GGG-C-771d
INTERIM AMENDMENT-1
August 27, 1964

INTERIM AMENDMENT TO

FEDERAL SPECIFICATION

CUTTERS, PIPE; AND CUTTERS, TUBE

This Interim Amendment was developed by the Standardization Division, Federal Supply Service, General Services Administration, Washington, D. C. 20407, based upon currently available technical information. It is recommended that Federal agencies use it in procurement and forward recommendations for changes to the preparing activity at the address shown above. The General Services Administration has authorized Federal agencies to use this Interim Amendment as a valid exception to Federal Specification GGG-C-771d dated January 31, 1964.

Page 6, table VI, add these figures under columns as follows:

Minimum cutting range (tube O.D.)	Weight of cutter, Maximum	Overall length in fully opened position, Maximum
Inches	Ounces	Inches
1/8--1/2	4	2-1/8

Page 6, add paragraph 3.9.5.5 in proper sequence:

"3.9.5.5 Cutters with 1/8 to 1/2 inch minimum cutting range shall be in accordance with 3.9 except:

a. Rollers shall be at the option of the manufacturer. When rollers are not used, the cutter frame shall be designed with a "V" groove to contain and align the tubing during the cutting operation.

b. A deburring tool shall not be required for this size cutter.

c. The distance from the center of any tube, size 1/8 to 1/2 inch, to the outermost point of the cutter shall not exceed 1-5/16 inches."
