Check the source to verify that this is the current version before use.

Buoyancy. When inspected as specified in MIL-L-81561, the life preserver shall support a 40 pound steel weight.

Weight. The weight of the life preservers furnished under this detailed specification shall not be greater than 5.0 pounds when determined on a scale capable of weighing to the nearest 0.01 pound. The weight of the preserver shall include the preserver, casing, pouch assembly, belt assembly, and carbon dioxide filled cylinders.

NOTES:

Intended use. The LPU-32/P life preserver is intended for use as emergency and life support equipment by troops or passengers being transported in aircraft.
