. The material for lining the waistband, right fly, pocket flaps, crotch, left fly interlining, and pocket stay shall be black polyester, polyester and cotton, or polyester and rayon cloth conforming to class 1 of A-A-52106.

3.3.2.2 Pocketing. The pocketing material shall be black polyester, polyester and cotton, or polyester and rayon cloth conforming to class 1 of A-A-52106.

3.3.3 Buckram. The material for interlining waistband shall be bleached or unbleached cloth, cotton, buckram conforming to type II of A-A-50186.

3.3.4 Waistband stabilizer. The material for the waistband stabilizer shall be cloth, interlining, cotton or synthetic and nylon conforming to type 1 of MIL-C-43920.

3.3.5 Slide fastener. The slide fastener for each class of trousers shall be type I, style 1, cam lock, size LS, short tab pull, brass chain, conforming to V-F-106, except the salt spray test shall not apply. A staple bottom stop is required. All components of the slide fastener shall be brass and from the same supplier (see 4.5.1). The tape shall be cotton, synthetic, or a combination.

3.3.5.1 Color. The color of the slide fastener tape shall be as follows:

Class 1 - Green Shade AF, Cable No. 66531
Class 2 - Blue Shade AA, Cable No. 66527

3.3.5.2 Colorfastness. The dyed slide fastener tape shall show colorfastness to wet dry-cleaning equal to or better than the standard sample when tested as specified to V-F-106. When no standard sample is available, the tape shall show "good" colorfastness when tested as specified in V-F-106.

3.3.6 Hook and eye. The hook and eye shall be North and Judd (Hook Flex H-49, K-50, H-89 and E-90); Universal Button Co. (Talon #3, #7, and #8 hook with #8 eye or #85 eye); Akim Co. or Patwin, Inc., Junior Series, type JB; Stimpson (P-536, D-4086, D-4457, D-4288); Rau (OA50, OX 1256, 080415); Patwin, Inc. (Slim-Slak with MB eye, and Slik-Slak) or equal. The finish shall be nickel plate. Prior to use of an "or equal" item, the supplier shall submit the item with supporting data to the contracting officer for approval (see 4.5.1).

Check the source to verify that this is the current version before use.

3.3.7 Thread. Cotton thread shall be used conforming to A-A-52094 as follows:

Operation	Type	Ticket No.	Ply
Outside Stitching, bar-tacks, buttonholes and ornamental strip	III	0	3
Seaming and stitching	I	30, 50	3
	I	70	2
Automatic machine pocket construction	III	A	3
Inside Stitching	I	50	3
		70	2
Button Sewing	II	16, 24	4

As an alternate to the cotton thread, a polyester, cotton-covered thread conforming to A-A-50199, ticket No. 50, 2 ply or ticket No. 70, 2 ply may be used for all sewing operations.

3.3.7.1 Automatic button sewing. If an automatic machine which sews and shanks (wraps) the buttons in one operation is used, the thread shall be waxed nylon monocord special No. 5, having a minimum breaking strength of 16 pounds and a minimum length per pound of 2150 yards. This thread shall be tested for these requirements and for colorfastness (see 3.3.7.3) in accordance with the test methods in V-T-295.

3.3.7.2 Color. The color of the thread for each class of trousers shall conform to the following:

Class 1 - Olive Drab T-1, Cable No. 66023
Class 2 - Navy Blue AT, Cable No. 66060

NOTE: See DOD Standard Color Card of Official Standardized Shades for Sewing Threads

3.3.7.3 Colorfastness. The colored thread shall show fastness to light and wet dry-cleaning equal to or better than the standard sample. When no standard sample is available, the colored thread shall show "good" fastness to light and wet dry-cleaning.

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T23:13Z
Check the source to verify that this is the current version before use.

3.3.8 Gimp. The gimp for reinforcing buttonholes shall be cotton, No. 8, conforming to type I or II of A-A-50198.

3.3.8.1 Color. The color requirements for the gimp for each class of trousers, shall be the same as specified in 3.3.7.2 for the thread.

3.3.8.2 Colorfastness. The colored gimp shall show fastness to wet dry-cleaning equal to or better than the standard sample. When no standard sample is available, the colored gimp shall show "good" fastness to wet dry-cleaning.

