PAGE 16

* 4.4.2.1: Delete in its entirety and substitute:

"A production lot shall consist of finished bolts that are of the same head configuration, shank diameter, grip length, thread size, material, heat treatment lot, and all other requirements. The bolts shall be assembled by the same method in one continuous run and submitted to inspection at the same time."

* 4.5.3: Delete in its entirety and substitute:

"Each bolt shall be 100 percent functionally checked from both the unlocked and locked positions to determine if the operation is correct, without the loss of any element. Each bolt shall be 100 percent inspected for presence and containment of the locking elements and retention devices."

* 4.5.5: Add as last sentences:

"The sample shall be 10 percent of the lot size, minimum of 5 bolts with a maximum of 15 bolts. There shall be no failures."

PAGE 21

Add as new paragraph 6.2.2:

"6.2.2 Inventory. Inventory produced before 1 January 1991 may be used until stock is exhausted."

NOTE: The margins of this amendment are marked with asterisks to indicate where changes (additions, modifications, corrections, deletions) from the previous issue were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous issue.
