Project Number: SESS-2019-066

Use/Relationship: Aircraft Logbooks and Aeronautical Equipment Records are utilized to document the service history of the aircraft and aeronautical equipment being procured. This Data Item Description (DID) allows for the tailoring of service or technical data to be included in an aircraft logbook or an aeronautical equipment record. This DID is applied to delivery of the aircraft and aeronautical equipment being procured. These records are prescribed for use with aircraft and aeronautical equipment (e.g., aircraft power plants, propellers, airborne auxiliary power units and other appropriate items of airborne equipment).

This DID contains the format, content, and intended use information for the data deliverable resulting from the work task described in the contract.

This DID supersedes DI-MNTY-81067.
