AMENDMENT

TO

INTERIM FEDERAL SPECIFICATION

TROWELS

This amendment was developed by Standardization Division, Federal Supply Service, General Services Administration, Washington, D. C., 20405, based upon currently available technical information. It is recommended that Federal agencies use it in procurement and forward recommendations for changes to the preparing activity at the address shown above.

The General Services Administration has authorized the use of this amendment as a valid exception to Interim Federal Specification GGG-T-00671b(GSA-FSS), dated December 11, 1967.

PAGE 2

Paragraph 3.3.1: Delete and substitute:

3.3.1 Blades. Blades shall be of high-carbon tool steel of not less than AISI 1095 for types I, II, and V trowels, and AISI 1070 to 1095 for types III, IV, VI, VII, VIII, and IX trowels.

PAGE 3

Paragraph 3.4.3: Delete last sentence and substitute: "If rivets or pins are used which extend through the blades of types I, II, and V trowels, they shall be flush with the surface of the blade. The mounting shall be free of burrs or rough edges."

PAGE 11

Insert the following:

6. NOTES

6.1 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents:

(a) Title, number, and date of this specification.
(b) Type and class required (see 1.2.1).
(c) Size required (see applicable table).
(d) Selection of applicable level of preservation, packaging and packing (see 5.1).
