COMMERCIAL ITEM DESCRIPTION

COVER, ELECTRICAL

The General Service Administration has authorized the use of this commercial item description by all federal agencies.

1. SCOPE. This commercial item description (CID) covers an electrical cover for power cable assemblies for interior and exterior power and lighting (see figure 1).

2. SALIENT CHARACTERISTICS

2.1 Material. The material shall be medium-low temperature, heat resistant with the flexibility and durability of styrene-butadiene rubber (SBR) in accordance with the American Society for Testing and Materials (ASTM) D 518, "Standard Test Method for Rubber Deterioration - Surface Cracking" (DoD adopted).

2.1.1 The ambient temperature range shall be -40 ºC to +75 ºC in accordance with ASTM D 1053, "Standard Test Methods for Rubber Property - Stiffening at Low Temperatures: Flexible Polymers and Coated Fabrics" (DoD adopted).

2.1.2 The Shore Durometer "A" hardness shall be 60 +/- 10.

2.1.3 The material shall be molded integrally as one piece in accordance with ASTM D 1765, "Standard Classification System for Carbon Blacks Used in Rubber Products" (DoD adopted).

2.1.4 The cover shall provide a waterproof seal for the connector.

2.1.5 The dimensions shall be as specified in figure 1.

3. REGULATORY REQUIREMENTS. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data that may improve this document should be sent to: Defense Supply Center Richmond (DSCR), ATTN: DSCR-VBD, 8000 Jefferson Davis Highway, Richmond, VA 23297-5610.

AMSC N/A FSC 6150

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

4. PRODUCT CONFORMANCE PROVISIONS

4.1 Product conformance. The products provided shall meet the salient characteristics of this commercial item description, and conform to the producer's own drawings, specifications, standards, and quality assurance practices, and be the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance.

4.2 Market acceptability. The following market acceptability criteria are necessary to document the quality of the product to be provided under this CID.

4.2.1 The company must provide a warranty for replacing defective items.

5. PACKAGING. Preservation, packing, and marking, shall be specified in the contract or order (see 6.3(b)).

6. NOTES

6.1 Part or identification number (PIN). The PIN procedure is AA59201-1. It is for government purposes and does not constitute a requirement for the contractor.

6.2 Source of documents.

6.2.1 FAR. The FAR may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402-0001.

6.2.2 ASTM standards. Copies of ASTM standards may be obtained from the American Society for Testing and Materials, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959.

6.3 Ordering data. Acquisition documents must specify the following:

a. CID document number, revision, and CID PIN.
b. Packaging requirements (see 5).

6.4 Supersession data. This CID should be used for the electrical cover in MIL-C-52286C.
