DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188
Exp. Date: Jun 30, 1986

1. TITLE	2. IDENTIFICATION NUMBER
TRAINING COURSE STANDARDS	DI-ILSS-80047

ESCRIPTION/PURPOSE

3.1 The Training Course standards provide the government sufficient information to permit an accurate evaluation of a student's capabilities to meet the terminal and evaluating objectives upon successful completion of the course.

(Continued on Page 2)

PPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC REQUIRED	6b. GIDEP REQUIRED

PPLICATION/INTERRELATIONSHIP

7.1 This DID contains the format and content preparation instructions for Training Course Standards generated by paragraph 5.4.4 of MIL-STD-1379B.

7.2 This DID may be applied in any acquisition phase which requires the contractor to prepare Training Programs.

7.3 This DID supersedes U-H-5386.

PROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
		G3669

ATION INSTRUCTIONS

10.1 Source Document. The applicable issues of the documents cited herein, including their approval dates and dates of any applicable amendments and revisions, shall be as reflected in the contract.

10.2 General. A training course standard shall contain the following:

a. The purpose of the standard as it relates to the particular course;
b. General Course Objectives;
c. Course Prerequisites;
d. Terminal Objectives. Each terminal Objective shall identify a specific behavioral act, explain the conditions under which the act occurs, give the acceptable performance level in precise qualitative and quantitative terms, and the time normally expected to accomplish. A sufficient number of Terminal Objectives shall be given to (1) insure the student acquires the necessary degree of proficiency, (2) adequately provide the basis for the development of the more detailed training materials, and (3) aid in the evaluation of the course in relation to the job requirements.

10.3 Format. The format of the training course standard shall be in accordance with the sample standard in Figure 1.

10.4 Content. The content of the training course standard shall be in accordance with the following:

Continued on Page 2)

Source: https://assist.dla.mil - Downloaded: 2026-10-26T10:33Z
Check the source to verify that this is the current version before use.

3. DESCRIPTION/PURPOSE (Continued)

3.2 The Training Course Standards also specify prerequisite skills required of students entering the course, they serve as the prime document for reviewing course content and the pertinence of the content to current job requirements, and they identify special materials required to accomplish the course objectives.

---

10. PREPARATION INSTRUCTIONS (Continued)

10.4.1 Front Cover. The front cover shall contain the following:

a. CLASSIFICATION. The security classification, located at the top and bottom center of the page, shall specify the highest classification of any individual section within the standards or the classification assigned to the standards as a whole.

b. TITLE. The title shall include "Training Standard" followed by the course title.

c. DATE. Date of Preparation.

10.4.2 TABLE OF CONTENTS. The table of contents shall bear the security classification at the top and bottom of the page and identify each major topic in the Standard. (See Sample Standard in Figure 1.)

10.4.3 BODY. The body of the standard shall contain the following topics: (Each page of the body shall bear the security classification at top and bottom).

a. PURPOSE. This section shall contain the three "boilerplate" paragraphs as written in the Sample Standard in Figure 1.

b. GENERAL COURSE OBJECTIVES. Enter a brief description of the course goals.

c. COURSE PREREQUISITES.

(1) Include a list of all skills required of students entering the course. The skills shall be written as complete (full) behavioral objectives, which contain the GIVEN, ACTION and CRITERIA.

(2) The terminal and/or enabling objective(s) number(s) requiring the prerequisite skill shall be identified parenthetically. (See Figure 1.)

d. TERMINAL OBJECTIVES (T.O.).

(1) Include a list of complete behavioral objectives which identify the major tasks to be performed by the students upon completion of the course.

(2) Each terminal objective will be labeled "T.O.", followed by a number.

Source: https://assist.dla.mil -- Downloaded: 202640-26T10:33Z
Check the source to verify that this is the current version before use.

10. PREPARATION INSTRUCTIONS (Continued)

e. ENABLING OBJECTIVES (E.O.).

(1) Include a list of complete behavioral objectives subordinate to the terminal objectives.

(2) All enabling objectives to be satisfied in the course will be included.

(3) The hierarchy of enabling objectives shall be identified by labels assigned to every objective. For example, objectives E.O. 1.1 and E.O. 1.2 are directly subordinate to E.O. 1.

(4) Enabling objectives directly supporting terminal objectives (T.O.s), shall indicate the T.O. parenthetically (See Figure 1.)

f. SKILL HIERARCHY. Include the skill hierarchy, or pyramid of skills which depicts the learning order of all skills to be obtained from the course. The relationship of prerequisite skills to course skills shall also be shown. This skill hierarchy will serve as the source document for establishing all course objectives. A learning skill is stated as the ACTION part of a complete behavioral objective (GIVEN, ACTION, and CRITERIA) and is referred to as the "Shorthand Objective."

