DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

MIL-STD-1562W

DEPARTMENT OF DEFENSE

WASHINGTON, DC 20301

Lists of Standard Microcircuits

1. This military standard is approved for use by all Departments and Agencies of the Department of Defense.

2. Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Commander, Rome Laboratory, AFSC, ATTN: ERSS, Griffiss Air Force Base, New York, NY 13441, by using the self-addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

1. SCOPE

1.1 Purpose. The purpose of this standard is to:

a. Provide equipment designers, manufacturers and users with lists of microcircuits considered to be most acceptable for military applications.

b. Control and minimize the variety of microcircuits used by military activities in order to facilitate effective logistic support of equipment in the field.

c. Concentrate economic support, improvement and production of the microcircuits listed in this standard.

1.2 Scope. This standard establishes the requirements for the selection of microcircuits used in the design, manufacture and support of military equipment and identifies those devices which are less acceptable for new designs because of their nonavailability or impending obsolescence, or their problems in performance, reliability or other characteristics.

2. REFERENCED DOCUMENTS

2.1 Government documents.

2.1.1 Specification and standard. Unless otherwise specified, the following specification and standard of the issue listed in that issue of the Department of Defense Index of Specifications and Standards (DODISS) specified in the solicitation form a part of this standard to the extent specified herein.

SPECIFICATION

MILITARY

MIL-M-38510 - Microcircuits, General Specification For.
MIL-H-38534 - Hybrid Microcircuits, General Specification For.
MIL-I-38535 - Integrated Circuits (Microcircuits) Manufacturing, General Specification For.

STANDARD

MILITARY

MIL-STD-1331 - Parameters to be Controlled for the Specification of Microcircuits.

(Copies of the specification and standard required by manufacturers in connection with specific acquisition functions should be obtained from the contracting activity or as directed by the contracting officer.)

2.2 Other publication. The following document forms a part of this standard to the extent specified herein. Unless otherwise specified, the issue of the documents which are DOD adopted shall be those listed in the issue of the DODISS specified in the solicitation. The issues of documents which have not been adopted shall be those in effect on the date of the cited DODISS.

Allied Materials Standards Publications Volume 5962
(AStanP-3 Volume 5962) (Superseding NEPR 93)

(Non-Government standards are generally available for reference from libraries. They are also distributed among Non-Government standards bodies and using Federal agencies.)

2.3 Order of precedence. In the event of a conflict between text of this standard and the references cited herein, the text of this standard shall take precedence.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T07:49Z
Check the source to verify that this is the current version before use.

3. DEFINITIONS

3.1 Terms. The terms used in this standard are defined in MIL-M-38510, MIL-H-38534, MIL-I-38535 and MIL-STD-1331.

3.2 One part - one part number system. The one part - one part number system described below has been developed to allow for transitions between identical generic devices covered by the four major microcircuit requirements documents (MIL-M-38510, MIL-H-38534, MIL-I-38535, and I.2.1 of MIL-STD-883) without the necessity for the generation of unique PIN's. The four military requirements documents represent different class levels, and previously when a device manufacturer upgraded military product from one class level to another, the benefits of the upgraded product were unavailable to the Original Equipment Manufacturer (OEM), that was contractually locked into the original unique PIN. By establishing a one part number system covering all four documents, the OEM can acquire to the highest class level available for a given generic device to meet system needs without modifying the original contract parts selection criteria.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T07:49Z
Check the source to verify that this is the current version before use.

4. GENERAL REQUIREMENTS

4.1 Selection of microcircuits. Microcircuit device types for new designs shall be selected from the types listed in tables I and II of this standard. The variety of microcircuits used in any military equipment shall be the minimum necessary to provide satisfactory performance, and the contractor (or hardware designer or builder) shall exercise all reasonable design choices to achieve this objective.

4.1.1 Table I - Preferred devices. All devices in this table have a dated military specification and a QPL source (part I or part II) or QML source. These devices have no known reliability or availability problems and are recommended and preferred.

4.1.2 Table II - Potential standardization candidates. Devices listed in this table are those that have been selected for electrical characterization and are potential candidates for MIL-M-38510 specification or that have an active Military (DESC) drawing. This table also includes devices that have dated military specifications but as yet have no QPL source or QML source. These devices shall be considered for use in systems or equipment designs if a QPL or QML source is anticipated.