3.3.9 Buttons. The buttons for the hip pocket and fly-tab closure shall conform to type II, class D, style 4, 22-line, glossy finish, of V-B-871. The color of the buttons for each class of trousers shall be as follows (see DOD Standard Shades for Buttons):

Class 1 - Green, Shade AF, Cable No. 62017
Class 2 - Blue, Shade BV, Cable No. 62003

3.3.10 Labels. Each pair of trousers shall have a combination identification-size-instruction label. The combination label shall conform to type VI, class 14 of DDD-L-20. The label shall conform to the colorfastness and writing test requirements of DDD-L-20. The content (inscription) and format of the combination label shall be as follows:

Trousers, Men's, Tropical (Example)
Fiber Content: 55% Polyester/45% Wool (Example)
Size: 38R (Example)
NSN: 8405-00-000-0000 (Example)
Name of Contractor:
Contract Number: DLA 100-00-0-0000 (Example)
DRY CLEAN ONLY

3.3.11 Label/tag. Each item shall be individually bar- coded with the type VIII, class 17 label/tag of DDD-L-20. This label/tag shall be located so that it is completely visible on the item when it is folded and/or packaged as specified and so that it causes no damage to the garment.

3.4 Design. The trousers shall be the US Marine Corps design as shown on Figure 1 having a two-piece, lined waistband with hook and eye closure and outlet at seat seam; french type fly with slide fastener; 7 belt loops for sizes up to and including size 37 and 8 belt loops for sizes 38 and up; straight side pockets; hip pockets with pocket flaps to button; outlet from crotch to knee at inseam and unfinished leg bottom.

Check the source to verify that this is the current version before use.

3.5 Patterns. Standard patterns to be used to cut working patterns will be furnished by the Government (see 6.3). The working patterns shall be identical to the Government patterns. Neither the Government patterns nor the working patterns shall be altered in any way, except that additional notches for use during construction are allowed on the working patterns. Also, minor modifications are permitted where necessary when using automatic equipment. These modifications shall not alter the dimensional, serviceability or appearance requirements cited in the specification. The standard patterns provide an allowance of 1/4 inch for pocket flaps, and a 3/8 inch seam allowance for all other seams except seat seams and inseam of back part; 7/8 inch has been added to the seat seam allowances (total 1-1/4 inches at top) to allow for tapering the seat outlet and 3/4 inch has been added to the inseam of back part (total 1-1/8 inches at top) to allow for tapering the inseam outlet of back parts. Unless otherwise indicated in Table I, seams shall be in accordance with these seam allowances.

3.5.1 Pattern parts. The component parts of the trousers shall be cut from the materials specified herein in accordance with the number of pattern parts indicated below, except belt loops and waistband lining/interlining. (See Table I, operation 1, for cutting requirements for these components).

Item	Pattern Nomenclature	No. of cut parts
	Material: Basic	
1.	Front	2
2.	Back	2
3.	Right fly	1
	Fly tab (alternate) 1/	2
4.	Left fly	1
5.	Side pocket wide facing (bearer)	2
6.	Side pocket narrow facing	2
7.	Hip pocket bearer	4
8.	2/ Hip pocket flap (classes 1 and 2)	2
9.	Waistband	2
	Material: Lining/interlining	
10.	Right fly lining	1
11.	Crotch lining	2
12.	Side pocket stay	2
13.	Left fly interlining	1
14.	Hip pocket flap lining (classes 1 and 2)	2

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T23:13Z
Check the source to verify that this is the current version before use.

Item	Pattern Nomenclature	No. of cut parts
	Material: Pocketing	
15.	Side pocket	2
16.	Hip pocket	2

1/ When the fly tab is used, eliminate the right fly with integrated fly tab and cut right fly from same pattern as the left fly.

2/ When the flaps are self-lined, cut 4.

3.6. Stitches, seams, and stitchings. Stitch, seam and stitching types specified in Table I shall conform to FED-STD-751. Whenever two or more methods for seam or stitch types are given for the same part of the operation, any one of them may be used. Where stitch type 401 is used, the looper (under thread) shall be on the inside of the trousers. Seam allowances shall be maintained with seams sewn so that no raw edges, runoffs, twists, pleats, puckers or open seams will result. Buttonholes shall be clean cut and the stitching shall be securely caught in the fabric.

