COMMERCIAL ITEM DESCRIPTION

PIE CRUST MIX (PREPARED)

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description in preference to Federal Specification N-P-361.

This Commercial Item Description (CID) covers prepared pie crust mix, packed into commercially acceptable containers, suitable for use by the Federal Government.

Salient characteristics.

Pie crust mix shall be prepared from enriched bleached flour, vegetable shortening, and salt. Optional functional ingredients may be added; for example, nonfat dry milk, whey, and dough conditioner (calcium sulfate, dicalcium phosphate, salt, diammonium phosphate, and calcium peroxide). Also, the mix may contain cornstarch, dried corn syrup, mono- and diglycerides, and sodium caseinate. The finished dry mix shall not contain more than 9.0 percent moisture.

When product is prepared in accordance with the labeled directions, it shall bake to a flaky, golden brown crust.

Analytical requirements.

Chemical analyses shall be made in accordance with the following method in the Official Methods of Analysis of the Association of Official Analytical Chemists:

Test	Chapter and Section	Method
Moisture	Chapter: Cereal Foods Section: Wheat Flour	Vacuum

Contractor's certification.

By submitting an offer, the contractor certifies that the product offered meets the specified salient characteristics and requirements of this CID; conforms to the producer's own specifications and standards, including product

FSC 8920

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

characteristics, manufacturing procedures, quality control procedures, and storage and handling practices; has a national or regional distribution from storage facilities located within the United States, its territories, or possessions; and is sold on the commercial market. The Government reserves the right to determine proof of such conformance prior to the first delivery from point of origin and any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance with the provisions of the contract.

Regulatory requirements.

The delivered product shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sales of the product in the commercial marketplace. All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

Quality assurance.

When required in the solicitation, contract, or purchase order, the Federal Grain Inspection Service (FGIS), U.S. Department of Agriculture, will determine the quality assurance of the prepared pie crust mix according to FGIS procedures. The product shall be examined and/or analyzed in accordance with applicable provisions in the CID, and when applicable, the United States Standards for Condition of Food Containers currently in effect on the date of the solicitation.

Preservation, packaging, packing, labeling, and marking.

The pie crust mix shall be preserved, packaged, packed, labeled, and case marked in accordance with good commerical practice. Commercial labeling and packaging, as may be augmented by the solicitation, contract, or purchase order, shall be acceptable. Shipping containers shall comply with the National Motor Freight Classification or Uniform Freight Classification, as applicable.

For Department of Defense procurements (Only).

The following requirements are applicable when specified by the contracting officer.

A. Commerical packaging. Five pounds of the product shall be packaged in a paperboard box or metal can in accordance with good commercial practice.

Check the source to verify that this is the current version before use.

B. Commercial packing. Six paperboard boxes or cans shall be packed in fiberboard containers complying with the National Motor Freight Classification or Uniform Freight Classification, as applicable.

C. Export packaging. Five pounds of the product shall be filled into a size 603 x 700 open-top style, round, metal can with welded or soldered side seam and compound-lined, double-seamed ends. The can shall be made throughout from not less than 0.20 pounds per base box electrolytic tinplate.

D. Export packing. Six cans of product shall be packed in a fiberboard box constructed, closed, and reinforced in accordance with Style RSC, Grade V3c, V3s, or V4s of PPP-B-636. Reinforcement shall be limited to nonmetallic strapping or pressure-sensitive adhesive, filament-reinforced tape.

E. Unit loads. Shipping containers shall be arranged in unit loads in accordance with MIL-L-35078. When unit loads are strapped, strapping shall be limited to nonmetallic strapping, except for Type II, Class F loads.

F. Labeling. Commercial labeling shall be acceptable. Preparation instructions shall be included.

G. Marking. Marking of shipping containers and unit loads shall be in accordance with MIL-STD-129.

Notes.

Purchasers should specify:

- Type of packing (For Department of Defense procurements).
- Quantity of product required.
