FEDERAL SPECIFICATION SHEET

STAMPING AND MARKING EQUIPMENT; DIES, METAL STAMPING, HAND TYPE

This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

The complete requirements for procuring the dies described herein shall consist of this document and the issue in effect of Federal Specification GGG-S-735/GEN.

REQUIREMENTS:

Configuration: The die shall conform to the requirements specified on figure 1.

Material: The die shall be high-grade alloy tool steel square bar stock that shall have a Rockwell "C" hardness of 60 to 63 at the pattern end; a Rockwell "C" hardness of 49 to 53 at the striking end, and a Rockwell "C" hardness of 55 to 60 on the shank midway between the two ends, when tested for conformance to the end item test requirements of the general specification.

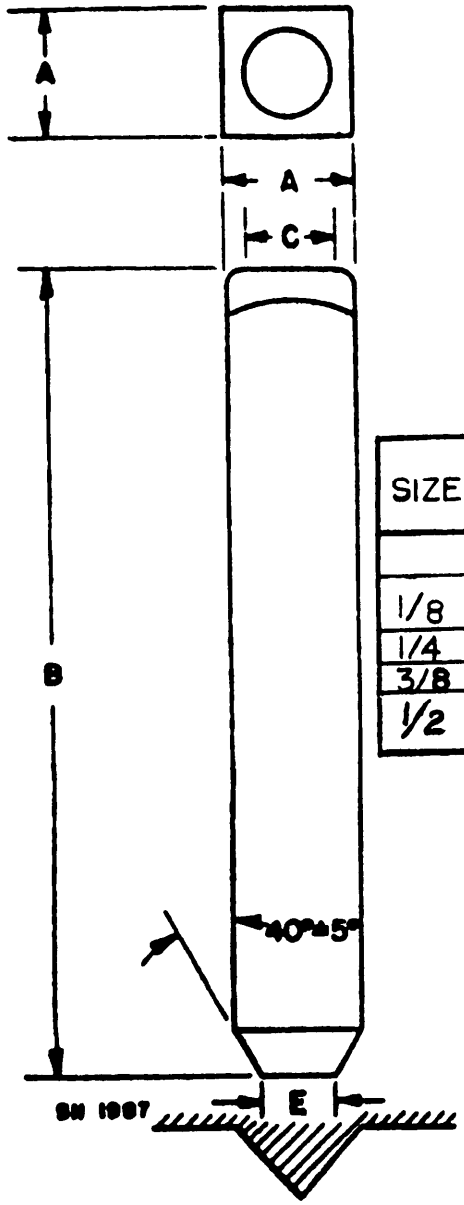

The pattern shall be cut in such a manner as to produce a clear impression on castings, steel forgings, weldments, armor plate and various other materials. The pattern shall have sufficient width at the base of cut to minimize the possibility of chipping off when in use.

The die shall show no evidence of failure on the pattern or the striking end when tested for conformance to the end item test requirements of the general specification.
The manufacturer's name or trademark shall be located on the side of the die adjacent to the pattern bottom.

Part Number: GGGS735-5P - Partial Inspection Approval
GGGS735-5C - Complete Inspection Approval