3.6.1 Stitches per inch. The minimum and maximum number of stitches per inch shall be as specified in Table I.

3.6.2 Thread breaks and ends of seam. The ends of all seams and stitching, when not caught in other seams and stitching, shall be bartacked not less than 1/4 inch. The ends of a continuous line of stitching (except labels) shall be overlapped not less than 1/2 inch. The ends of the label stitching shall be overlapped not less than three stitches. Thread breaks (all stitch types) shall be secured by stitching back of the break not less than 1/2 inch. Skipped stitches or thread breaks on 401 seaming may be repaired using 301 stitch type. Bartacks shall not be more than 1/16 inch wide.

3.6.2 Buttonholes. Buttonholes shall be the eyelet-end, taper-bar type, well-worked-over gimp with the end securely tacked. The finished cut length shall be 5/8 inch. The bar at the end of the buttonhole shall have a minimum of four tacks, not including the first cross-overstitch.

3.6.3 Pressing. Pressing as required in Table I shall be done with a heated pressing iron or machine.

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T23:13Z
Check the source to verify that this is the current version before use.

3.6.4 Marking. The component parts shall be marked to ensure a uniform shade and size throughout the trousers Any method of shade marking may be used except:

(a) Corrosive metal fastening devices.
(b) Sew-on shade tickets.
(c) Adhesive type tickets, which leave traces of paper or adhesive on material after removal of the tickets.

3.7 Manufacturing operations requirements. The trousers shall be manufactured in accordance with operation requirements specified in Table I. The contractor is not required to follow the exact sequence of operations provided the finished trousers are identical to those produced by following the sequence as listed in Table I. Minor modifications are permitted where necessary when using automatic equipment. Any additional basting or holding the stitching used to facilitate manufacture is permissible provided that the thread is removed or does not show on the finished trousers. These modifications shall not alter the dimensional, serviceability or appearance requirements cited in the specification.

3.7.1 Abbreviations in Table of Operations. The abbreviations used in Table I are as follows:

Stch	-	Stitch
In	-	Inch
Ndl	-	Needle
Bob	-	Bobbin
Lpr	-	Looper
Mchne	-	Machine
Brtck	-	Bartack
Comrcl	-	Commercial
Smlr	-	Similar
Btn	-	Button
Btnhl	-	Buttonhole
Incl	-	Including
Dbl	-	Double

TABLE I - TABLE OF OPERATIONS

NO.	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH IN	THREAD NDL BOB/ LPR
1.	Cutting. a. Cut the trousers in strict accordance with the patterns furnished by the Government. b. Cut the material in the direction indicated by directional lines on the patterns. Lay fronts and backs so that the directional lines are in the warp direction. The directional lines may not deviate from the warp direction by more than 1 inch on both fronts and backs. Measurements shall be taken from the top and the bottom of the directional line on patterns to the selvage edge of the fabric and the difference between the two measurements shall not exceed the tolerance specified.

NO.	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH IN	THREAD NDL BOB/ LPR
1.	Cutting. (cont'd.) c. Cut all component parts for the trousers from the same piece of basic material to ensure a uniform shade throughout the trousers. The following parts may be cut from ends: belt loops, pocket bearers and facings. When cut from ends, the parts shall harmonize with the shade of the trousers. d. Cut the pockets on the straight of the material in accordance with patterns. Cutting of the pockets in the direction of the filling is not permitted except when it is essential for economical use of the material. e. Cut stripping for the belt loops of sufficient width to comply with the requirements of operation 11. f. Cut the right fly lining in accordance with the directional lines on the pattern.

2.	Replacement of damaged parts. a. At time of cutting, replace any part containing damages such as holes or seriously weakening defects such as smashes, multiple floats and slubs, likely to develop into holes, as classified in MIL-STD-1488. b. Replace any part damaged during the manufacturing process by needle chews which may be expected to develop into holes, scissors or knife cuts, tears, holes, mends, burns and large exposed drill holes.				
3.	Shade markings. Mark or ticket the component parts to ensure a uniform shade and proper assembly throughout the trousers, except those parts specified in operation 1c. which may be cut from the end and need not match each other. Tickets shall conform to 3.6.4.

1/ Measurements in inches.

2/ Twice the measurement taken across the top edge of the waistband from folded edge to folded edge.

3/ Twice the measurement across the trousers, 1 inch above fly bartack, from folded edge to folded edge.

4/ The location of knee measurements shall be 12-1/2 inches below the crotch seam for X-shorts, 13-1/2 inches for shorts, 14-1/2 inches for regulars, 15-1/2 inches for longs and 16-1/2 inches for X-longs.

