COMMERCIAL ITEM DESCRIPTION

CLEANING COMPOUND, OPTICAL LENS (READY TO USE)

The General Service Administration has authorized the use of this commercial item description by all federal agencies.

1. SCOPE. This commercial item description (CID) covers two types of ready-to-use cleaning compounds. The cleaning compounds described herein are intended for use in cleaning exposed optical surfaces of optical equipment in the field.

2. CLASSIFICATION. The cleaning compound shall be of the following types:

2.1 Type I - 20 percent solution of alcohol.
Type II - 57 percent solution of alcohol.

3. SALIENT CHARACTERISTICS.

3.1 Materials and composition. Type I cleaning compound shall consist of (percent by weight) 20.0 +/- 1.0 alcohol, 0.10 +/- 0.01 non-ionic detergent, and 79.9 +/- 1.0 distilled or de-ionized water. Type I compound should not be used at temperatures below 20 degrees ºF. Type II cleaning compound shall consist of (percent by weight), 57.0 +/- 1.0 alcohol, 0.10 +/- 0.01 non-ionic detergent, and 42.9 +/- 1.0 distilled or de-ionized water. Type II compound can be used at temperatures as low as -40 degrees ºF. A certificate of compliance will be provided as evidence of conformance.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data that may improve this document should be sent to DLA Aviation, VEB, 8000 Jefferson Davis Highway, Richmond, VA 23297-5616 or e-mailed to STDZNMGT@dla.mil. Since contact information can change, you may want to verify the currency of this address information using the ASSIST database at https://assist.dla.mil

Check the source to verify that this is the current version before use.

3.1.1 Alcohol. The alcohol shall be Formula No. 3A denatured alcohol in accordance with 27 Code of Federal Regulations (CFR) § 21.35, consisting of ethyl alcohol and methyl alcohol in accordance with American Chemical Society (ACS) Reagent Chemicals or the United States Pharmacopeia (USP). A certificate of compliance shall be provided as evidence of conformance.

3.1.2 Detergent. The general purpose liquid detergent shall be non-ionic and water-soluble. The detergent shall contain a minimum of 99 percent active ingredient. The appearance of the detergent shall be a liquid at 25 degrees °C and a slight haze is permissible. Additionally, the cloud point of the detergent (as determined by ASTM D2024) shall not be less than 49 degree °C and not more than 71 degrees °C. A certificate of compliance shall be provided as evidence of conformance for all requirements of the detergent.

3.1.3 Water. The distilled or de-ionized water shall conform to the requirements of ASTM D1193 and a certificate of compliance shall be provided as evidence of conformance.

3.2 Non-irritant. The cleaning compound shall not be irritating to the nose or eyes.

3.3 Color. The color of the cleaning compounds shall be no darker than Platinum-Cobalt Scale 25 when tested in accordance with ASTM D1209.

4. REGULATORY REQUIREMENTS.

4.1 Recovered materials. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

4.2 Safety data sheet (SDS). Manufacturers shall prepare and submit a SDS in accordance with FED-STD-313, "Material Safety Data, Transportation Data and Disposal Data for Hazardous Materials Furnished to Government Activities", and meeting the requirements of 29 Code of Federal Regulations § 1910.1200, "Occupational Safety and Health Standards: Hazard Communication".

5. PRODUCT CONFORMANCE PROVISIONS.

5.1 Product conformance. The products provided shall meet the salient characteristics of this commercial item description, conform to the producer's own drawings, specifications, standards, and quality assurance practices, and be the same product offered for sale in the commercial market. The Government reserves the right to require proof of such conformance.

5.2 Market acceptability. The following market acceptability criteria are necessary to document the quality of the product to be provided under this CID.

5.2.1 Test data. The company must be able to show test data or lab results of meeting the salient characteristics of the cleaning compound, optical lens.

Check the source to verify that this is the current version before use.

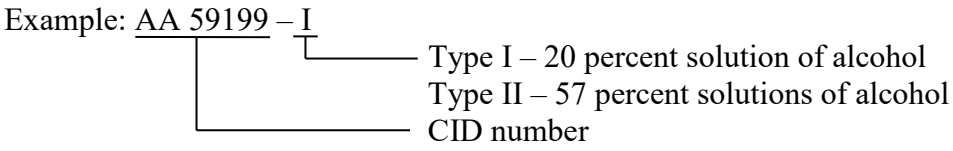

5.2.2 Warranty. The company must provide a warranty of replacing defective items.

6. PACKAGING. Preservation, packing, and marking shall be as specified in the contract or order.

7. NOTES.

(This section contains information of a general or explanatory nature that is helpful, but is not mandatory.)

7.1 Part identification number (PIN). The following part identification number procedure is for government purposes and does not constitute a requirement for the contractor.

7.2 Source of documents.

7.2.1 Electronic copies of ASTM Standards can be purchased from ASTM International: https://www.astm.org.

7.2.2 Electronic copies of FED-STD-313 can be obtained from https://quicksearch.dla.mil.

7.2.2 Electronic copies of CFR documents can be obtained from https://gov.ecfr.io/cgi-bin/ECFR.

7.2.3 Electronic copies of FAR documents may be obtained from https://www.acquisition.gov/.

7.2.1 Electronic copies of ACS Reagent Chemicals STM Standards can be purchased from https://pubs.acs.org.

7.2.1 Electronic copies of the Pharmacopoeia of the USP can be found at https://www.uspnf.com.

7.3 Ordering data. Acquisition documents must specify the following:

a. Title, number, and date of this CID.
b. Part identification number.
c. Quantity of containers required.

7.4 National stock numbers (NSNs). The following is a list of NSNs assigned which correspond to this CID. This list may not be indicative of all possible NSNs associated with this document.

NSN	Type	Size
6850-00-392-9751	I	2 Ounces
6850-00-227-1887	I	1 Quart

6850-00-188-9875	II	1 Quart

7.5 Shelf-life. This specification covers items where the assignment of a Federal shelf-life code is a consideration. Specific shelf-life requirements should be specified in the contract or purchase order, and should include, as a minimum, shelf-life code, shelf-life package markings in accordance with MIL-STD-129 or FED-STD-123, preparation of a materiel quality storage standard for type II (extendible) shelf-life items, and a minimum of 85 percent shelf-life remaining at time of receipt by the Government. These and other requirements, if necessary, are in DoD 4140.27-M, *Shelf-life Management Manual*. The shelf-life codes are in the Federal Logistics Information System Total Item Record. Additive information for shelf-life management may be obtained from DoD 4140.27-M, or the designated shelf-life Points of Contact (POC). The POC should be contacted in the following order: (1) the Inventory Control Points that manage the item and (2) the DoD Service and Agency administrators for the DoD Shelf-Life Program. Appropriate POCs for the DoD Shelf-Life Program can be contacted through the DoD Shelf-Life Management website: https://www.shelflife.hq.dla.mil/.

7.6 Changes from previous issues. Marginal notations are used in this revision to identify changes with respect to the previous issue.
