MIL-C-40106B

14 November 1967

SUPERSEDING
MIL-C-40106A
7 June 1963

MILITARY SPECIFICATION

CUTTING WHEEL, PASTRY

This specification is mandatory for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 This specification covers one type of pastry cutting wheel.

2. APPLICABLE DOCUMENTS

2.1 The following documents, of the issue in effect on date of invitation for bids, or request for proposal, form a part of this specification to the extent specified herein:

SPECIFICATIONS

FEDERAL

UU-P-268 - Paper, Kraft, Untreated, Wrapping
PPP-B-566 - Box, Folding, Paperboard
PPP-B-636 - Box, Fiberboard
PPP-B-676 - Box, Setup
PPP-T-45 - Tape, Gummed, Paper Reinforced and Plain for Sealing and Securing

STANDARDS

FEDERAL

Fed. Test Method Std. No. 151 - Methods: Test Methods

MILITARY

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes
MIL-STD-129 - Marking for Shipment and Storage
MIL-STD-130 - Identification Marking of U.S. Military Property

FSC 7330

(Copies of specifications and standards, required by suppliers in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

2.2 Other publications.- The following documents form a part of this specification to the extent specified herein. Unless otherwise indicated the issue in effect on date of invitation for bids or request for proposal shall apply.

AMERICAN SOCIETY FOR TESTING AND MATERIALS (ASTM)

ASTM Standard Specification A176-63 - Corrosion-Resisting Chromium Steel Plate, Sheet, and Strip

(Application for copies should be addressed to the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pa. 19106.)

(Technical society and technical association specifications and standards are generally available for reference from libraries. They are also distributed among technical groups and using Federal agencies.)

3. REQUIREMENTS

3.1 Preproduction sample.- When specified (see 6.2), before production is commenced, a sample pastry cutting wheel shall be submitted or made available to the contracting officer or his authorized representative for approval in accordance with 4.2. The approval of the preproduction sample authorizes the commencement of production, but does not relieve the supplier of responsibility for compliance with all applicable provisions of this specification. The preproduction sample shall be manufactured in the same facilities to be used for the manufacture of the production items.

3.2 Standard product.- The pastry cutting wheel delivered under this specification shall be the manufacturer's commercially current standard product, except for any changes necessary to comply with specification requirements.

3.3 Material.- Material not definitely specified shall be of the quality normally used by the manufacturer in his commercial pastry cutting wheel. Commercial tolerances shall apply to metal thicknesses.

3.3.1 Corrosion-resisting steel.- Corrosion-resisting steel shall conform to the chemical composition of type 410, ASTM A176-63. The Rockwell hardness shall be not less than 15-N 80.5 when tested as specified in 4.3.1.1.

Source: https://assist.dla.mil -- Downloaded: 202640-21T19:16Z
Check the source to verify that this is the current version before use.

3.4 Construction.- The pastry cutting wheel shall consist of a cutting wheel, wheel-attaching screw and nut, and a handle.

3.4.1 Cutting wheel.- The cutting wheel shall be corrosion-resisting steel specified in 3.3.1, 4 to 4-1/2 inches (in) in diameter and at least 0.035 in. thick. The circumference of the wheel shall have a knife edge.

3.4.2 Handle and wheel support.- The handle and wheel support shall be one piece of metal, with the manufacturer's standard finish. The handle part shall be at least 4 inches long, shaped to fit the hand.

3.4.3 Wheel-screw.- The wheel-attaching screw and nut shall be corrosion-resisting steel specified in 3.3.1.

3.5 Finish.- The wheel, except the cutting edge, shall have a No. 4, or better, standard polish.

3.6 Marking for identification.- The letters "U.S.", the manufacturers name, trade name or trademark shall be legibly marked on each cutting wheel or handle in accordance with MIL-STD-130.

3.7 Workmanship.- The finished pastry cutting wheel shall be free from defects that affect appearance or serviceability: dents, punctures, fractures, rough edges, burrs, slivers. The wheel shall be circular and uniformly sharp. The wheel-fastening screw shall not be stripped or otherwise deformed. The handle shall be smooth and comfortable to the hand. All components shall be carefully assembled, properly adjusted and aligned.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection.- Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.2 Preproduction sample inspection.- When a preproduction sample is required, the preproduction sample shall be examined for the defects in table I and specified dimensions.

4.3 Inspection. Sampling for inspection shall be made in accordance with the provisions set forth in MIL-STD-105, except where otherwise indicated hereinafter.

Check the source to verify that this is the current version before use.

4.3.1 Component and material inspection.- In accordance with 4.1 above, components and materials shall be inspected and tested in accordance with all the requirements of referenced specifications and standards unless otherwise excluded, amended, modified, or qualified in this specification or applicable purchase document.

4.3.1.1 Intermediate testing of cutting wheel.- The cutting wheel shall be tested in accordance with Method No. 243 of Fed. Test Method Std. No. 151 for conformance with the hardness requirement of 3.2.1. The sample unit shall be one cutting wheel. The lot shall be the number of cutting wheels offered for acceptance at one time. The inspection level shall be S-2, with an acceptable quality level (AQL) of 4.0 defects, expressed in terms of defects per hundred units.

