COMMERCIAL ITEM DESCRIPTION

BONE DUST REMOVING MACHINE, WITH NYLON BRUSHES

The General Services Administration has authorized the use of this commercial item description.

Salient characteristics.

The entire cabinet, including the processing surface and the removable tray that collects bone dust, shall be fabricated from stainless steel. All components that come in contact with the meat shall be removable for cleaning. Bone dust removal shall be accomplished by means of motor-driven brushes. Brushes shall be spring-mounted and fabricated from a nylon material normally used by the manufacturer for this purpose. The machine shall have nominal dimensions of 36 inches high, 29 inches wide, 23 inches deep and shall be mounted on adjustable legs.

Electrical Characteristics. Unless otherwise specified in the contract or order, the machine shall be designed to operate on 115 volts, 60 Hertz, single-phase power supply. The motor shall be not less than 1/3 horsepower. The machine shall be equipped with a knee-operated switch. The power supply cord shall be 12 feet long with ground. The plug shall conform to National Electrical Manufacturers Association (NEMA) WD 1 configuration 5-15P. Wiring shall be in accordance with NEMA WC 5 or NEMA WC 7.

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

Preservation, packaging, packing, labeling and marking. Preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.

Notes. Purchaser should specify the following:

a. Electrical requirements, if other than as specified.
b. Preservation, packaging, packing, labeling and marking required.

FSC 7320

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.