(1) The skill hierarchy will be prepared as shown in the exhibit, Sample Standard, Figure 1.

(2) All terminal, enabling and prerequisite shorthand objectives for the course will be shown.

(3) Each shorthand objective block on the skill hierarchy will be labeled. The label given to each shorthand objective will be identical to the complete behavioral objective label.

10.4.4 APPENDICES. Appendices shall be prepared to include the following:

a. LOWEST REPLACEABLE UNIT LIST (For Maintenance Courses Only)

(1) A course list of the lowest replaceable units (LRUs) shall be prepared. The LRUs dictate the lowest level of field repair to be performed by students completing the course and must be approved in writing by the Government.

(2) Each LRU shall be identified by full name, manufacturer, and part number.

Source: https://assist.dla.mil -- Downloaded: 202640-26T10:33Z
Check the source to verify that this is the current version before use.

10. PREPARATION INSTRUCTIONS (Continued)

b. TEST EQUIPMENT LIST (For Maintenance Courses Only)

(1) A list of all test equipment and special fixtures required during the course shall be prepared.

(2) Each item will be identified by full name, manufacturer, and part number.

c. PUBLICATION LIST

(1) A list of all publications required to conduct the course shall be prepared.

(2) The list shall include the following:

(a) Operator's Manuals
(b) Maintenance Manuals
(c) Programmer's Manuals
(d) Software Manuals
(e) Diagnostic Manuals
(f) Textbooks
(g) Reference Cards

(3) Each document shall be identified by full name, publisher, publication or part number and date of publication.

10.4.5 SAMPLE TRAINING STANDARD. A completed sample standard is shown in Figure 1.

UNCLASSIFIED

Training Standard Date

XYZ Receiver Maintenance Course

1. PURPOSE: This Training Standard:

a. Sets forth those terminal and enabling objectives which are to be used as the standards for measuring the performance of personnel attending the course.

b. Establishes a control document to be used in the development of evaluation instruments and training material for this course.

c. Serves as the prime document for reviewing course content in determining its pertinence to current job requirements.

2. GENERAL COURSE OBJECTIVES: The course is designed to prepare personnel to perform installation, set-up, preventive and corrective maintenance to the lowest replaceable unit (LRU) on the XYZ Receiver. The LRUs are identified in Appendix A. The test equipments to be used in the course are identified in Appendix B.

3. COURSE PREREQUISITES: Students entering the course must possess the following skills:

a. (E.O. 2.3.2 and 2.3.3) Given required soldering equipments, the student will use the soldering equipment to remove and install

3. COURSE PREREQUISITES: (continued)

LRUs which require solder connections. To be acceptable, the finished job should be electrically and mechanically sound, with no damage to equipment components or wiring.

b. (E.O. 1.1.1.2.1.1/E.O. 2.1.2.1.1) From memory, the student will describe the relationship between Noise Figure, Sensitivity and IF Bandwidth. Time limit: 15 minutes

c. (E.O. 1.1.1.2.1.1/E.O. 2.1.2.1.1) From memory, the student will describe the operation of a basic AM receiver. Time limit: 10 minutes

d. (E.O. 1.1.1.2.1.1/E.O. 2.1.2.1.1) From memory, the student will describe the operation of a basic FM receiver. Time limit: 10 minutes

UNCLASSIFIED

TERMINAL OBJECTIVES

T.O. 1 Given required tools, test equipment, technical publications, Checkout and Fault Isolation flowcharts and an XYZ receiver containing a series of instructor-inserted malfunctions (15 minimum), the student will perform corrective maintenance to the lowest field replaceable unit for 80% of thermal functions. To be acceptable, the student will: identify thermal functioning LRU; replace the faulty LRU; adjust the replaced LRU (if necessary); and verify proper receiver operation. The time for each malfunction is limited to double average time.

T.O. 2 Given required tools, test equipment, technical publications, and Checkout and Fault Isolation flowcharts, the student will perform preventive maintenance on the XYZ Receiver to the specifications contained in the technical publications. Time limit: 2 hours.

UNCLASSIFIED

ENABLING OBJECTIVES

E.O. 1 (T.O. 1) Given a faulty XYZ receiver in an operational system, the student will localize the system fault to the receiver by identifying at least one abnormal receiver function. Time limit: 15 minutes.

E.O. 1.1 From memory, the student will describe the effect on XYZ receiver operation for abnormal operations of each LRU. The description should indicate the degree of receiver's usefulness under marginal LRU operation. 80% accuracy required. Time limit: 30 minutes.