4.3.2 End item inspection.- The inspection lot shall be the number of pastry cutting wheels offered for inspection at one time. The sample unit for the inspection shall be one complete pastry cutting wheel.

4.3.2.1 Visual examination.- Examination of the end item shall be made for defects in table I. The inspection level shall be level II with an AQL of 2.5 for major defects and 6.5 for total defects, expressed in terms of defects per hundred units.

TABLE I.- Classification of visual defects

Examine	Defect	Classification Major	Minor
Finish	Corrosion-resisting steel cutting wheel and frame not a number 4 polish or better	X	
Construction and workmanship	Any sharp component (except cutting edge) or rough edge slivers and burrs, missing or not secured	X	
	Circumference of wheel does not have a knife edge	X	
	Component too tight or loose	X	
	Any component fractured, dented or malformed	X	
Identification marking	Missing, incomplete, not legible		X

Check the source to verify that this is the current version before use.

4.3.2.2 Dimensional examination.- Examination shall be made of the end item to determine compliance with this specification. Any dimension that is not within the specified requirements shall be classified a defect. The inspection level shall be S-2 with an AQL of 4.0 defects, expressed in terms of defects per hundred units.

4.3.3 Examination of preparation for delivery.- An examination shall be made to determine that packaging, packing, and marking as required by section 5 of this specification are complied with. Defects shall be as specified in table II. The sample unit shall be one shipping container fully prepared for delivery. The lot shall be the number of containers offered for delivery at one time. The inspection level shall be S-2 with an AQL of 4.0 defects, expressed in terms of defects per hundred units.

TABLE II.- Examination of preparation for delivery

Examine	Defect
Marking, exterior and interior	Omitted: incorrect; illegible; improper size, location, sequence or method of application
Material	Component missing, damaged or otherwise defective
Contents	Number of pastry cutting wheels per container is more or less than specified

4.3.3.1 Examination of shipping containers.- When shipping containers are required to be in accordance with PPP-B-636, examination for defects in closure, waterproofing, and strapping shall be in accordance with PPP-B-636.

5. PREPARATION FOR DELIVERY

5.1 Packaging.- Packaging shall be level A or C as specified (see 6.2).

5.1.1 Level A.-

5.1.1.1 Unit package.- Each pastry cutting wheel shall be tightly wrapped in minimum 30 pound kraft paper conforming to grade B of UU-P-268. The wrap shall be secured with gummed paper tape conforming to type III grade A of PPP-T-45.

5.1.1.2 Intermediate package.- Twelve pastry cutting wheels, unit packaged as specified in 5.1.1.1, shall be packaged in a folding or setup paperboard box conforming to variety 1, style III or VIII, type B, class a

Check the source to verify that this is the current version before use.

of PPP-B-566 or type I, variety I, class A, style 3 or 4 of PPP-B-676, respectively. Box closure shall be effected with tape as specified in 5.1.1.1.

5.1.2 Level C.- Pastry cutting wheels shall be packaged to afford adequate protection against damage during shipment from supply point to the first receiving activity. The supplier may use his standard practice, when it meets this requirement.

5.2 Packing.- Packing shall be level A, B, or C as specified (see 6.2).

5.2.1 Level A.- One hundred forty-four pastry cutting wheels, packaged as specified in 5.1, shall be packed in a snug-fitting fiberboard shipping container conforming to style RSC, V2s of PPP-B-636. Each shipping container shall be closed, waterproofed by means of tape, and reinforced with flat strapping or tape banding in accordance with the appendix of PPP-B-636.

5.2.2 Level B.- One hundred forty-four pastry cutting wheels, packaged as specified in 5.1, shall be packed in a snug-fitting fiberboard shipping container conforming to style RSC, type CF, variety SW, or type SF, class domestic of PPP-B-636. Closure shall be in accordance with method II of the appendix of PPP-B-636.

5.2.2.1 When specified (see 6.2), the shipping container shall be V3c or V3s, fabricated and closed in accordance with PPP-B-636.

5.2.3 Level C.- Pastry cutting wheels, packaged as specified in 5.1, shall be packed in a manner to insure carrier acceptance and safe delivery at destination at the lowest transportation rate for such supplies. Containers shall be in accordance with the rules or regulations of carriers applicable to the mode of transportation.

5.3 Marking.- In addition to any special marking required by the contract or order, interior packages and shipping containers shall be marked in accordance with MIL-STD-129.

6. NOTES

6.1 Intended use.- The pastry cutting wheel is intended for cutting pastry in the field and fixed messes.

6.2 Ordering data.- Procurement documents should specify the following:

(a) Title, number and date of this specification
(b) When a preproduction sample is required (see 3.1)

SPECIFICATION ANALYSIS SHEET

Form Approved
Budget Bureau No. 22-R255

INSTRUCTIONS: This sheet is to be filled out by personnel, either Government or contractor, involved in the use of the specification in procurement of products for ultimate use by the Department of Defense. This sheet is provided for obtaining information on the use of this specification which will insure that suitable products can be procured with a minimum amount of delay and at the least cost. Comments and the return of this form will be appreciated. Fold on lines on reverse side, staple in corner, and send to preparing activity. Comments and suggestions submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or serve to amend contractual requirements.
