MILITARY SPECIFICATION SHEET

TOPOGRAPHIC SUPPORT SYSTEM (TSS):

ANALYSIS SECTION, TOPOGRAPHIC

SUPPORT SET, SEMITRAILER MOUNTED

This specification sheet is approved for use by the Mobility Equipment Research and Development Command, Department of the Army, and is available for use by all Departments and Agencies of the Department of Defense.

The complete requirements for procuring the analysis section described herein shall consist of this document and the latest issue of MIL-T-52964(ME).

1. REQUIREMENTS

1.1 Description. The analysis section shall be as shown in Figure 1 and shall be equipped with the components listed in SC 6675-97-CL-E51.

1.2 Components. Components of the analysis section shall be manufactured and operate in conformance with the component's technical specifications and literature.

1.3 Special provisions. Custom built shelving (metal or wood) shall be constructed to house the foil and paper used with the Diazo Printer (see components lists for description of foil, paper and quantities required). The quantities shall be stored under the table.

2. TESTS

2.1 Component test. The component test procedure shall be written and conducted by the contractor to determine the component's conformance to its' technical specifications and literature. The test shall be conducted in a van environment. The component test shall be conducted twice; once prior to any Section 4 testing and after completing all testing as specified in Section 4 of the general specification.

2.1.1 Preparation for operation and movement. The analytical photogrammetric positioning system and the zoom transfer plotter shall be stored (for transport) in their storage-transport cases and secured to the floor of the section.

Check the source to verify that this is the currentversion before use.

2.1.2 Test items. The following components of the analysis section shall be tested:

Analytical Photogrammetric Positioning System
Planimeter
Diazo Printer
Pin Register Board
Reflecting Projector
Split Stage Light Table
Zoom Transfer Scope

Nonconformance to 1.2 shall constitute failure of this test.

3. NOTES

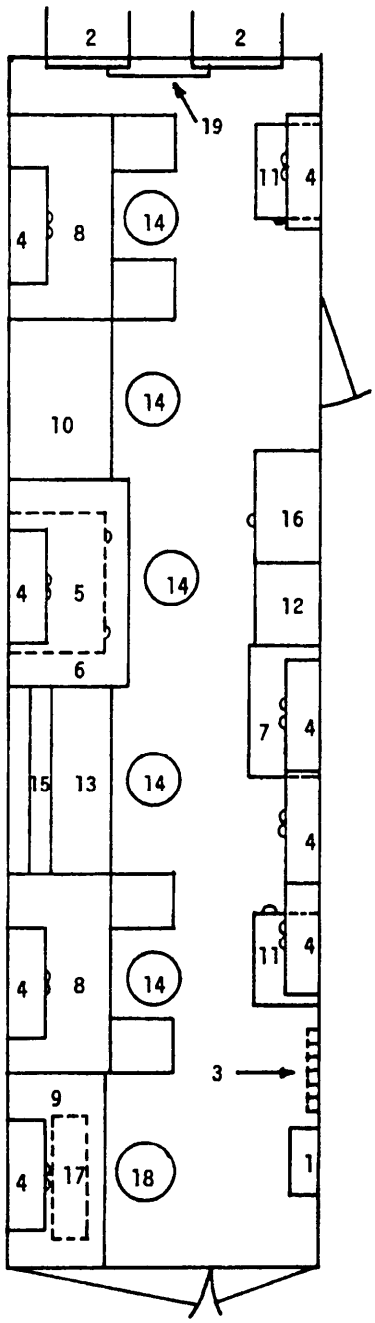

3.1 Intended use. The analysis section (with assigned personnel) will accomplish the preparation and updating of factor overlays for all of the subjects that comprise Military Geographic Information (MGI) and for maintaining the currency of all information recorded in other than overlay form. Imagery interpretation and the evaluation of graphics other than imagery, tabular materials, textural reports, and reconnaissance forms are among the analytical tasks performed. In addition, the staff analyzes soil samples and processes hydrologic data obtained by the information section for storage, from where it is retrieved to use as baseline information on the analysis of newly received data.

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

OMB Approval
No. 22-R255

INSTRUCTIONS: The purpose of this form is to solicit beneficial comments which will help achieve procurement of suitable products at reasonable cost and minimum delay, or will otherwise enhance use of the document. DoD contractors, government activities, or manufacturers/vendors who are prospective suppliers of the product are invited to submit comments to the government. Fold on lines on reverse side, staple in corner, and send to preparing activity. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements. Attach any pertinent data which may be of use in improving this document. If there are additional papers, attach to form and place both in an envelope addressed to preparing activity.
