# COMMERCIAL ITEM DESCRIPTION

# CANDY AND CHOCOLATE CONFECTIONS

**The U.S. Department of Agriculture has authorized the use of this Commercial Item Description.**

## 1. SCOPE.

**1.1** This Commercial Item Description (CID) covers candy and chocolate confections, packed in commercially acceptable containers, suitable for use by Federal, State, and local governments and other interested parties, and as a component of operational rations.

## 2. CLASSIFICATION.

**2.1** The candy and chocolate confections shall conform to the following types, styles, and flavors as specified in the solicitation, contract, or purchase order.

**Types, styles, and flavors.**

**Type I** - Caramels, vanilla flavored
**Type II** - Toffee rolls, chocolate flavored
**Type III** - Toffee, assorted flavors
**Type IV** - Hard candy fruit tablets

**Beneficial comments, recommendations, additions, deletions, clarifications, etc., and any data which may improve this document should be sent to: Commander, Defense Personnel Support Center, 2800 South 20th Street, ATTN: DPSC-HSL, Philadelphia, PA 19145-5099 or FAX (215) 737-2963.**

**AMSC N/A** **FSC 8925**

**DISTRIBUTION STATEMENT A**. Approved for public release; distribution is unlimited.

**Style A** - Square or rectangular 1 ounce bar
**Style B** - Square 1.6 ounce bar

**Type V** - Hard candy jackets with soft centers, assorted flavor centers and shapes
**Type VI** - Pan coated disks

**Flavor 1** - Chocolate, assorted colors
**Flavor 2** - Fruit flavored, assorted flavors and colors

**Type VII** - Milk chocolate bar, heat resistant
**Type VIII** - Starch jelly candy, assorted flavors
**Type IX** - Peanut bar

## 3. SALIENT CHARACTERISTICS.

**3.1 Dairy ingredients:** Dairy ingredients used in the manufacture of products provided for in this CID shall originate from a plant that has been approved by the Dairy Grading Branch, Dairy Programs, Agricultural Marketing Service, U.S. Department of Agriculture. The manufacturing plants shall be listed in the publication Dairy Plants Surveyed and Approved for USDA Grading Service.

**3.1.1 Type I - Caramels, vanilla flavored bars**: The vanilla flavored caramel bars shall contain condensed skim milk, corn syrup, sugar, partially hydrogenated vegetable oil, whey solids, salt, and artificial and/or natural flavors. The vanilla flavored caramel bar may contain cream and coconut oil. The product shall not adhere to wrappers when subjected to 100° F for 2 hours. The vanilla flavored caramels shall be individually wrapped and overwrapped in units of six to form a 1-1/4 ounce (35.4 grams) bar.

**3.1.2 Type II - Toffee rolls, chocolate flavored:** The chocolate flavored toffee rolls shall contain corn syrup, sugar, partially hydrogenated soybean oil, condensed skim milk, cocoa, whey, lecithin, and artificial and natural flavors. The chocolate flavored toffee rolls may contain chocolate liquor. The texture of the toffee rolls shall be chewy. The inside portion shall be grainy in appearance and the outside portion shall be smooth. The chocolate flavored toffee shall be individually wrapped as a 2-1/2 ounce (70.87 grams) roll.

**3.1.3 Type III - Toffee, assorted flavors:** The assorted flavor toffees shall contain sugar, corn syrup, milk, partially hydrogenated coconut oil, and consist of approximately equal amounts of vanilla, chocolate, rum butter, orange, and maple flavors. The assorted flavor toffees may contain cream, lecithin, salt, fruit juice concentrate, chocolate liquor, partially hydrogenated cottonseed oil, and artificial colors. The product shall not adhere to the wrappers. The finished product shall be uniform in shape and shall be of such size that not less than 55 nor more than 90

Check the source to verify that this is the current version before use.

pieces are in one pound. The toffee candy pieces shall be individually wrapped in cellophane.

**3.1.4 Type IV - Hard candy fruit tablets:** The hard candy fruit tablets shall contain sugar, corn syrup, citric or malic acid, and natural and/or artificial flavors and may contain sodium lactate. Natural or U.S. FD&C certified colors shall be used for coloring. Style A hard candy fruit tablets of assorted flavors may contain turmeric coloring and cream of tartar. The hard candy tablets shall consist of various fruit flavors. Style A tablets shall be individually wrapped in cellophane and overwrapped in units of ten to form a 1 ounce (28.35 grams) bar. Style B tablets shall be individually wrapped in foil/paper laminate and overwrapped in foil/paper laminate in units of ten to form a 1.6 ounce (45.4 grams) bar.

