Check the source to verify that this is the current version before use.

2. Attaching device shall be prong with pick and flat ball type clutch. The prong shall be centered on the reverse side and fused or soldered to the lapel button.

CHANGES FROM PREVIOUS ISSUE: The margins of this specification are marked with vertical lines to indicate where changes from the previous issue were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous issue.
