COMMERCIAL ITEM DESCRIPTION

PIE CRUST, PREFORMED, GRAHAM CRACKER

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description in lieu of Federal Specification N-P-1844, Pie Crust, Preformed, Graham Cracker.

This Commercial Item Description (CID) covers a 9-inch, preformed, graham cracker pie crust in a disposable, aluminum pie plate, packed in commercially acceptable containers, suitable for use by the Federal Government.

Salient characteristics.

The graham cracker pie crust shall be preformed from ingredients of enriched wheat flour, vegetable shortening (excluding palm oil, palm kernel oil, and coconut oil), sugar, corn syrup, graham flour, brown sugar, salt, leavening, malt, cornstarch, lecithin, and artificial flavor. The shortenings used shall contain antioxidants such as butylated hydroxyanisole, butylated hydroxy-toluene, or tertiary-butylhydroquinone, or combinations thereof. The leavening acid, salt, and vitamins in the enriched flour shall be of Food Chemicals Codex purity. Optional ingredients are whey, citric acid, honey, high fructose, corn syrup, molasses, and cinnamon. Graham crumbs made from enriched flour may be substituted for the flour portion and other ingredients as applicable. The pie crust shall have a net weight of 170 grams (minus tolerance of 9 grams permissible on each unit weighed). The crust shall be formed in a 9-inch diameter, aluminum plate, essentially whole without breaks and shaped to conform to the bottom and side walls (the aluminum plate is part of the finished product). After baking, the crust shall be tan in color and granular in appearance. The product shall possess a typical graham cracker sweet flavor and odor. The crust shall be firm enough so that it will slice without breaking and not dissolve when filled. The moisture range of the product shall be not less than 1.25 nor more than 3.25 percent.

FSC 8920

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Analytical requirements.

Chemical analyses shall be made in accordance with the following method in the Official Methods of Analysis of the Association of Official Analytical Chemists:

Test	Chapter and Section	Method
Moisture	Chapter: Cereal Foods Section: Wheat Flour	Vacuum Method

Contractor's certification.

By submitting an offer, the contractor certifies that the product offered meets the specified salient characteristics and requirements of this CID; conforms to the producer's own specifications and standards, including product characteristics, manufacturing procedures, quality control procedures, and storage and handling practices; has a national or regional distribution from storage facilities located within the United States, its territories, or possessions; and is sold on the commercial market. The Government reserves the right to determine proof of such conformance prior to the first delivery from point of origin and any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance with the provisions of the contract.

Regulatory requirements.

The delivered product shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sales of the product in the commercial marketplace. All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

Quality assurance.

When required in the solicitation, contract, or purchase order, the Federal Grain Inspection Service (FGIS), U.S. Department of Agriculture, will determine the quality assurance of the preformed, graham cracker pie crust according to FGIS procedures. The product shall be examined and/or analyzed in accordance with applicable provisions in the CID, and when applicable, the *United States Standards for Condition of Food Containers* currently in effect on the date of the solicitation.

Preservation, packaging, packing, labeling, and marking.

The preformed pie crusts shall be preserved, packaged, packed, labeled, and case marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the solicitation, contract, or purchase order, shall be acceptable. Shipping containers shall comply with the National Motor Freight Classification or Uniform Freight Classification, as applicable.

For Department of Defense procurements.

The following requirements are applicable when specified by the contracting officer:

A. Commercial packaging. Each preformed, graham cracker pie crust in a 9-inch, aluminum pie plate shall be packaged in accordance with good commercial practice.

B. Commercial packing. Twelve, twenty-four, or forty-eight graham cracker pie crusts shall be packed in fiberboard containers complying with the National Motor Freight Classification or Uniform Freight Classification, as applicable.

C. Export packaging. Same as in commercial packaging.

D. Export packing. Twelve, twenty-four, or forty-eight graham cracker pie crusts shall be packed in a fiberboard box constructed, closed, and reinforced in accordance with Style RSC, Grade V3c, V3s, or V4s of PPP-B-636. Reinforcement shall be limited to nonmetallic strapping or pressure-sensitive adhesive, filament-reinforced tape.

E. Unit loads (commercial and export). Shipping containers shall be arranged in unit loads in accordance with MIL-L-35078. When unit loads are strapped, strapping shall be limited to nonmetallic strapping, except for Type II, Class F loads.

F. Labeling (commercial and export). Commercial labeling shall be acceptable.

G. Marking (commercial and export). Marking of shipping containers and unit loads shall be in accordance with MIL-STD-129.
