COMMERCIAL ITEM DESCRIPTION
ANALYZER, SURFACE FINISH

The General Sevices Administration has authorized the use of this commercial item description (in reference to MIL-I-45177).

Scope: This commercial item description covers a precision instrument using electrical amplification and equipped with adequate accessories to indicate surface roughness of both spherical and flat surfaces.

Applicable documents. The following documents of the issues in effect on date of invitation for bids or request for proposal, form a part of this commercial item description to the extent specified herein:

American National Standards Institute

ANSI B46.1 Surface Texture (surfaces roughness, waviness and lay)

ANSI Standards are available from American National Standards Institute, Inc, 1430 Broadway, New york , NY 10018

Salient characteristics. Salient characteristics shall be equal or better than the following capabilities as applicable to ANSI B46.1 and other details as specified:

1. Roughness ranges: 0 to 10, 30, 100, 300, and 1000 microinches (respectively 0 to 0.25, 0.76, 2.54, 7.62, and 25.4 micrometers).

2. Roughness width cutoffs: 0.030, 0.010, and 0.003 inches (respectively 0.762, 0.254, and 0.0762 millimeters).

3. Accuracy tolerance: 5 percent of full scale

4. Stylus force: 1 gram or less

5. Measures roughness on:

   a. Outside diameters: 0.31 inch (7.87 mm) and larger

   b. Inside diameters 0.25 inch (6.35 mm) and larger

6. Power: Either 115V, 60Hz, or battery

Certification.

The contractor shall certify that the product offered meets the salient characteristics of this description, and that the product conforms to the producer's own drawings, specifications, standards and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Marking. The item offered for delivery shall be legibly marked with the producer's name or trademark and model or part number

Workmanship. Equipment offered for delivery shall be free from imperfections which may affect appearance, serviceability, or durability.

Packaging, packaging and marking.

The items shall be packaged in accordance with normal commercial practice and packed to assure acceptance by common carrier and provide product protection against loss and damage during multiple shipment, handling, and storage. The shipping container shall be in compliance with national freight classification and uniform freight classification. Shipping containers shall be marked as specified in the contract or oder.

Known acceptable products.