4.1.3 Table III - Logistics or continuous replacement only. This table contains devices which are not recommended for new designs because of diminishing sources, obsolete technology, or a preferred device listed in tables I or II is now available which performs the same function.

4.1.4 Table IV - Inactive or suspended military activity. This table contains devices which are not recommended for new design, it also includes devices which have had QPL status that has been canceled or expired and there is no indication that a device manufacturer intends to requalify.

4.1.5 Table V - Not recommended under any circumstances. Devices listed in this table have known reliability or availability problems. Devices listed in this table will also have a preferred replacement/equivalent device for new design.

4.1.6 NATO status. The cross reference listing is annotated as follows to show the NATO status of the listed parts as derived from AStanP-3 Volume 5962, NATO Electronic Part Recommendation on Standardization of Monolithic Microcircuit Devices:

(NATO-P) indicates NATO PREFERRED Device
(NATO-G) indicates NATO GUIDANCE Device
(NATO-F) indicates NATO FUTURE Device
(NATO-L) indicates NATO LOGISTICS/MAINTENANCE Device

NATO P and G items should equate to table I of MIL-STD-1562 but with a recommended preference in new design for the PREFERRED item. NATO-F should equate to table II and NATO-L to table III. There is no NATO equivalent for tables IV and V. The NATO designations are provided for multinational acquisition or logistic support.

4.2 Use of microcircuits.

4.2.1 Circuit application. The equipment shall be designed so that it will meet the specified equipment performance and reliability requirements when using any microcircuit meeting the applicable specification requirements. The use of the standard microcircuit or the satisfactory equipment performance shall not depend on characteristics or parameters which are not controlled by the applicable specification. The selection of special microcircuits from lots meeting the specification requirements is prohibited unless submitted and approved as nonstandard parts.

4.3 Criteria for inclusion in this standard of parts preferred for new design.

a. The microcircuit device shall be considered by the military departments as the best presently available type for the function.

b. The microcircuit device shall be in production and continued availability shall be reasonably certain.

c. The microcircuit device shall have an approved military detail specification or DESC issued, Standardized Military Drawing.

4.3.1 Device class. The device class shall be the product assurance level as defined in MIL-M-38510 or MIL-H-38534 or MIL-I-38535 As a minimum, class B, H or Q devices shall be used.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T07:49Z
Check the source to verify that this is the current version before use.

4.3.2 Case outlines. Case outlines shall conform to the requirements of the applicable military specification. Case outline F-3 of Appendix C to MIL-M-38510 (14-pin 3/16" X 1/4" flat package) shall not be used unless space or weight requirements dictate its use. However, flat packages with a Q dimension of less than .026 inches (0.66mm) are not recommended for new equipment design.

4.3.3 Lead material and finish. Lead material and finish shall be as defined in MIL-M-38510, MIL-H-38534 or MIL-I-38535.

4.4 Conflict of data. In the event of conflict between the technical description of microcircuits described in this standard and the applicable specification, the specification shall govern.

4.5 Procedure for inquiring about microcircuits not listed. When a manufacturer has determined that equipment or system requirements cannot be met by items listed in table I, he is encouraged to:

a. Determine if an item listed in table II can meet equipment or system requirements.

b. Contact the Military Parts Control Advisory Group (MPCAG) at the Defense Electronics Supply Center.

Check the source to verify that this is the current version before use.

TABLE I. Preferred devices.
(All devices in this table have a dated military specification and a QPL source (part I or part II) or are listed as approved devices on QML-38534 or QML-38535. These devices have no known reliability or availability problems and are recommended and preferred.)

TABLE I. Preferred devices - Continued.