E.O. 1.1.1 (Same as E.O. 2.1)

E.O. 1.1.1.1 Given a list of XYZ receiver input/output signals, the student will state the purpose of each signal and the effect on receiver's or system's operation for out-of-tolerance or absence of each of the signals. 80% accuracy required.

Reverse (Page 8) Blank

Check the source to verify that this is the current version before use.

UNCLASSIFIED

ENABLING OBJECTIVES (continued)

E.O. 1.1.1.1.1 Using the technical publications, the student will state the acceptable tolerances for each signal on every LRU for the XYZ receiver. 100% accuracy required. Time limit: 20 minutes

E.O. 1.1.1.2 With the use of a functional block diagram, technical publications, and student notes, the student will describe the theory of operation of the XYZ receiver. To be acceptable, the description should include: the function of each LRU, the relationship of LRUs, and LRU input and output signals/voltages. Time limit: 30 minutes

E.O. 1.1.1.2.1 Given an operational XYZ receiver with actual (or simulated) inputs, the student will operate the receiver's front panel to obtain optimum receiver performance in AM,FM and Pulse modes. Time limit: 20 minutes

E.O. 1.1.1.2.1.1 Given an XYZ receiver, the student will state the purpose of the front panel controls, indicators, and switches. Time limit: 5 minutes

Reverse (Page 10) Blank

UNCLASSIFIED

ENABLING OBJECTIVES (continued)

E.O. (T.O. 1 & 2) Given required test equipment, Checkout and Fault Isolation flowcharts and associated test procedures, the student will verify receiver operation by performing operational checkout procedures on the XYZ receiver. Time limit: 30 minutes

E.O. 2.1 Given technical publications and test equipment waveforms and/or readings for each checkout procedure for an XYZ receiver, the student will identify acceptable and non-acceptable waveforms readings. 80% accuracy required.

E.O. 2.1.1 (Same as E.O. 1.1.1.1)

E.O. 2.1.1.1 (Same as E.O. 1.1.1.1.1)

E.O. 2.1.2 (Same as E.O. 1.1.1.2

E.O. 2.1.2.1 (Same as E.O. 1.1.1.2.1)

E.O. 2.1.2.1.1 (Same as E.O. 1.1.1.2.1.1)

UNCLASSIFIED

ENABLING OBJECTIVES (continued)

E.O. 2.2 Given the Checkout and Fault Isolation Flowcharts for the XYZ receiver and associated check/alignment procedures, the student will describe the use of the flowchart for the XYZ receiver by identifying: the checkout flow, fault isolation paths (troubleshooting flow), applicable checks/alignments specified in flowchart, troubleshooting paths based on fault symptoms, and order of LRU replacement. Time limit: 20 minutes

E.O. 2.3 Given tool and technical publications, the student will install the XYZ receiver into a typical operational system. Time limit: 30 minutes

E.O. 2.3.1 Given a list of LRUs for all XYZ serial number receivers, the student will list the available spares, other than direct replacements, which can be substituted without affecting receiver operation. Time limit: 15 minutes

E.O. 2.3.1.1 Using the technical publications, the student will identify proper nomenclature and required ordering information for each LRU in all XYZ serial number receivers. 100% accuracy required. Time limit: 30 minutes

UNCLASSIFIED

ENABLING OBJECTIVES (continued)

E.O. 2.3.2 Given required tools and technical publications, the student will remove all LRUs from the XYZ receiver without causing damage to the receiver. Time limit: 45 minutes

E.O. 2.3.2.1 (Same as E.O. 2.6.1)

E.O. 2.3.3 Given required tools,technical publications and a dismantled (to LRU) receiver, the student will install the LRUs in the XYZ receiver without error. Time limit: 30 minutes

E.O. 2.3.3.1 (Same as E.O. 2.6.1)

E.O. 2.4 Given the necessary test equipment, XYZ receiver, and technical publications, the student will configure the equipments for each check procedure required. 100% accuracy required.

E.O. 2.5 Given a source of low velocity compressed air and cleaning materials, the student will clean the XYZ receiver of all dust, moisture, grease and foreign matter.

E.O. 2.6 The student will identify deterioration of electrical and mechanical parts. Time limit: 15 minutes

UNCLASSIFIED

ENABLING OBJECTIVES (continued)

E.O. 2.6.1 With the use of technical publications and a list of LRUs, the student will physically locate all LRUs in the XYZ receiver. Time limit: 6 minutes

E.O. 2.7 Given technical publications, the student will describe the power and signal distribution within the XYZ receiver. Time limit: 15 minutes

E.O. 2.8 Given test equipment technical publications, the student will use the following test equipment to their maximum capability on the XYZ receiver checks and alignments. 100% accuracy required.
