15 May 2012 IMSWM-0054-2012

ALL MILITARY REPRESENTATIVES

APPROVAL OF ACP 198 NS-1 (G), NATO INSTRUCTIONS FOR PREPARATION AND LIFE CYCLE MANAGEMENT OF ACPS

Reference

A. AC/322-N(2012)0024, Request for endorsement of ACP 198 NS-1 (G), 20 Mar 2012

1. Please find enclosed ACP 198 NS-1 (G), NATO Instructions for preparation and life cycle management of ACPs, which was endorsed by C3B on 13 April 2012 (Ref A).

2. This document, in addition to the basic ACP 198 (N) establishes policy and procedures for the preparation and life cycle management of NATO Supplements to the ACPs. It also provides specific procedures for adoption of ACPs and their General Supplements, published and offered for use to NATO by the Combined Communications Electronics Board (CCEB).

3. The Military Committee is invited to review the Enclosure 1 and approve it for the adoption, distribution and implementation of ACP 198 NS-1 (G)

4. Approval will be assumed unless the Action Officer is notified to the contrary **by 1600 hrs, 01 June 2012.**

FOREWORD

1. ACP 198 NATO SUPPLEMENT-1(G), NATO INSTRUCTIONS FOR THE LIFE CYCLE MANAGEMENT OF ALLIED COMMUNICATIONS PUBLICATIONS (ACPs), GENERAL SUPPLEMENTS, AND NATO SUPPLEMENTS is an UNCLASSIFIED NATO publication. It shall be transported, stored, safeguarded and accounted for in accordance with current NATO security regulations.

2. The Custodian for ACP 198 NATO SUPP-1(G) is the Consultation, Command and Control Board (C3B) Communication and Information Services (CIS) Panel. All NATO ACP Supplements are raised and issued under common agreement between NATO member nations.

3. Requests for the release of this document to a non-NATO nation must be sent to the Custodian for review. The final decision to approve/disapprove requests rests with the NATO Military Committee.

4. This supplement is to be maintained and amended in accordance with the provisions located within this document.

MILITARY COMMITTEE LETTER OF PROMULGATION

1. The purpose of this Military Committee Letter of Promulgation is to implement ACP 198 NATO SUPP-1(G), NATO Instructions for the Life Cycle Management of Allied Communication Publications, General Supplements and NATO Supplements within the Armed Forces of NATO.

2. ACP 198 NATO SUPP-1(G) will be EFFECTIVE UPON RECEIPT. This publication supersedes ACP 198 NATO SUPP-1(F), which shall be destroyed in accordance with current NATO security instructions.

3. All proposed amendments to this publication should be forwarded through National or NATO Command ACP Coordinators to: NATO Headquarters, NHQC3S/ICOISB, NATO ACP Manager, Room T-3068, Boulevard Leopold III, B-1110, Brussels, Belgium.

CHAPTER 1

GENERAL INFORMATION

PURPOSE

101. ACP 198 NATO SUPP-1(G) supplements the current edition of ACP 198N, establishing policy and procedures for the preparation and life cycle management of NATO Supplements to Allied Communication Publications (ACPs). It also provides specific NATO procedures for adoption of ACPs (hereafter referred to as "basic ACPs") and their General Supplements published and offered for use to NATO by the Combined Communications Electronics Board (CCEB). It reflects the overall philosophy of the NATO ACP programme. Where the ACP 198 and ACP 198 NATO SUPP-1(G) conflict, ACP 198 NATO SUPP-1(G) shall be the overriding document.

* The CCEB is comprised of the five member nations, Australia, Canada, New Zealand, United Kingdom, and the United States and is the owner of basic ACPs.

SCOPE

102. This publication provides guidance for managing the NATO ACP programme and is applicable to all NATO organisations and personnel administering the ACP PROGRAMME on behalf of their National or NATO Command.

NATO ACP POLICY

103. This document establishes NATO policy on ACPs. This policy will regulate and determine in general terms, including coordination with NATO Nations, how the issues listed below are resolved by appropriate NATO C3 policy:

a. Identification of NATO CIS-related areas requiring ACP NATO documents, in the current situation and foreseeable future, against existing ACPs, General and NATO Supplements.

b. Identification of requirements for ACP NATO documents in cases where no basic ACP exists, general rules how NATO will proceed in such cases.

c. Permanent monitoring of basic ACPs and General Supplements, and potential NATO adoption of a basic ACP/General Supplement.

d. Identifying requirements and establishing NATO Supplements to an existing basic ACP, including the outline of its scope and purpose.

