Paragraph 3.4.2: Delete paragraph and substitute the following:

"3.4.2 Manufacturing process specification. The contractor shall prepare a manufacturing process specification. The process specification shall fully describe all manufacturing and fabricating processes and methods of control of manufacturing variables, including proper storage and use of adhesives and primer, bondline thickness control, control of adhesives and primer application, prefitting of parts, cleaning of parts, handling of cleaned parts, control of prepregs, curing of adhesive and primer, etc. (see 6.7). All processing shall be in accordance with the requirements of the processing specification. The manufacturing process specification shall be available for review by the procuring activity."