Generic/ industry number	Standard Part Identification Number	Circuit description	Gate, bit, transistor count 1/
Regulators 12 - Continued			
78M12	10703	VOLT. REGULATOR, FIXED, POSITIVE	T19
7812	10707	VOLT. REGULATOR, FIXED, POSITIVE	T17
78M15	10704	VOLT. REGULATOR, FIXED, POSITIVE	T19
7815	10708	VOLT. REGULATOR, FIXED, POSITIVE	T17
7824	10709	VOLT. REGULATOR, FIXED, POSITIVE	T17
79M05	11501	VOLT. REGULATOR, FIXED, NEGATIVE, 0.5A, 1.0A	T23
7905	11505	VOLT. REGULATOR, FIXED, NEGATIVE, 0.5A, 1.0A	T23
79M12	11502	VOLT. REGULATOR, FIXED, NEGATIVE, 0.5A, 1.0A	T23
7912	11506	VOLT. REGULATOR, FIXED, NEGATIVE, 0.5A, 1.0A	T23
79M15	11503	VOLT. REGULATOR, FIXED, NEGATIVE, 0.5A, 1.0A	T23
7915	11507	VOLT. REGULATOR, FIXED, NEGATIVE, 0.5A, 1.0A	T23
7924	11508	VOLT. REGULATOR, FIXED, NEGATIVE, 0.5A, 1.0A	T23
Drivers/Receivers 13			
0006	5962-8761701	DRIVER, HIGH VOLTAGE, 1.5A	N
0008	5962-8761702	DRIVER, HIGH VOLTAGE, HIGH CURRENT, 3.0A	N
NHI-1509	5962-8604906	DRIVER-RECEIVER, SINGLE CHANNEL (INTERFACES WITH MANCHESTER ENCODER-DECODER)	N
2001	14101	TRANSISTOR ARRAY, DARLINGTON	N
2002	14102	TRANSISTOR ARRAY, DARLINGTON	N
2003	14103	TRANSISTOR ARRAY, DARLINGTON	T14
2004	14104	TRANSISTOR ARRAY, DARLINGTON	N
2005	14105	TRANSISTOR ARRAY	N
ARX2402	5962-8604903	DRIVER-RECEIVER, SINGLE CHANNEL (INTERFACES WITH MANCHESTER ENCODER-DECODER)	N
2801	14106	TRANSISTOR ARRAY, DARLINGTON	N
2802	14107	TRANSISTOR ARRAY, DARLINGTON	N
2803	14108	TRANSISTOR ARRAY, DARLINGTON, EIGHT-GATE	T14
2804	14109	TRANSISTOR ARRAY, DARLINGTON	N
2805	14110	TRANSISTOR ARRAY, DARLINGTON	N
3045	10802	TRANSISTOR ARRAY	T5
54S140	08101	LINE DRIVER, DUAL 4-INPUT NAND	G2
54LS242	32801	BUS TRANSCEIVER, QUAD INVERTING, WITH THREE-STATE OUTPUTS	N
54F243	34802	BUS TRANSCEIVER, QUAD NONINVERTING, WITH THREE-STATE OUTPUTS	G10
54LS243	32802	BUS TRANSCEIVER, QUAD NONINVERTING, WITH THREE-STATE OUTPUTS	N
54HC245	65503	BUS TRANSCEIVER, OCTAL, NONINVERTING, WITH THREE-STATE OUTPUTS	N
54HCT245	65553	BUS TRANSCEIVER, OCTAL, NONINVERTING, WITH THREE-STATE OUTPUTS	N
54F245	34803	BUS TRANSCEIVER, OCTAL, NONINVERTING, WITH THREE-STATE OUTPUTS	G18
54LS245	32803	BUS TRANSCEIVER, OCTAL, WITH THREE-STATE OUTPUTS	N
54AC245	75503	BUS TRANSCEIVER, OCTAL BIDIRECTIONAL, WITH THREE-STATE INPUTS/OUTPUTS	N
54LS368	32204	BUS DRIVER, HEX	G8
54HCT540	65760	BUS TRANSCEIVER, OCTAL, WITH THREE-STATE OUTPUTS	N
54F545	34804	BUS TRANSCEIVER, OCTAL BIDIRECTIONAL, WITH THREE-STATE OUTPUTS	N
54ALS645A	38505	BUS TRANSCEIVER, OCTAL, NONINVERTING, WITH THREE-STATE OUTPUTS	G18
55107	10401	LINE RECEIVER, DUAL	G29

6. NOTES

6.1 Table VI - Cross reference. All devices in this table have generic/industry numbers to device type numbers, table numbers and functional descriptions.

6.2 Subject term (key word) listing.

Circuit application
Microcircuits, inactive
Microcircuits, nonusable
Microcircuits, preferred
Microcircuits, reliability
Microcircuits, replacement
Microcircuits, selection
Microcircuits, standardization

6.3 Changes from previous issue. Vertical lines or asterisks are not used in this revision to identify changes with respect to the previous issue due to the extensiveness of the changes.