**3.1.5 Type V - Hard candy jackets with soft centers:** The hard candy jackets shall contain sugar, corn syrup, citric or malic acid, and natural and/or artificial flavors. The soft centers shall be (a) dark-sweet chocolate, (b) chocolate cream, or (c) confectioners' apple-jam flavored with raspberry, strawberry, orange, lemon, lime, or pineapple as applicable. The mix shall consist of (a) and (c) or (b) and (c) or (a), (b), and (c) in approximately equal distribution. Any combination of five of the fruit flavored centers under (c) will be acceptable. The hard candy jackets shall consist of assorted shapes, colors, and flavors. The jacket shall average not more than 75 percent by weight of the finished piece. The count per pound for individual shapes shall not be less than 100 nor more than 150, but the mixture shall average not less than 115 per pound. The hard candy shall be individually wrapped in cellophane.

**3.1.6 Type VI - Pan coated disks:** The pan coated disks shall contain sugar, corn syrup, and natural and/or artificial flavors. The pan coated disks shall resemble a double-convex lens in shape, show minimal seepage of material through the coating, and retain a glossy sheen. The coating shall be free from pits (a pit shall be defined as a hole or air bubble that is as great or greater than the head of a common pin), holes, cracks, and shall be of such hardness that it cannot be easily crushed or cracked. Flavor 1 chocolate disks shall consist of sweet milk chocolate or one of the other standardized chocolates. Flavor 1 mixture shall consist of at least five different colors with the finished product testing Salmonella negative. Flavor 1 count per pound shall not be less than 480 nor more than 540 with the bulk weight of the packaged product not to exceed 2 percent broken or crushed pieces. Flavor 1 chocolate disks shall have 1-1/2 ounces (42.5 grams) of loose disks packed in a bag. Flavor 2 fruit flavored disks shall consist of texturizing agent, U.S. FD&C certified colors, ascorbic acid, and may contain partially hydrogenated vegetable oil, fruit juice from concentrate, citric acid, and dextrin. Flavor 2 centers shall be firm yet chewy, not hard or brittle. Flavor 2 package shall contain pieces of candy of five various fruit flavors. The count per pound shall not be less than 420 nor more than 460. Flavor 2 fruit flavored disks shall have 2.1-2.2 ounces (59.5-62.4 grams) of loose disks packed in a bag.

Check the source to verify that this is the current version before use.

**3.1.7 Type VII - Milk chocolate bar, heat resistant:** The heat resistant milk chocolate bar shall be composed of ingredients used within the levels specified in the FDA standard of identity for milk chocolate, except that specific functional ingredients may be added that will assure heat resistance and extend the acceptable shelf life of the product. These additional ingredients include: egg albumen, sodium caseinate, water, and safe and suitable emulsifiers (at a level not to exceed 2.0 percent). When egg whites are used, they shall be processed and labeled in accordance with the Regulations Governing the Inspection of Eggs and Eggs Products (7 CFR Part 59) as evidenced by the USDA egg products inspection shield on the label. The egg whites shall be certified as Salmonella negative. The bar shall retain its shape when subjected to temperatures of 120° F for 16 hours. The product shall not impart a gummy or waxy mouthfeel, and shall have a characteristic smooth milk chocolate texture and flavor. The finished product shall be a 1 ounce (28.35 grams) bar. The 1 ounce (28.35 grams) heat resistant, milk chocolate bar shall be packed in a heat-sealable, polyolefin bag.

**3.1.8 Type VIII - Starch jelly candy:** The starch jelly candy shall be made from a blend of corn syrup solids, starch, artificial and natural flavors, and may contain mono- and diglycerides. The candy shall be sanded with commercial type sanding sugar. No acids shall be used, however sodium citrate may be used up to 0.1 percent to adjust pH. If the open cook method is practiced, cream of tartar may be used. The bars shall not sweat when exposed to a temperature of 100° F for 24 hours in their prescribed wrappers. The starch jelly candy pieces shall be either individually wrapped in cellophane or five pieces laid end to end and overwrapped in cellophane to form a 2 ounce (56.7 grams) bar. The five piece package shall contain at least four of the following flavors: orange, lemon, lime, cherry, pineapple, or grape.