DEFINITIONS

104. The definitions of terms used in this publication are:

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:40Z
Check the source to verify that this is the current version before use.

a. **ACP Programme** – The NATO maintained and acknowledged collection of CCEB provided ACPs, NATO Supplements and NATO Nation's National Supplements. The structural elements of the program are in place to promote global procedural interoperability for NATO activities in the field of NATO CIS and C3 capability.

b. **Sponsoring Nation** - The body that owns the publication. The Combined Communication Electronics Board (CCEB) is the Sponsoring Nation for all Basic ACPs and General Supplements. The Sponsoring Nation for all NATO Supplements to ACPs is the NATO Military Committee. The producing Nation assumes this role for National Supplements.

c. **Custodian** - The Custodian is the author and/or manuscript authority of a NATO Supplement and is responsible for writing, reviewing, editing, formatting and preparing the document for publication. The Custodian also reviews basic ACPs and submits proposed amendments to the NATO ACP Manager for further distribution to the Sponsoring Nation (CCEB).

d. **Sponsoring Service Agency** - The body responsible for reproducing and distributing the publication(s) in accordance with the guidance provided in the Basic ACP 198 and this Supplement. The NATO ACP Manager is the Sponsoring Service Agency for all ACP NATO Supplements.

e. **NATO ACP Manager (NAM)**– As part of the NATO C3 Board sub-structure, the NAM is a non-commissioned Officer (NCO) post in the NATO Headquarters Consultation, Command and Control Staff (NHQC3S) responsible for the management and implementation of NATO policy for all ACPs and the coordination of all activities related to ACPs throughout NATO and the nations.

f. **National/NATO Command ACP Coordinator (NAC)** – The designated point of contact (POC) for any NATO Nation/NATO Command with regards to Basic ACPs, General and NATO Supplements.

g. **Military Committee (MC)** – NATOs highest military authority consisting of representation from each NATO country. This body is the final approval authority when considering “adoption” of new or amended Basic ACPs, General or NATO Supplements and the “cancellation” of outdated/superseded NATO Supplements.

h. **International Military Staff Communication (IMSCOM) Message** – An official signal message used to distribute announcements regarding Basic ACPs, General Supplements and/or NATO Supplements.

i. **Implementation -** The act of final approval and signature by the appropriate authority. The MC's approval indicates the contents of a Basic ACP, General Supplement or NATO Supplement is accepted and "adopted" for NATO use.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:40Z
Check the source to verify that this is the current version before use.

j. **Implementation date** - The process of establishing a specific date for all Nations/NATO commands to begin using an ACP, General Supplements or NATO Supplement following documented approval by the MC. All ACP publications will be "effective upon receipt" unless otherwise stated in the MC's Letter of Promulgation.

WEB PAGE SERVICES

105. The following web site information is provided to assist National/NATO Command ACP Coordinators with managing their internal ACP programmes. If any of the references posted on the NATO Sponsored web sites are out of date, the agency sponsoring the web site should be notified and provided with current information. Any discrepancies identified on the CCEB sponsored web site should be brought to the attention of the NAM who will in turn notify the CCEB via the USMCEB representative.

106. UNCLASSIFIED basic ACPs are available on the Internet at the following CCEB sponsored web site:

http://jcs.dtic.mil/j6/cceb/acps

107. All NATO Supplements and classified Basic ACPs can be viewed, downloaded and/or printed from the following NATO secure wan web sites:

http://c3sportal.hq.nato.int

Sponsored by NHQC3S/NATO ACP Manager.

http://sps.NCSA.nato.int/index1.htm

Sponsored by the NATO Communication and Information Systems Service Agency (NCSA).

Note: A CRONOS, MINERVA or BICES workstation is required to access the NATO Secure (NS) WAN. Contact your relevant Ministry of Defence or National/NATO Command ACP Coordinator for inquiries concerning NS WAN access and availability.

CHAPTER 2

BASIC ACPs AND GENERAL SUPPLEMENTS

GENERAL OVERVIEW

201. Basic ACPs and General Supplements are produced and distributed by the United States Military Communications and Electronics Board (USMCEB) on behalf of the CCEB nations. Basic ACPs are offered for use to NATO nations via the NATO ACP Manager's office. Basic ACPs considered for use within NATO are formally implemented by the MC, but remains the property of the CCEB.

202. National or NATO requirements that should be included in Basic ACPs or General Supplements can be submitted (by signal-message or letter) to the CCEB via the NAM, through the appropriate NAC. NACs may also offer material/corrections through the NAM for inclusion in any Basic ACP.

203. Purely National information contributed to a common document may be withdrawn or included by request from the owning Nation. In case of conflicts between documents, the NATO supplement will override Basic ACPs for NATO operations. Conflicts between Basic ACPs, General Supplements or NATO Supplements should be reported through the chain of command to the NAM via the appropriate NAC.

ORGANISATIONAL ROLES

204. Responsibility and ownership for Basic ACPs and General Supplements rests with the CCEB.

205. Overall responsibility for the management of Basic ACPs and General Supplements that have been offered for use to NATO lies with the NAM. The NAM is the central focal point for all actions related to the ACP programme and is responsible for recording the status of all ACPs and General Supplements in the ACP Database. The NAM is also responsible for promulgating implementation instructions and monitoring all changes or amendments as required.

206. A NATO organisation specialised or otherwise pre-defined, will agree to act as the Custodian of each Basic ACP and General Supplement. Any organisation may request release from that responsibility by formal request to the MC through the NAM. The Custodian is responsible for gaining consensus from NATO nations with regard to recommending the adoption of a Basic ACP or General Supplement by NATO; proposing the requirement for and producing a NATO Supplement to a Basic ACP when necessary; and recommending amendments to a Basic ACP or General Supplement. Amendments to Basic ACPs and General Supplements are to be coordinated and approved within the Custodian's hierarchy, from the national representatives forming the respective subcommittee or working group. The NAM will seek final approval from the MC prior to submitting amendments to the CCEB for consideration. The allocation of ACPs and General Supplements to a NATO Custodian is at **Annex F.**

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:40Z
Check the source to verify that this is the current version before use.