Table VI. Cross reference - Continued.

1/ B before the number stands for bit count
G before the number stands for gate count
T before the number stands for transistor count
N before the number stands for unknown count

2/ First column is table number:
1. Table I - Preferred devices
2. Table II - Potential standardization candidates and complaint Standardized Military Drawings.
3. Table III - Logistics or continuous replacement only.
4. Table IV - Inactive or suspended military activity.
5. Table V - Not recommended under any circumstances.

(For generic types that have a part number in both column 2 and column 3, the table number is for the M38510 part.)

Second column is function code:

1	Gates
2	Buffers
3	Flip-Flops
4	Combinational gates
5	Sequential registers/Counters
6	Ram
7	Ram/Prom/Pal
8	Microprocessors and interface peripherals/FIFO
9	Operational amplifiers
10	Comparators
11	Sense amplifiers
12	Regulators
13	Drivers/Receivers
14	Timers
15	Core drivers
16	D/A converters
17	A/D converters
18	Analog switches/multiplexers
19	Voltage references
20	Sample and hold
21	Multichip
22	Hybrid
23	Other digital devices
24	Analog circuit functions
25	Semicustom devices
*	Indicates a QPL source
**	Indicates a dated specification

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T07:49Z
Check the source to verify that this is the current version before use.

Third column is technology code:
1. Transistor Transistor Logic
2. Low Power Schottky
3. Complimentary MOS
4. "A" Series CMOS
5. Schottky TTL
6. Integrated Current Logic
7. N-Channel CMOS
8. "B" Series CMOS
9. High Speed TTL
10. Low Power TTL
11. P-Channel MOS
12. Bipolar
13. Emitter Coupled Logic
14. Diode Transistor Logic
15. Bi-FET
16. Hybrid
17. Magnetic
18. Advanced Schottky
19. Advanced LSTTL
20. Multi-Chip
21. High Speed CMOS
22. High Performance NMOS
23. BIDFET
24. Advanced CMOS
25. Fast CMOS TTL Compatible
26. Bipolar CMOS

3/ B1 indicates a Class B, Part 1, QPL source;
S1 indicates a Class S, Part 1, QPL source.

4/ B2 indicates a Class B, Part 2, QPL source;
S2 indicates a Class S, Part 2, QPL source.

5/ Microcircuit group is as defined by MIL-M-38510.

6/ Radiation levels are as defined by MIL-M-38501

Concluding material

Custodians:
Army - ER
Navy - EC
Air Force - 17

Review activities:
Army - AT, MI, SM,
Navy - OS, SH, TD
Air Force - 11, 19, 85, 99
DLA -ES

User activities:
Army - AR
Navy - AS, CG, MC

Preparing activity:
Air Force - 17

Agent:
DLA - ES

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

INSTRUCTIONS

1. The preparing activity must complete blocks 1, 2, 3, and 8. In block 1, both the document number and revision letter should be given.
2. The submitter of this form must complete blocks 4, 5, 6, and 7.
3. The preparing activity must provide a reply within 30 days from receipt of the form.

NOTE: This form may not be used to request copies of documents, nor to request waivers, or clarification of requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.

I RECOMMEND A CHANGE:	1. DOCUMENT NUMBER	2. DOCUMENT DATE (YYMMDD)
3. DOCUMENT TITLE		

4. NATURE OF CHANGE *(Identify paragraph number and include proposed rewrite, if possible. Attach extra sheets as needed.)*

5. REASON FOR RECOMMENDATION

6. SUBMITTER		
a. NAME *(Last, First, Middle Initial)*	b. ORGANIZATION	
c. ADDRESS *(Include Zip Code)*	d. TELEPHONE *(Include Area Code)* (1) Commercial (2) AUTOVON *(If applicable)*	7. DATE SUBMITTED *(YYMMDD)*

8. PREPARING ACTIVITY	
a. NAME	b. TELEPHONE *(Include Area Code)* (1) Commercial (2) AUTOVON
c. ADDRESS *(Include Zip Code)*	IF YOU DO NOT RECEIVE A REPLY WITHIN 45 DAYS, CONTACT: Defense Quality and Standardization Office 5203 Leesburg Pike, Suite 1403, Falls Church, VA 22041-3466 Telephone (703) 756-2340 AUTOVON 289-2340
