MILITARY STANDARD

FORMULA FOR PRIME COMPOSITION II

Ingredient	Illuminant Composition II	Yellow First Fire Composition
Specification	MIL-STD-718	MIL-STD-720
Percent by Weight	33.0 ± 3.0	67.0 ± 3.0

REQUIREMENTS:

1. The composition shall be blended thoroughly prior to use.

2. The illuminant composition shall not have been blended for more than one (1) hour at the time it is blended with the first fire composition.

NOTES:

1. The processing of the ingredients, blending operation and storage of the composition should take place under conditions which do not permit the relative humidity to exceed 75 percent.

2. The following blending procedure has been found satisfactory:

   a. Place the weighed compositions on a No. 16 U.S. Standard sieve, specification RR-S-366.

   b. Manually, mix the ingredients intimately by brushing thru the sieve a minimum of three (3) times.

CAUTION: For safety reasons, the usual precautions for handling and blending of pyrotechnic mixtures must be observed in handling the composition. See section 6.7 of MIL-P-21355 for general safety precautions.

The replacement sample powder tank Mk 1 Mods has been found satisfactory for handling this mixture.

Copies of specifications, standards, drawings and publications required by contractors in connection with specific procurement functions should be obtained from the procuring agency or as directed by the contracting officer.
