2. Color standards.

The applicable color standard listed in section 1 should be employed as standards for matching purposes. When ANA Color Standards are required, application should be made to either the Commander, USAF Engineering Specifications and Drawings Branch, Attn: EWBFE, Wright-Patterson Air Force Base, Ohio, or to the Director, Aeronautical Materials Laboratory, Naval Air Engineering Center, Philadelphia, Pennsylvania 19112. Requests for one or more standard colors should include reference to each color name and number.

The Federal Standard No. 595 color chips may be purchased from Business Service Center, Region 3, Seventh and D Streets, S.W., Washington, D.C. 20407.

2.1 The Air Force-Navy Aircraft Camouflage Color Standards have been distributed to all manufacturers of Air Force-Navy Aeronautical paint materials. Users of these materials may obtain from the paint manufacturers the color required by referring to the specification, color name, and color number.

3. Color match. In order to determine color match, the applicable standard shall be compared with the dry paint film under test by viewing both panels placed adjacently, and under identical conditions, at a north window illuminated by a fairly light overcast sky, or equivalent conditions.

3.1 If necessary to compare finishes of different degrees of gloss, wet down both panels with distilled water (if water does not wet, use a heavy water-white mineral oil) and make comparison as above.

4. Camouflage finishes. Standard camouflage finishes are defined as those finishes having a specular gloss up to, but not including, 60 when determined in accordance with Method 6101 of Federal Test Method Standard No. 141.

5. Marginal indicia. The margins of this bulletin are marked to indicate where changes, deletions, or additions to the previous issue have been made. This is done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content as written, irrespective of the marginal notations and relationship to the last previous issue.

6. Sources. Copies of specifications, standards, drawings, and publications required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.
