COMMERCIAL ITEM DESCRIPTION
DOG FOOD, HIGH PERFORMANCE, DRY

The General Services Administration has authorized the use of this commercial item description in preference to MIL-F-43754.

1. SCOPE

1.1 Scope. This commercial item description covers high performance dry dog food that is packed in specialized containers and is suitable for feeding Military Working Dogs (MWDs).

2. APPLICABLE DOCUMENTS

2.1 The documents referenced in this commercial item description shall be the issues in effect on the date of issuance of the invitation for bids or request for proposal unless otherwise specified. These documents form a part of this commercial item description to the extent specified. In the event of a conflict between this commercial item description and a document referenced herein, this commercial item description shall take precedence.

U.S. Department of Health and Human Services:

Federal Food, Drug, and Cosmetic Act, and regulations promulgated thereunder.

Copies of the Food, Drug, and Cosmetic Act should be addressed to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

Beneficial comments, recommendations, additions, deletions, clarifications, etc., and any other data which may improve this document should be sent to: General Services Administration, Engineering Group (7FXEE), 819 Taylor Street, Fort Worth, TX 76102.

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

FSC 8710

Association of American Feed Control Officials:

Official Publication, 1992.

Copies of the Official Publication, 1992, should be addressed to Mr. Charles P. Frank, AAFCO Treasurer, Georgia Department of Agriculture, Plant Food, Feed, and Grain Division, Capital Square, Atlanta, GA 30334.

3. SALIENT CHARACTERISTICS

3.1 Material. The high performance dry dog food shall be prepared from high quality materials and shall be processed using good manufacturing procedures as defined by the Federal Food, Drug, and Cosmetic Act. The product shall meet the requirements of the minimum testing protocol for proving a maintenance claim for a dog food as specified in the Official Publication of the Association of American Feed Control Officials (AAFCO), 1992. The optional procedure of performing either the growth or gestation/lactation protocols in lieu of performing the maintenance protocol shall not be acceptable. In addition, the product must conform to the AAFCO Nutrient Profiles for Dog Foods for adult maintenance minimums and maximums as applicable. The product shall be formulated as a "premium/performance-type" balanced diet for the working dog. This will require a higher caloric density and a higher total digestibility than found in maintenance-type dog foods. The product shall have a minimum metabolizable energy (ME) of 4.1 kcal/gram dry matter and a minimum dry matter digestibility of 83%.

3.2 Marking. In addition to marking requirements of the contract or purchase order, the normal commercial labeling of the product shall be present.

3.3 Regulatory requirements. The product shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sales of the product in the commercial marketplace. All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

4. QUALITY ASSURANCE PROVISIONS

4.1 Contractor's certification. The contractor shall certify that the product offered meets the specified salient characteristics of this CID and conforms to the producer's own specifications and standards, including product storage and handling practices.

Check the source to verify that this is the current version before use.

The contractor shall have available documented evidence in the form of test reports which show conformance with all requirements specified herein. Thereafter, the contractor may provide certificates of compliance based on previous tests for subsequent shipments. In the event the contractor changes formulation or ingredients, the dog food shall be retested.

5. PREPARATION FOR DELIVERY

5.1 Packaging. Product containers shall be durable and be able to be palletized easily. The container shall hold 25 pounds of product (net weight tolerance of minus 4 ounces) and be a plastic or metal pail with a single handle that lowers to the side for stacking. Plastic containers shall be identified by type using the Society of the Plastics Industry coding system for potential recycling. The containers must be insect and rodent proof, be able to withstand hot (140°F) and cold (-10°F) climates, and be water-proof. The container lid shall be secure enough to prevent spillage during transport but capable of being repeatedly removed and replaced (without the use of any tools).

6. NOTES

6.1 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents (if applicable).

a. Title, number, and date of this commercial item description.
b. Packaging required, if different from paragraph 5.1.

6.2 National Stock Number (NSN). The NSN associated with this commercial item description is 8710-01-360-8078.
