COMMERCIAL ITEM DESCRIPTION
CHALK, LINE MARKING, POWDER and CHALK MARKING

The General Services Administration has authorized the use of this commercial item description as a replacement for Federal Specification SS-C-255 which has been cancelled.

This commercial item description covers two types of chalk.

Type I - Chalk, line marking, powder (carpenters' chalk)
Type II - Chalk, marking (railroad chalk)

The Type I chalk, line marking, commonly known as carpenters' chalk, is intended for use in construction work for the purpose of transferring a chalk line from a length of string to the work.

The Type II chalk, marking, commonly known as railroad chalk, is intended for the purpose of making identification marks on wood, metal, stone, and concrete.

1. Salient Characteristics

A. Type I chalk. The chalk shall weigh no less than 7 pounds per gross. The chalk shall be hemispherical in shape, and shall have a base diameter of not less than 2 inches, and shall be not less than 3/4 inch in height.

Type II chalk. The chalk shall weigh no less than 8 pounds per gross. The chalk shall be conical in shape, and shall be not less than 3-3/4 inches long, and tapered with the smaller end rounded. When specified in the contract or order, the chalk shall be uniformly coated with a suitable enamel for cleanliness in handling.

B. The color of the chalk shall be white, blue, red or yellow, as specified in the contract or order.

C. The chalk shall meet the requirements of section 2 when tested with the appropriate test method.

Workmanship. The chalk shall have a smooth uniform surface and shall be free from any defect that may affect its appearance, performance or use.

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited

FSC 7510

2. Test

Characteristic	Minimum Requirement	Test Method
Calcium Sulfate Content ($CaSO_4 \cdot 2H_2O$)	60 percent by weight	ASTM C 471

3. Quality Assurance

Responsibility for Inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in the Commercial Item Description, where such inspections are deemed necessary to assure that supplies and services conform to the prescribed requirements (See Section 7, Ordering Data).

Each lot of chalk shall be inspected for conformance to the requirements herein. Sampling for inspection shall be in accordance with MIL-STD-105 using the plans specified below.

A. Sampling for visual examination - Inspection Level S-2 with an Acceptable Quality Level (AQL) of 4.0 percent defective. The sample unit shall be one piece of chalk.

B. Sampling for dimensional examination - Inspection Level S-2 with an Acceptable Quality Level (AQL) of 4.0 percent defective. The sample unit shall be one piece of chalk.

C. Sampling for end item testing - Inspection Level S-2 with an Acceptable Quality Level (AQL) of 6.5 percent defective. The sample unit shall be one piece of chalk. The composition test shall be required at the beginning of each contract and the results kept on file by the manufacturer for the duration of the contract.

D. Packaging, Packing, and Marking - Inspection Level S-2 with an AQL of 4.0 percent defective. The sample unit shall be one fully prepared shipping container.

4. Preparation for delivery

Packaging, packing and marking shall be as specified in the contract or purchase order.

5. Application for copies of technical documents referenced herein:
The issue date in effect on date of invitation for bids or request for proposal shall be apply.

ASTM standard test methods can be obtained from the American Society for Testing and Materials; 1916 Race Street; Philadelphia, PA 19103.
