DATA ITEM DESCRIPTION

Form Approved
OMB No 0704-0188

1 TITLE	2 IDENTIFICATION NUMBER
INTEGRATED CIRCUIT TEST DOCUMENTATION	DI-ATTS-80888

3 DESCRIPTION/PURPOSE

3.1 This data will document the procedures for the manual and automated test of integrated circuits. This documentation will provide information to allow full understanding of the testing strategy, techniques, programs, and specific equipment (commercial and unique) employed.

4. APPROVAL DATE (YYMMDD)	5 OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC APPLICABLE	6b GIDEP APPLICABLE
890803	G/Y253		

7 APPLICATION/INTERRELATIONSHIP

7.1 This Data Item Description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

7.2 This DID is usually used in conjunction with the following DIDs: DI-MCCR-80499 (Integrated Data, Computer Aided Chip Development); DI-MCCR-80500 (Integrated Circuit Data, Computer Aided Cell Development); and DI-T-5477A (Parts Qualification Test Plan).

7.3 This DID supersedes DI-E-5432A.

8 APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b AMSC NUMBER
		G4798

10. PREPARATION INSTRUCTIONS

10.1 Format. The documentation may be in the contractor's format.

10.2 Content.

10.2.1 Documentation. The documentation shall be presented in a logical and comprehensive order and consist of all manual and automated test procedures for parametric, functional, and dynamic testing of wafers, chips, and hybrid devices. It shall include:

a. Technical memorandums
b. Engineering reports
c. Engineering test procedures
d. Test equipment lists
e. Schematics
f. Source code (alphanumeric) of the test software programs

10.2.2 Performance Board Documentation. The performance board documentation shall fully describe the loading and interfacing requirements necessary between the device being tested and the tester itself, and include any other unique or related tester documentation, such as burn-in and life test circuitry.

(Continued on Page 2)

11. DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

BLOCK 10. PREPARATION INSTRUCTIONS (continued)

10.2.3 Test Software Programs.

10.2.3.1 Commercial. If the automated tester is a commercially available system, the documentation shall include:

a. A magnetic tape containing both source and executable code
b. A hardcopy printout of the source code.
c. A directory listing of all files and their order on the digital media.
d. The release level of the software.
e. The model number of the tester.

10.2.3.2 Contractor developed. If the program is a unique contractor developed program, the documentation shall include:

a. The program source code on a nine track magnetic tape, 1600 PI, odd parity, and in ACSII format.
b. A directory listing the files and their order on the digital media.

10.2.4 Title page. The alphanumeric source code printout of the test software program shall contain a title page with the following information:

a. Contract short title
b. Contract number
c. Contractor name and address
d. Integrated circuit technology name
e. Date of preparation
f. Security classification
g. Device drawing number and revision

10.2.5 Labeling. The digital media shall be labeled with the following information:

a. Contract short Title
b. Contract number
c. Contractor name and address
d. Integrated circuit technology name
e. Date of preparation
f. Security classification
g. Device drawing number and revision
h. Tape density and format
i. Number of files on the tape