5/ Measure along (unhemmed) bottom edge of leg from folded edge to folded edge.

6/ Measure along inseam from the crotch seam to unhemmed bottom edge. (An allowance of 3 inches for hems is included in the inseam length.

3.9 Workmanship. The finished trousers shall conform to the quality and grade of product established by this specification. The occurrence of defects shall not exceed the applicable point value or defect limit.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements (examinations and tests) as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to ensure supplies and services conform to prescribed requirements.

4.1.1 Responsibility for compliance. All items shall meet all requirements of sections 3 and 5. The inspection set forth in this specification shall become a part of the contractor's overall inspection system or quality program. The absence of any inspection requirements in the specification shall not relieve the contractor of the responsibility of ensuring that all products or supplies submitted to the Government for acceptance comply with all requirements of the contract. Sampling inspection, as part of manufacturing operations, is an acceptable practice to ascertain conformance to requirements, however, this does not authorize submission of known defective material, either indicated or actual, nor does it commit the Government to accept defective material.

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T23:13Z
Check the source to verify that this is the current version before use.

4.1.2 Certificate of compliance. Where certificates of compliance are submitted, the Government reserves the right to check test such items to determine the validity of the certification.

4.2 Classification of inspection. The inspection requirements specified herein are classified as follows:

1. First article inspection (see 4.4).
2. Quality conformance inspection (see 4.5).

4.3 Inspection conditions. Unless otherwise specified, all inspections shall be performed in accordance with the test conditions specified in MIL-STD-1488.

4.4 First article inspection. When the first article is required, inspection shall be made of completely fabricated trousers for all provisions of the specification.

4.5 Quality conformance inspection. Sampling for inspection shall be performed in accordance with MIL-STD-1488.

4.5.1 Component and material inspection. In accordance with 4.1 above, components and materials shall be tested in accordance with all the requirements of referenced specifications, drawings, and standards unless otherwise excluded, amended, modified, or qualified in this specification or applicable procurement documents. The contractor shall furnished a certificate of compliance stating that the hooks and eyes are one of the specified types, or, if an "equal" type is used, that it conforms in all respects to that approved by the contracting officer as required in 3.3.6. In addition, the requirement that all components of the slide fastener have been furnished by one supplier shall be accepted on a certificate of compliance (3.3.5).

4.5.2 Examination of the end item. Samplings and examination of the end item shall be performed for dress (D) trousers in accordance with MIL-STD-1488. In addition, the bar-coded label/tag shall be examined for the following defects:

Bar code label:

Missing, or not readable by scanner
HRI (Human-readable interpretation)
omitted or illegible
Not visible on folded, packaged item
Causes damage to the item

4.5.3 Dimensional examination. The dimensional examination provisions for the finished trousers shall be as listed in 3.7 and as specified in MIL-STD-1488.

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T23:13Z
Check the source to verify that this is the current version before use.

4.5.4 Examination of packaging requirements. An examination shall be made to determine that packaging, packing, and marking comply with Section 5 requirements of this specification. Defects shall be scored in accordance with the list below. The sample unit shall be one shipping container fully prepared for delivery. Defects of closure listed below shall be examined on shipping containers fully prepared for delivery. The lot size shall be on the number of shipping containers in the end item inspection lot.

Examine	Defect
Marking (exterior and interior)	Omitted, incorrect, illegible, of improper size, location, sequence, or method of application.
Materials	Any component missing, damaged, or not as specified.
Workmanship	Inadequate, application of components, such as: incomplete closure of container flaps, loose strapping, improper taping, inadequate stapling bulged or distorted container.
Content	Number of items per shipping container is more or less than required. Size shown on one or more items not as specified on shipping container. 1/

1/ For this defect, one item from each shipping container in sample shall be examined.

4.5.4 Palletization examination. An examination shall be made to determine that palletization complies with the section 5 requirements. Defects shall be scored in accordance with the list below. The sample unit shall be one palletized unit load fully packaged. The lot size shall be the number of palletized unit loads in the end item inspected lot.

Examine	Defect
Finished dimensions	Length, width, or height exceeds specified maximum requirements.

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T23:13Z
Check the source to verify that this is the current version before use.

Examine	Defect
Palletization	Pallet pattern not as specified. Interlocking of loads not as specified. Load not bonded with required straps as specified.
Weight	Exceeds maximum load limits.
Marking	Omitted, incorrect, illegible, of improper size, location, sequence, or method of application.

