4.5.1: Change paragraph to read:

"4.5.1 Pull Test of Hose Assembly.-The hose assembly shall be assembled to the applicable test fixture specified in 4.4. The load as specified on the applicable drawing shall be applied between the nut and the connector in a direction so as to tend to separate the nut and the connector from the hose. This is a destructive test; all hose assemblies undergoing this test shall not be returned to the production lot. Failure of the sample hose assembly to withstand the pull force as stated by the drawing shall reject the lot represented by the sample."