207. The NAM is required to submit a number of documents (i.e. IMSMs, IMSWMs) to initiate action and track progress of decisions made by ACP Custodians and the Military Committee. The prescribed formats for these documents are located in International Military Staff Standard Operating Procedures 9 (IMSSOP 9).

208. NACs are not to contact the CCEB or the USMCEB directly for matters concerning basic ACPs or General Supplements. All coordination will be through the NAM or NATO appointed Custodian. (For CCEB Structures and mechanisms refer to the current version of Basic ACP 198).

209. The release of Basic ACPs, General Supplements and extracts from these publications to agencies outside NATO is controlled by the CCEB. Requests for release of Basic ACPs and General Supplements to NATO Partner Nations and non-NATO nations involved in NATO operations should be made to the USMCEB via the NAM. Requests for release of a Basic ACP or General Supplement to a Partner Nation or non-NATO nation not involved in NATO operations should be made directly to the USMCEB in accordance with the guidelines provided in ACP 198. Requests for release letters submitted to the NAM must be provided in the format at **Annex H** and will follow sequential steps identified at **Annex E.**

210. Any loss or suspected compromise of classified ACPs must be reported to the NAM, who will inform the USMCEB, and all National ACP Coordinators holding the compromised or suspected compromised publication. The staff reporting the loss or compromise must coordinate the resulting action through the appropriate NAC or NATO Command staff and submit findings to the NAM. The report will contain the following information:

a. Description of the ACP (including classification).

b. Date on which the incident occurred.

c. Details of the initial investigation to include, details of the circumstances contributing to the incident, and the findings and recommendations of the investigating authority.

d. Any actions taken to preclude further incidents.

e. Any additional comments by the appropriate authorities in the chain of Command.

IMPLEMENTATION OF BASIC ACPS AND GENERAL SUPPLEMENTS

211. The following procedures will apply for implementation of a Basic ACP or General Supplement in NATO:

a. The NAM will forward the publication to the C3B.

b. The C3B must agree to the contents of the publication or determine if there is a need for a NATO Supplement.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:40Z
Check the source to verify that this is the current version before use.

c. The C3B will notify the NAM of their decision on implementation.

d. The NAM will send the publication to the MC for approval of NATO implementation. (Procedures are described at **Annex A**)

e. All ACPs will be effective upon receipt unless otherwise stated in the MC's Letter of Promulgation.

212. The **effective date** of a new ACP or General Supplement "for CCEB" nations will be stated in the correlated CCEB Letter of Promulgation enclosed in the publication. The MC should determine the NATO Effective Date by approving a MC Letter of Promulgation provided by the NAM. The NAM will disseminate the effective date to NACs via an IMSCOM message to Address Indicator Group (AIG) 6000.

a. The NATO Effective Date can be provided in two formats:

(a) "Effective Upon Receipt".

(b) "Effective as of… (date)" or Implementation Date. This will apply when the publication must be brought into effect simultaneously by all NACs. This date will also be included in the official MC Letter of Promulgation and IMSCOM message.

b. An ACP Quarterly Status Report will be transmitted by MODUK to AIG 6177. The NAM will in turn send the status report via an IMSCOM message to AIG 6000. The purpose of this report is to synchronise ACP publication libraries throughout NATO. Additional details are outlined in paragraph 215, Maintenance.

DISTRIBUTION

213. The distribution and issue of classified Basic ACPs and/or General Supplements to NACs, NATO agencies and Custodians are carried out by the Sponsoring Service Agency (USMCEB) via the Ministry of Defence United Kingdom (MODUK) ACP Coordinator.

214. All Basic ACPs that are classified RESTRICTED and above will be promulgated by the MODUK ACP Coordinator on a single CD-ROM (CCEB2) in **.**pdf format. Each shipment of CD-ROMs will include a receipt that must be signed by the NAC and returned to the MODUK ACP Coordinator. Upon receipt of the CD-ROMs, users may install as many copies of the publications as required following instructions outlined in the README file. The USMCEB will forward one electronic copy of classified ACPs in .pdf format to the NAM. NACs may log onto the CCEB web site and download unclassified ACPs, print and distribute as many copies of the documents as required. However, when documents are retrieved in this way, it will be the individual's responsibility for keeping the document current. Nations unable to obtain Basic ACPs and General Supplements from the CCEB Web site are to inform the NAM who will provide a single electronic .pdf file of each publication. NATO nations, NATO commands and NATO Agencies are responsible for meeting their own internal printing and distribution requirements.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:40Z
Check the source to verify that this is the current version before use.

MAINTENANCE

215. AMENDMENT REQUESTS Basic ACPs are managed in accordance with Basic ACP 198 procedures. All amendment requests for Basic ACPs should be submitted through the NAM, who will forward the request to the

216. C3B. The C3B will review the request to ensure the content is in harmony with NATOs requirements. Once consensus has been achieved, the NAM will forward the change request directly to the USMCEB for the attention of the CCEB. Additional details concerning the general NATO rules for amendments are noted at **Annex B.**

MESSAGE CORRECTIONS

217. The USMCEB will promulgate factual amendments CCEB-wide by Joint Allied Force Publication (JAFPUB) signal message, detailing the change. The JAFPUB will also be addressed to the NATO ACP Manager (NAMILCOM) who will retransmit to AIG 6000 via an IMSCOM message. NACs are to ensure internal distribution to subordinate units/commands is accomplished. Dependent upon the classification of the ACP, holders of CD-ROMs will receive retransmissions as follows:

a. Amendments will be announced via message to AIG 6178 for RESTRICTED/CONFIDENTIAL ACPs contained on CD-ROM entitled CCEB 2.

b. Amendments for ACPs available on the Internet ACP web page will be announced via message to AIG 6177.

DISPOSAL

218. Any CCEB nation may recommend the cancellation of a Basic ACP. Once the ACP has been approved for cancellation, a JAFPUB signal message is sent by the USMCEB coordinator announcing the ACP cancellation. At this point, the ACP may be retained for historical purposes, but will no longer be maintained by the CCEB.

219. The NAM will inform the Custodian of the CCEBs decision. The Custodian will determine if this will have any impact on future NATO operations. The Custodian will then determine whether NATO needs to develop another document (e.g. STANAG, APP) to replace the ACP, or simply cancel the ACP and take no further action. The Custodian will forward their recommendations under a cover letter to the NAM. The NAM will then submit the recommendations to the MC for endorsement. The final decision of the MC will be announced via an IMSCOM message and will include the ACP number, title and date it was approved for cancellation. Cancelled Basic ACPs will be destroyed in accordance with NATO security instructions.

CHAPTER 3

NATO SUPPLEMENTS

GENERAL OVERVIEW

301. NATO Supplements are produced by a Custodian and distributed by the NAM. NATO Supplements contain specific communication instructions issued for the guidance and operation of NATO Military Forces. They amplify or supplement the Basic ACPs and are the property of the MC.

ORGANISATIONAL ROLES

302. The NAM, acting on behalf of the MC, is responsible for the overall management of all NATO Supplements.

303. Each NATO Supplement will be sponsored by a NATO organisation specialised or otherwise predefined, as regards to content and applicability. The process of assignment will be finalised by amending ACP 198 NATO SUPP –1, **Annex F** to list the organisation against the publication. Any agency may request release from that responsibility by formal request to the MC through the NAM.

304. The Custodian is responsible for gaining consensus from NATO nations with regard to recommending the adoption of a NATO Supplement; the maintenance of the document once adopted, and for ensuring the document is in harmony with the Basic ACP, Allied Publications, STANAGs and procedures in their area of responsibility. Such recommendations are to be forwarded to the NAM who will staff the final correspondence to the MC for approval.

305. The MC is the body responsible for approving the implementation of "All" ACP documents to include Basic ACPs, General Supplements and NATO Supplements. The MC under a shortened "Silence Procedure" considers publications for implementation.

306. The NAM will forward drafts of all NATO Supplements to the NATO Standardisation Agency (NSA). This will ensure a cross-reference with other NATO related documents to eliminate the possibility of conflict.

307. Requests for the release of NATO Supplements and extracts from these publications to agencies outside NATO (including Invitees and Partner nations) should be submitted by formal request to the MC through the NAM. The request must be submitted in the format as annotated at **Annex H** and will adhere to procedures at **Annex E**.

ESTABLISHMENT OF NATO SUPPLEMENTS

PREPARATION

308. A NATO Supplement is created to supplement Basic ACPs when additional or supplementary information is required to address NATO specific operational procedures.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:40Z
Check the source to verify that this is the current version before use.

During a review of the Basic ACP by the appointed Custodian, a decision will be made regarding the need for a NATO Supplement and gaining of consensus from national representatives.

309. The Custodian will prepare a draft version of the new NATO Supplement following the principles described in ACP 198 NATO SUPP-1, **Annex C**. The draft will comply with the format as detailed in the Basic ACP 198. The following are three exceptions to this particular format description: Annexes will be placed at the very end of publications, paper size will be A4 European, and the language will be English (United Kingdom).

310. NATO Supplements shall be distributed in draft format to determine content conflict identification when compared to other NATO documents. Supplements may include references to Allied Publications or Standardisation Agreements (STANAGs) or other commonly available documents where appropriate, for reference only. A report of conflict will prevent the activation of the document until the conflict has been resolved.

311. After finalisation of its internal coordination and approval procedures, including gaining consensus with the Nations and involvement of appropriate Subject Matter Experts, the Custodian will forward the final draft to the NAM, who will then staff the document for the attention of the MC.

IMPLEMENTATION

312. The MC under a shortened Silence Procedure approves implementation of a NATO Supplement. Once the publication is endorsed by the MC for NATO wide implementation, the NAM will send an IMSCOM message to AIG 6000 indicating the effective date the NATO Supplement is approved for use. This date will be identical to the date identified in the Letter of Promulgation. The Effective Date may be provided in two formats:

a. "Effective Upon Receipt"

b. "Effective as of…. (date)". This will apply, when the material must be brought into effect simultaneously by all holders.

313. If the MC deems it necessary for implementation at all locations simultaneously, the NAM will poll all NACs to confirm the publications have been received and all conditions have been met for full implementation.

314. All NACs should acknowledge receipt of the publication and full implementation, once accomplished, by signal message to NAMILCOM. Once implemented, the NATO Supplement will govern unless specific instructions to the contrary have been issued.

DISTRIBUTION

315. The NAM carries out production and distribution of NATO Supplements and the promulgation of amendments to NACs, NATO Agencies and Custodians.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:40Z
Check the source to verify that this is the current version before use.

316. Documents classified NATO RESTRICTED and below will be on a single CD-ROM labelled (NATO1) and all documents classified NATO CONFIDENTIAL on a single CD-ROM labelled (NATO2). The documents will only be distributed in .pdf format.

317. Users may print or download adequate numbers of the publication and create adequate copies of the CD-ROMs, as required for internal distribution. In the case of Classified CD-ROMS, NATO accounting and security procedures should be followed.

318. The NAM will notify the NACs by IMSCOM message of any intended change/amendment that is out of the normal production cycle so they may properly plan for the distribution cost to be included in their budgets (where necessary). This will only apply if the change or review cannot be included in the normal issue of new editions of CD-ROMs.

319. The general rule is that each CD-ROM issued will be valid for two years. The NAM will then update all NATO Supplements every even year (e.g. 2006, 2008, etc…). The new edition of the CD-ROM will include all message corrections and changes that have been issued against each document over the previous two years. Custodians of NATO Supplements will be required to carry out "cyclical reviews" every two years in line with the issue of the new CD-ROMs. Each CD-ROM will have an edition date printed on the front cover (e.g. APRIL 2002). Amended or revised publications must reach the NAM in .doc and .pdf format no later than 1 March every even year (e.g. 2006, 2008, etc…). Subsequent CD-ROMS will be issued during April of each even year. All revisions/amendments will be incorporated in the new issue.

MAINTENANCE

AMENDMENTS

320. The Custodian for each NATO Supplement will maintain a record of all forth-coming and released amendments and issued message corrections.

321. The NAM will determine whether an amendment request requires immediate action or can be addressed at the next meeting of the relevant Custodian. Coordination of amendments requiring immediate action will be the responsibility of the NAM, who will ensure the expeditious staffing of the change through the Custodian under a shortened "Silence Procedure".

322. Amendment requests to NATO Supplements may be initiated by any NATO user, and should be staffed through the appropriate NAC to the NAM. A number of ACP Supplements require periodic amendment to maintain accuracy and relevance following the initial issue. To efficiently manage the process, there are two categories of amendments:

- Major Amendments and
- Minor Amendments

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:40Z
Check the source to verify that this is the current version before use.

323. Major amendments are those that incorporate numerous minor changes, affect the intent and/or significantly change the directives within the publication. With each revision the edition of the publication changes.

324. The Custodian will prepare the revision in detail in accordance with (Basic) ACP 198 procedures (e.g. formatting of the document, with exceptions noted in paragraph 309). This is in addition to the Custodian's normal internal coordination and approval procedures, including gaining consensus from nations under "Silence Procedure". Upon completion, the Custodian will forward an electronic copy in .doc format to the NAM under cover of a letter. The letter should provide the background information that necessitated the revision, and guidance for the implementation of the publication.

325. The NAM will review the publication for grammatical or formatting errors and make corrections if necessary. The draft will then be submitted to the MC via an International Military Staff Working Memorandum[1] (IMSWM) under Silence Procedure for a reduced period of time.

326. Minor amendments are those changes that include factual changes and editorial wording changes, often an addition, deletion, or alteration to a list-type publication (e.g. ACP 100 NATO SUPP–1(M) and ACP 117 NATO SUPP–1(O). For example, a NATO Supplement containing a list of message routing indicators for military units involved in contingencies or exercises would require periodic updates during unit rotations or to accommodate the addition of new command elements. For the publication to remain updated requires frequent amendments to the list of military units and routing indicators. The majority of minor amendments will usually concern NATO Supplements 100, 117 and 176. The Custodian can make minor amendments without recourse to consensus and Silence Procedures.

327. Unless specified in the document concerned, NACs forward minor amendment requests to the Custodian via the NAM. Cognisant Authorities should request changes directly to the Custodian. This is currently the procedure for:

ACP 100 NATO SUPP-1 (M) NATO AIG Message Addressing	NCSA
ACP 117 NATO SUPP-1 NATO Message Addressing	NCSA
ACP 117 NATO SUPP-2 NATO Subject Indicator System NASIS	NCSA

328. Line changes for minor amendments to publications are as defined in the individual document. Where the document does not include such procedures, the Custodian will notify all NACs by formal message. The notification will include:

- Document Edition
- Number of Line Change
- Date of Change Order
- Effective Date

[1] Guidance for drafting the IMSWM is located in IMSSOP 9.

Check the source to verify that this is the current version before use.

- Releasing Authority
- Point of Contact

329. Normally, all other proposed amendments to ACPs, General Supplements, and most NATO Supplements represent major amendments, requiring a thorough review, and will be submitted by NACs to the NAM for processing through the relevant Custodian and the MC. The proposals should be forwarded to:

a. Postal address for documents at the "unclassified" level:

NATO Headquarters
NHQC3S/ICOISB
NATO ACP Manager Room T-3068
Boulevard Leopold III 1110 Brussels, Belgium

b. Signal Message Address, "classified" up to NATO SECRET:

NAMILCOM (SIC = SRZ)

c. E-mail Address "unclassified" level:

acp@hq.nato.int

330. Authorities submitting proposed amendments will:

a. Ensure the proposed amendment has been staffed through the NAC of the Nation.

b. Ensure that the proposed amendments constitute the complete action required.

c. Reference **Annex D** and confirm that preliminary correlation has been made with other Allied Publications so that the proposed amendments are consistent throughout all applicable publications.

d. Verify that there are no other actions currently in process that address the same area(s).

e. Submit proposed amendments in the format shown in **Annex G.**

f. Include paragraph markings for Classified ACPs, General Supplements, and NATO Supplements.

331. Proposed amendments (other than Minor Amendment) forwarded to the NAM will be processed as follows**:**

a. The proposed amendment is reviewed by the NAM to avoid duplication.

b. The proposed amendment is then forwarded to the Custodian for initial consideration. During the process of gaining consensus for the amendment

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:40Z
Check the source to verify that this is the current version before use.

("Silence Procedure" normally lasting 4 weeks) nations and the NATO Commands should ensure relevant SMEs and NACs are consulted as necessary.

c. If the Custodian does not agree to the proposed amendment, it is returned to the originator, via the NAM under a cover letter with comments explaining why it was not accepted.

d. If the Custodian agrees to the proposed amendment (sometimes modified in the staffing process) it is returned to the NAM.

e. Dependent on the type of amendment and recommendations received from the Custodian the NAM will:

(a) Pass the proposed amendment for Basic ACPs and General Supplements to the CCEB, via the USMCEB.

(b) Pass the proposed amendment for NATO Supplements to the Military Committee for approval.

(c) Initiate implementation of the change.

MESSAGE CORRECTIONS

332. NATO Commands, NCSA and the NAM on behalf of other Custodians of NATO Supplements will promulgate minor amendments NATO-wide by signal message using AIGs (e.g. MC by AIG 6000, SACT by SACPUBGEN or by AIG 5048, and NCSA SPS DMC by AIG 5026) detailing the change. Dependent upon the classification of the NATO Supplement, holders of CD-ROMs will receive retransmissions as follows:

a. Amendments for CONFIDENTIAL NATO Supplements contained on CD-ROM entitled NATO 2 will be sent to AIG 6180.

b. Amendments for RESTRICTED NATO Supplements contained on CD-ROM entitled NATO 2 will be sent to AIG 6179.

333. Any correction, (except minor amendments), that require coordination with the Custodian and promulgation by signal message must be forwarded to the NAM for processing. The relevant Custodian will staff the proposed change. If consensus is achieved, the NAM will proceed with the change.

334. The NAM will include in the "Record of Changes and Corrections" of the next CD-ROM to be distributed, a record of all corrections that have been included in the previous CD-ROM unless a new edition of the document is distributed. If a new edition is distributed, all previous message corrections will be included in the release. Distribution of a new edition will require implementation procedures to be initiated by the NAM.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:40Z
Check the source to verify that this is the current version before use.

ACP STATUS REPORTS

335. The NAM is responsible for the maintenance of the NATO ACP programme. The effectiveness of the programme is ensured by the promulgation of the ACP Quarterly Status Report to AIG 6000 and AIG 6177. The status report is a current list of all ACPs, General Supplements and NATO Supplements. It identifies the current edition of each publication, the message correction number for specific ACPs and is current as of the date of transmission. Within their area of responsibility, each NAC will be responsible for further distribution of this quarterly status report, and any additional status information, to ensure all offices, libraries and documentation centres are maintaining the most current ACP publications in use by NATO.

DISPOSAL

336. Any NATO nation, Custodian or NAC may recommend the cancellation of a NATO Supplement. All requests for cancellation of NATO Supplements must be submitted to the NAM. The NAM will submit the request to the Custodian responsible for the particular publication. The Custodian will make recommendations concerning cancellation by gaining consensus from all National representatives. If consensus is reached to cancel the publication, the NAM will forward the recommendation of the Custodian to the MC for approval. The final decision of the MC will be announced via an IMSCOM message and will include the NATO Supplement number, title and date it was approved for cancellation. Cancelled NATO Supplements will be destroyed in accordance with NATO security instructions.

337. If the Custodian or MC decides against cancellation, the NAM will notify the originator of the reasons leading to the rejection of the request.

338. The NAM will update the ACP database to reflect the final status.

NATIONAL/NATO ACP COORDINATORS MEETING

339. It may be necessary to schedule extraordinary meetings to discuss ongoing ACP issues. NACs may request a meeting, but the decision on whether to hold a meeting or not will be made on the advice of the NAM to the Director NHQC3S. Meeting locations and conferencing facilities will need to be provided on a voluntary basis by one of the NACs. The NAM will gather all pertinent information including the proposed agenda, host and facility locations, and distribute to all NACs via an IMSCOM message two months in advance of the agreed upon meeting date.

ANNEX G TO
CHAPTER 3 TO
ACP 198 NATO SUPP-1(G)

FORMAT FOR ACP AMENDMENT REQUEST

The following is the table format for specific comments to ACPs with examples:

Review of ACP ###

Number	Identification	Exact proposal	Rationale	Importance	Custodian Use Only
1	General	Redraft the Entire Document	Need to incorporate modern technology and systems and delete out dated material	C	
2	Chapter 1 para 2 line 4	The word "communication is misspelled		E	
3	Chapter 2 sub para 201 a.	Line 3 delete "intra-service" and insert "combined"	Terms have changed	S	

* The importance of the change/amendment is divided into three categories as follows:
Critical (C)- Comments that must be changed or the country will not agree with the final product overall;
Substantive (S)- Changes would significantly improve the document/chapter or is needed for clarity; and
Editorial (E)- Changes that are grammatical or related to spelling, consistency, etc.
Note: The Custodian will seek consensus from all Nations regarding the inclusion of the recommended change to the ACP or NATO Supplement.

ANNEX H TO
CHAPTER 3 TO
ACP 198 NATO SUPP-1(G)

FORMAT FOR REQUEST FOR RELEASE LETTER

Date of Request

FROM: Name of NAC.
Nation and Organisation making the request:
Complete Mailing Address:
Commercial Telephone Number

Subject: Request for Release of Basic ACP 198, etc…

To: NATO Headquarters C3 Staff
NATO ACP Manager
Room T-3068
Boulevard Leopold III, B-1110, Brussels.

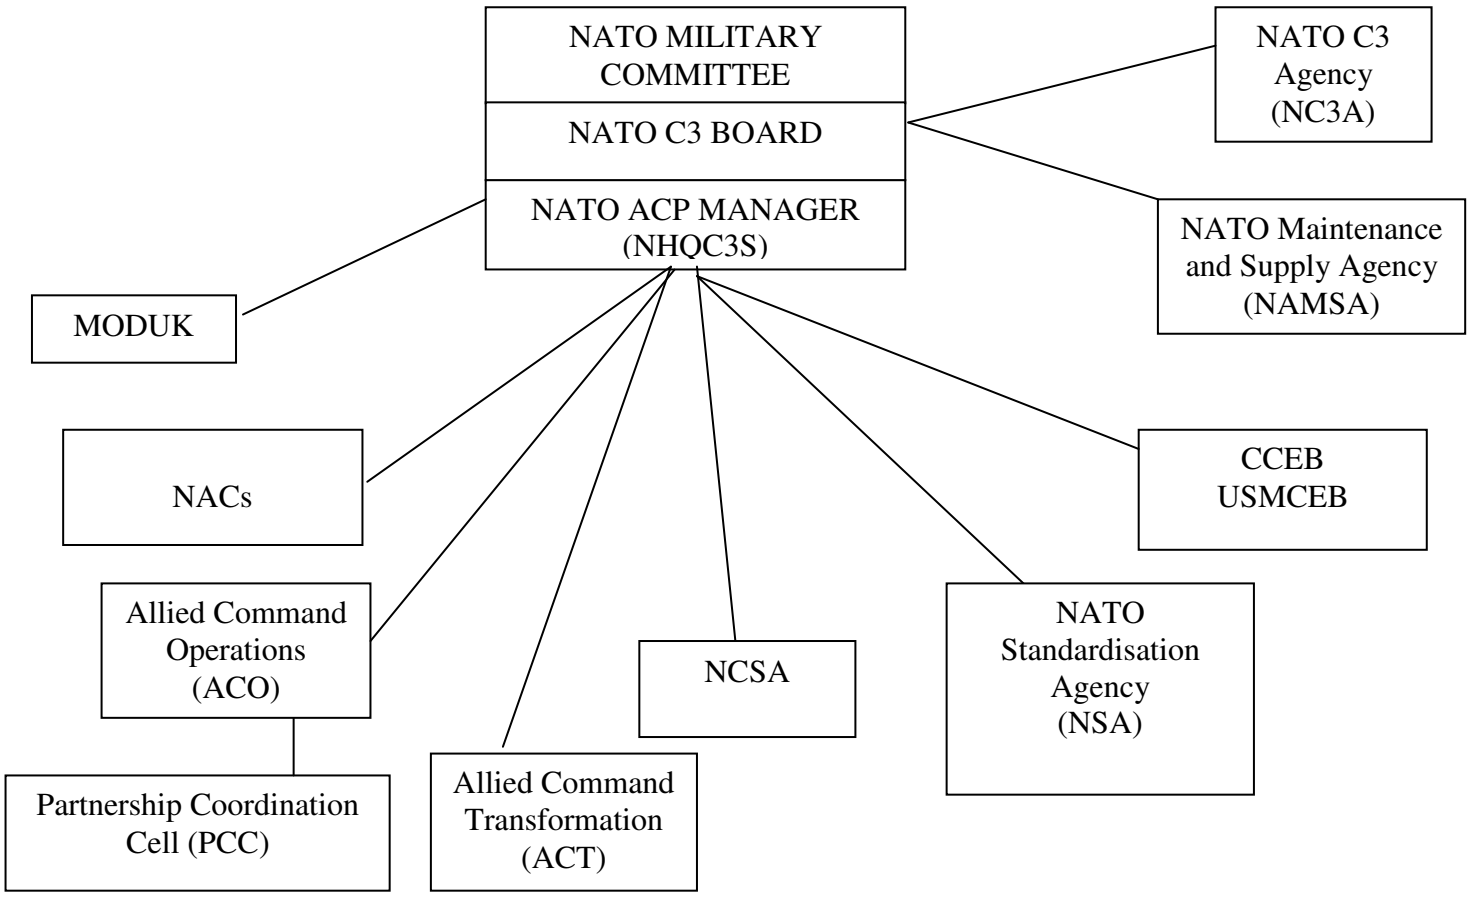

1. In this paragraph include short title of the ACP, (e.g. ACP 190 NATO SUPP-1(A) the reason you are requesting the release of the publication. Also state if you require an entire release or just a partial release and specify the page numbers or chapter required. In some instances, you may only be approved for a partial release due the classification level of the information in the publication. Security Clearance status must also be documented in this paragraph.

Typed Name and Signature of Requester

ANNEX I TO
CHAPTER 3 TO
ACP 198 NATO SUPP-1(G)

NATO ACP ORGANISATION

.

Figure 1-1: NATO ACP Organisation Scheme

a. The Structure shows the coordination of ACPs within NATO. Coordination between CCEB and NATO is achieved by single point of entry. Because of the situation in Europe, SHAPE endorses the requirements of Partners for Peace (PfP).

b. NAMSA and NC3A are users of the ACP programme and are consulted by NC3B when needed. NCSA plays an active part of the NATO ACP Structure by operating the CIS assets that NATO Supplements to Basic ACPs support.

c. NSA is an agency not directly associated with the NC3B, but is responsible for Standardization in NATO.

ANNEX J TO
CHAPTER 3 TO
ACP 198 NATO SUPP-1(G)

NATIONAL/NATO COMMAND ACP COORDINATOR – TERMS OF REFERENCE

Position: National or NATO Command Allied Communications Publications Coordinator

	TASK	WHAT IS EXPECTED
1	General Requirements	**Essential** Work in a multi Service environment such as MOD, Chief of Defence or National Defence Headquarters that serves all National military forces (Army, Air Force, Navy, Marines, Government etc.). Hold a security clearance of no less than NATO Secret. Have a good working knowledge of the English language Have or have access to an email address and Signals Message Address (SMA). Be the single National point of contact for basic ACPs, General Supplements and NATO Supplements. Have access to NATO Secret WAN terminal. **Desirable** Have a good working knowledge of NATO Communication systems and procedures. Have a recognisable chain of command through which to pass ideas/suggestions/decisions from meetings through the minutes of those meetings. Be in post for a reasonable length of time. This post cannot be gapped (always somebody to be in that post). Ensure funds and time is available to attend up to two ACP Coordinators meeting per year. Non-attendees must submit NAC's position paper and comments to the agenda.
2	Hosting / Meeting Duties	Consider hosting ACP Coordinators meeting Provide facilities, help liaise for accommodations etc. Provide administrative services.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:40Z
Check the source to verify that this is the current version before use.

3	Carrying out Directives	Promptly action NAMILCOM/NCSA/USMCEB/MODUK messages. Ensure NAMILCOM/NCSA/USMCEB/MODUK messages are reaching appropriate locations within the nation and being actioned. Ensure if ACPs or Supplements are ordered, that they are reviewed, and any directive is carried out by the deadline. Action requests for missing corrections, changes, etc. Ensure internal distribution of the ACP Quarterly Status signal (AIG 6000), to subordinates.
4	Management of ACPs/Supps	Coordinate the national distribution of publications with distribution authorities as required. Maintain national distribution lists and approve individual issues for each publication. Promulgate nationally the implementation date of publications as required. Identify National Subject Matter Experts (NSME) for each subject covered by ACPs and Supplements. Ensure that each distribution of a new basic ACP includes the appropriate National Letter of Promulgation if required (NATO Supplements will have a NATO LOP). Consolidate national requirements for changes and forward requests to the publication sponsor in accordance with established procedures, i.e., ACP 100 NATO SUPP-1 requests go to sponsoring agency, not the sponsoring Nation. Liaise with issuing authorities to approve the release of publications to non-military organisations/non-member nations and confirm to the issuing authority that each organisation can meet the handling and storage requirements in accordance with NATO/Allied/national security requirements. Ensure budgetary requirements are available for ACPs and Supplements.
5	Miscellaneous	Maintain up-to-date files on ACPs and Supplements, as well as ACP issues. Ensure chain of command is aware of ACP/Supplements issues and seek approval of decisions where necessary. Provide regular comments/suggestions on how to improve ACP distribution, update process or other ACP policy related issues.