5. PACKAGING

5.1 Packaging. Packaging shall be level A or commercial as specified (see 6.2).

5.1.1 Level A. Each pair of trousers shall be folded so that the length dimension is approximately 23 inches.

5.1.2 Commercial. Trousers shall be packaged to afford adequate protection against physical damage during shipment from the supply source to the first receiving activity. The package and the quantity per package shall be the same as those normally used by the contractor for retail distribution.

5.2 Packing. Packing shall be level A, B or commercial as specified (see 6.2).

5.2.1 Level A packing. Thirty-five pair of trousers of one size and class only, packaged as specified in 5.1, shall be packed in a fiberboard shipping container, assembled, closed, and reinforced conforming to class weather-resistant, variety DW, grade V15c of MIL-B-17757. Level A folded trousers shall be packed flat and alternated end to end within a shipping container. Each container shall have the contents completely covered on the top and bottom with a sheet of 30-pound minimum basis weight kraft paper conforming to type I, grade B of UU-P-268. Not less than 8 ounces of naphthalene flakes shall be uniformly distributed throughout the entire contents of each shipping container, except where trousers are made from cloth pretreated with a moth repellent.

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T23:13Z
Check the source to verify that this is the current version before use.

5.2.2 Level B packing

5.2.2.1 Method 1. Thirty-five pair of trousers of one size and class only, packaged as specified in 5.1, shall be packed in a fiberboard shipping container, assembled, closed, and reinforced conforming to class domestic, grade 275, size 3A of MIL-B-17757. Level B folded trousers shall be packed flat, alternated end to end, within a shipping container. Each container shall have the contents completely covered on the top and bottom with a sheet of 30-pound minimum basis weight kraft paper conforming to type I, grade B of UU-P-268. Not less than 8 ounces of naphthalene flakes shall be uniformly distributed throughout the entire contents of each shipping container, except where trousers are made from cloth pretreated with a moth repellent.

5.2.2.2 Method 2. When specified (see 6.2), the fiberboard shipping container shall be type CF or SF, variety SW and grade V3c, V3s or V4s in accordance with MIL-B-17757, and shall be closed in accordance with the appendix of the box specification.

5.2.3 Commercial. Trousers, packaged as specified in 5.1, shall be packed in a manner to ensure carrier acceptance and safe delivery at destination at the lowest transportation rate for such supplies. The quantity per shipping container shall be the same as that normally used by the contractor for retail distribution. Containers shall comply with the US Postal Manual, Uniform Freight Classification Rules or National Motor Freight Classification Rules, as applicable.

5.2.4 Palletization. When specified (see 6.2), trousers packed as specified shall be palletized on a 4-way entry pallet in accordance with load type 1a of MIL-STD-147. If the container is of a size which does not conform to any of the patterns specified in MIL-STD-147, the pallet pattern used shall first be approved by the contracting officer.

5.3 Marking. In addition to any special marking required by the contract or purchase order, unit, intermediate packages (when applicable) and shipping containers and palletized unit loads shall be marked in accordance with MIL-STD-129.

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory.)

6.1 Intended use. The trousers are intended for wear by male military personnel of the US Marine Corps.

6.2 Acquisition requirements. Acquisition documents should specify the following:

a. Title, number and date of this specification.
b. Issue of DODISS to be cited in the solicitation and, if required, the specific issue of individual documents referenced (see 2.1.1 and 2.2).
c. Classes and sizes required (see 1.2.1).
d. When first article inspection is required, (see 3.2) the item will be tested and should be a first article sample. The contracting officer should include specific instructions in acquisition documents regarding arrangement for examinations, quantity, and testing and approval.
e. Selection of applicable levels of packaging and packing (see 5.1 and 5.2).
f. When palletization is required (see 5.2.4).

6.3 Sample and shade samples. For information regarding the availability of samples of the trousers and of the standard shades specified, address inquiries to the acquiring activity issuing the Invitation for Bids.

6.5 First article. First article examination, test and approval shall be as specified by the contracting officer (see 3.2.)

6.6 Changes from previous issue. Marginal notations are not used in this revision to identify changes from the previous issue due to the extensiveness of the changes.

6.7 Subject term (key word) listing.

Men's

Polyester

Trousers

Wool

Custodian:
