COMMERCIAL ITEM DESCRIPTION

FORCEPS, SHEET HOLDER

General Services Administration has authorized the use of this commercial item description (CID) in preference to Federal Specification GGG-F-570.

1. SCOPE. This commercial item description covers one type of forceps used for inserting and removing sheet holders during fabrication of components from sheet metal.

2. SALIENT CHARACTERISTICS:

2.1 Material. This tool shall be constructed from materials that resist corrosion and are suitable to withstand all requirements and tests of this CID.

2.2 Handles. Handles shall be constructed to provide a comfortable grip, free of sharp edges.

2.3 Jaw. The jaw portion of the forceps shall have provisions such as recesses or counter-bores, to prevent the sheet holders from slipping from the jaws of the tool.

2.4 Application. Forceps shall be usable for installation and removal of sheet metal holders conforming to table 1.

2.5 Length. Maximum overall length of the forceps shall be 8 inches.

Beneficial comments, recommendations, additions, deletions clarifications, etc, and any other data which may improve this document should be sent to:WR-ALC/TILCC 255 Second Street, Suite 122 Robins AFB, GA 31098-1640.

AMSC N/A FSC 5120

DISTRIBUTION STATEMENT A. Approved for public release, Distribution is unlimited.

3. REGULATORY REQUIREMENTS

3.1 Recovered material. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

4. QUALITY ASSURANCE PROVISIONS.

4.1 Market Acceptability. The following market acceptability criteria are necessary to document quality of the product to be provided under this CID.

4.1.1 The company producing the item must have been producing a product meeting the equirement of this CID for at least 2 years.

4.1.2 The company must have sold at least 100 items meeting this CID in the commercial marketplace over the past 2 years.

4.2 Performance Tests.

4.2.1 Each selected sample shall meet the salient characteristics described in section 2 of this CID and the following test:

4.2.2 Test Requirement. With the forceps blocked in an open position at the point used on sheet metal holders, the tool shall withstand a closing force of not less than 80 pounds applied not more than 1/2 inch from the end of the handles.
With the load removed, the forceps shall be checked for operation by inserting and removing a 1/4 inch holder through ten cycles, and shall show no evidence of failure.

4.2.3 Sample types and sizes shall be as specified in the contract or order.

5. PACKAGING

5.1 Preservation, packing and marking shall be as specified in the contract or order.
