AMENDMENT

TO

INTERIM FEDERAL SPECIFICATION

WRENCH, BOX (RATCHETING)

This amendment was developed by the Standardization Division, Federal Supply Service, General Services Administration, Washington, D. C. 20405, based upon currently available technical information. It is recommended that Federal agencies use it in procurement and forward recommendations for changes to the preparing activity at the address shown above.

The General Services Administration has authorized the use of this amendment as a valid exception to Interim Federal Specification GGG-W-001405, dated January 31, 1968.

PAGE 2

Paragraph 3.8 - After chromium plated, in second line, delete in its entirety and substitute: "and other visible surfaces shall have either a cadmium, nickel, chrome, black oxide, or phosphate finish".

PAGE 4

6.2 Superseding data. This specification supersedes type XX, Box Wrench, ratcheting, double head now in Interim Amendment-2 of GGG-W-636d.
