# DATA ITEM DESCRIPTION

**Title: Federal Aviation Administration Airworthiness Substantiation Data**

**Number: DI-SAFT-80901C** **Approval Date: 20130419**
**AMSC Number: N9363** **Limitation: N/A**
**DTIC Applicable: N/A** **GIDEP Applicable: N/A**
**Office of Primary Responsibility: AS/PMA-207**
**Applicable Forms: N/A**

**Use/Relationship:**

This data package shall include the data required to substantiate the FAA Airworthiness Certification and existing engineering data developed for commercial derivative aircraft, aircraft systems, engines, and components. This data package is used for airworthiness certification, modifications, testing, and flight clearance substantiation for commercial derivative aircraft owned by the US Government.

This Data Item Description (DID) contains the format, content, and intended use information, and content preparation instructions for the data product resulting from the work task described in the contract Statement of Work or Performance Work Statement.

**Requirements:**

1. Format: The datum shall be in Contractor format or as designated per FAA regulations.

2. Content: The following FAA airworthiness certification data and existing engineering data for a public use-commercial derivative aircraft, aircraft systems, engines, and components are to be provided per contract requirements:

(a) Aerodynamic Performance Data
(b) Aerodynamic Analysis and Test Data
(c) Stability and Control analysis and Test Data
(d) Airframe Stress Analysis and Test Data
(e) Airframe Fatigue Analysis and Test Data
(f) Structural Description and Design Data
(g) Aerodynamic Description and Design Data
(h) Wind Tunnel Test Data
(i) Landing Gear system Design and Analysis Data

Check the source to verify that this is the current version before use.

(j) Landing Gear System Test Data
(k) Flutter Analysis and Test Data
(l) Mechanical and Electrical Source Control Drawings
(m) General Arrangement Drawings
(n) Inboard Profile Drawings
(o) Structural Loads Internal and External Data
(p) Propulsion Design and Description
(q) Engine Installation description
(r) Engine Performance Analysis and Test Data
(s) APU Installation Description
(t) APU Design, Analysis, and Test Data
(u) Ancillary Propulsion Equipment Design and Test Data
(v) Hydraulic Systems Design, Analysis, and Test
(w) Pneumatic Systems Design, Analysis, and Test Data
(x) Flight Control System Design, Analysis, and Test Data
(y) Environmental Control Systems Design, Analysis, and Test Data
(z) Materials Verification Data
(aa) Electrical Loads Analysis and Test Data
(bb) Electromagnetic Interference Test Data
(cc) Electrical Wiring Diagram
(dd) Antennae System and Location Design, Analysis, and Test Data
(ee) Weight and Balance Data
(ff) Fire Protection Analysis Data
(gg) Fuel Tank Safety (SFAR 88) Analysis Data
(hh) Lightening Protection Analysis Data
(ii) Ice Protection Data
(jj) Oxygen Systems Design, Analysis, and Test Data
(kk) Flight Data Recorder System Design, Analysis, and Test Data
(ll) Human Factors Analysis Data
(mm) Environmental Analysis Data
(nn) Safety Assessment Data
(oo) Ground Vibration/Dynamic/Rap or Plink Data
(pp) HERO Test Data
(qq) Aircraft Conformity Report

4. END OF DI-SAFT-80901C.