**3.1.9 Type IX - Peanut bar:** The peanut bar shall be made of whole and half pieces of peanuts in a cooked sugar matrix made from sugar, corn syrup, salt, lecithin, and preservatives. The bar may contain butter or margarine. The peanut bar shall be hard, glossy, and shall have a golden color. The peanuts shall have a fresh peanut flavor and odor, and shall have no trace of rancidity. The bar shall contain no less than 40.0 percent by weight of peanuts. The 1.4-1.7 ounce (39.7-48.2 grams) peanut bar shall be individually overwrapped in a metalized bag.

**3.2 Finished product:** The finished product shall meet the following moisture and pH requirements.

**3.2.1 Moisture:** The moisture content of the candy and chocolate confections shall be as follows: Type I vanilla flavored caramels shall have a moisture content not less than 5.0 nor more than 9.5 percent; Type II chocolate flavored toffee rolls and Type III assorted flavor toffees shall have a moisture content not less than 5.0 nor more than 8.0 percent; Type VII heat resistant milk chocolate bar moisture content shall not exceed 5.0 percent; and Type VIII starch jelly candy after sanding shall have a moisture content not less than 10.0 and not more than 15.0 percent.

Check the source to verify that this is the current version before use.

**3.2.2 pH**: The pH for Type VI, flavor 2 pan coated disks shall be not less than 2.0 nor more than 4.0. The pH for Type VIII, starch jelly candy shall be not less than 5.0 and not more than 6.5.

**3.3 Analytical requirements:** Unless otherwise specified, analytical requirements for the candy and chocolate confections shall be as specified in paragraph 3.2.1 and 3.2.2.

**3.3.1 Analytical procedure:** The Processed Products Branch (PPB), U.S. Department of Agriculture (USDA) shall determine the quality assurance of the candy and chocolate confections according to PPB procedures.

**3.3.2 Preparation of sample:** Product shall be prepared according to the following method: In an appropriately sized blender container, blend the sample to uniformity in a minimum of time.

**3.3.3 Analytical testing:** Analysis shall be in accordance with the following Official Methods of Analysis of the AOAC International.

| Test | Method | |
|---|---|---|
| Moisture | | |
| (Type I, II, and III) | 925.45A | Recommend 65° C (149° F) |
| Type VII | 931.04 | |
| Type VIII | 934.06, | 1st paragraph (use a 2-3 gram sample with sand) |
| Salmonella | | |
| (Type VI and VII) | 967.26(e) | |
| pH | 981.12 **1/** | |
| (Type VI, Flavor 2 and Type VIII) | | |

**1/** In determining the pH for Type VI, Flavor 2, 10 grams of sample and 10 mL of water shall be used

**3.3.4 Test results:** The test result for moisture shall be reported to the nearest 0.1 percent. The test result for salmonella shall be reported as negative or positive. The test result for pH shall be reported to the nearest 0.1 value. Any result not conforming to the finished product requirements shall be cause for rejection of the lot.

## 4. REGULATORY REQUIREMENTS.

**4.1** The delivered candy and chocolate confections shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sale of the candy and chocolate confections in the commercial marketplace. Delivered candy and chocolate confections shall comply with all applicable provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated there under.

## 5. QUALITY ASSURANCE PROVISIONS.

**5.1 Product conformance.** The candy and chocolate confections provided shall meet the salient characteristics of this CID, conform to the producer's own specifications, standards, and quality assurance practices, and be the same candy and chocolate confections offered for sale in the commercial market. The Government reserves the right to require proof of such conformance.

**5.2 Quality assurance.** When required in the solicitation, contract, or purchase order, PPB, USDA shall determine the quality assurance of the candy and chocolate confections according to PPB procedures. The candy and chocolate confections shall be examined or analyzed as applicable in accordance with applicable provisions in this CID, solicitation, contract, or purchase order, and, when applicable, the United States Standards for Condition of Food Containers currently in effect on the date of the solicitation.

## 6. PACKAGING.

**6.1 Preservation, packaging, packing, labeling, and case marking.** Preservation, packaging, packing, labeling, and case marking shall be as specified in the solicitation, contract, or purchase order.

## 7. NOTES.

**7.1 Purchasers shall specify:**

- Type(s), style(s), and flavor(s) of candy and chocolate confections required.
- When a bid sample is required.

**7.2 Sources of documents.**
